

Agenda for a meeting of the Regeneration and Environment Overview and Scrutiny Committee to be held remotely on Tuesday, 19 January 2021 at 5.30 pm

Members of the Committee – Councillors

LABOUR	CONSERVATIVE	LIBERAL DEMOCRAT AND INDEPENDENT GROUP	GREEN
Kamran Hussain (Chair) Berry Dodds Lintern Mohammed	Heseltine Herd	R Ahmed	Love

Alternates:

LABOUR	CONSERVATIVE	LIBERAL DEMOCRAT AND INDEPENDENT GROUP	GREEN
Choudry Jenkins Johnson Mukhtar	Riaz Whiteley	Stubbs	Warnes

NON VOTING CO-OPTED MEMBERS

Nicola Hoggart Environment Agency
Julia Pearson Bradford Environmental Forum

Notes:

- A webcast of the meeting will be available to view live on the Council's website at <https://bradford.public-i.tv/core/portal/home> and later as a recording
 - Approximately 15 minutes before the start time of the Corporate Parenting Panel meeting the Governance Officer will set up the electronic conference arrangements initially in private and bring into the conference facility the Members of the Panel. The officers presenting the reports at the meeting of the Panel will have been advised by the Governance Officer of their participation and will be brought into the electronic meeting at the appropriate time.
 - If any further information is required about any item on this agenda, please contact the officer named at the foot of that agenda item.

From:

Parveen Akhtar
City Solicitor

Agenda Contact: Su Booth - 07814 073884
Phone: 01274 432280

To:

A. PROCEDURAL ITEMS

1. ALTERNATE MEMBERS (Standing Order 34)

The City Solicitor will report the names of alternate Members who are attending the meeting in place of appointed Members.

2. DISCLOSURES OF INTEREST

(Members Code of Conduct - Part 4A of the Constitution)

To receive disclosures of interests from members and co-opted members on matters to be considered at the meeting. The disclosure must include the nature of the interest.

An interest must also be disclosed in the meeting when it becomes apparent to the member during the meeting.

Notes:

- (1) Members may remain in the meeting and take part fully in discussion and voting unless the interest is a disclosable pecuniary interest or an interest which the Member feels would call into question their compliance with the wider principles set out in the Code of Conduct. Disclosable pecuniary interests relate to the Member concerned or their spouse/partner.*
- (2) Members in arrears of Council Tax by more than two months must not vote in decisions on, or which might affect, budget calculations, and must disclose at the meeting that this restriction applies to them. A failure to comply with these requirements is a criminal offence under section 106 of the Local Government Finance Act 1992.*
- (3) Members are also welcome to disclose interests which are not disclosable pecuniary interests but which they consider should be made in the interest of clarity.*
- (4) Officers must disclose interests in accordance with Council Standing Order 44.*

3. MINUTES

Recommended –

That the minutes of the meeting held on 29 September 2020 be signed as a correct record (previously circulated).

(Su Booth 07814 073384)

4. REFERRALS TO THE OVERVIEW AND SCRUTINY COMMITTEE

Any referrals that have been made to this Committee up to and including the date of publication of this agenda will be reported at the meeting.

B. OVERVIEW AND SCRUTINY ACTIVITIES

5. INSPECTION OF REPORTS AND BACKGROUND PAPERS

(Access to Information Procedure Rules – Part 3B of the Constitution)

Reports and background papers for agenda items may be inspected by contacting the person shown after each agenda item. Certain reports and background papers may be restricted.

Any request to remove the restriction on a report or background paper should be made to the relevant Strategic Director or Assistant Director whose name is shown on the front page of the report.

If that request is refused, there is a right of appeal to this meeting.

Please contact the officer shown below in advance of the meeting if you wish to appeal.

(Su Booth - 07814 073884)

6. COVID-19 ECONOMIC RECOVERY PLAN

1 - 62

The report of the Interim Strategic Director of Place (**Document “O”**) provides an overview of the Bradford District Economic Recovery plan that has been developed by the Bradford District Economic Recovery Board.

The recovery plan assesses the impacts of the COVID pandemic on Bradford District’s local economy and sets out the actions we need to take now and over the next two years to accelerate our recovery from Covid-19.

Recommended –

- (1) that the Regeneration and Environment Overview and Scrutiny Committee would like to thank Professor Zahir Irani and the Economic Recovery Board members for their valuable contribution to this crucial area of work.**
- (2) The Committee note and comment on the approach to Economic Recovery outlined in this report and the accompanying Bradford District Economic Recovery Plan.**

(Jason Longhurst – 01274 434748)

7. CULTURAL STRATEGY 2020-30

63 - 136

The report of the Interim Strategic Director of Place (**Document “P”**) provides a briefing to members on the work in progress on development of a new 10-year cultural strategy for Bradford District.

“**Culture is Our Plan**” is being developed by the Bradford Cultural Place Partnership, funded by Bradford Council and Arts Council England.

Recommended –

- (1) that the Committee notes the work to date and work still in progress on this strategic plan.**
- (2) that the Committee gives its comment on the draft narrative, vision and strategic ambitions as part of ongoing consultation on the emerging plan.**

(Nicola Greenan – 01274 431301)

8. WORK PROGRAMME 2020-21

137 -
144

This report includes the Regeneration and Environment Overview and Scrutiny Work Programme 2020-21 (**Document “Q”**)

Recommended –

- (1) that members consider and comment on the areas of work included in the work programme.**
- (2) that members consider any detailed scrutiny reviews that they may wish to conduct.**

Report of the Interim Strategic Director of Place to the meeting of the Regeneration and Environment Overview and Scrutiny Committee to be held on 19th January 2021

O

Subject:

The Bradford District Economic Recovery Plan

Summary statement:

The report provides an overview of the Bradford District Economic Recovery plan that has been developed by the Bradford District Economic Recovery Board. The Economic Recovery Board is a partnership board, chaired by Professor Zahir Irani, Deputy Vice Chancellor, University of Bradford with membership from across the business community, public sector partners, education and voluntary sectors.

The recovery plan assesses the impacts of the COVID pandemic on Bradford District's local economy and sets out the actions we need to take now and over the next two years to accelerate our recovery from Covid-19 by sustaining employment and boosting productivity whilst continuing to build a more inclusive, sustainable and resilient economy for the subsequent period.

The Committee are asked to note and comment on the approach to Economic Recovery outlined in this report and the accompanying Bradford District Economic Recovery Plan.

Jason Longhurst, Interim Strategic Director of Place	Portfolio: Corporate
Report Contact: Mark Clayton – Policy Officer	Overview & Scrutiny Area: Regeneration and Environment

SUMMARY

- 1.1 The Coronavirus pandemic has created a major global shock. It has resulted in the loss of many lives, affected people's physical and mental wellbeing, and resulted in the greatest economic downturn in recent history.
- 1.2 In Bradford District we have already seen unemployment double (including a significant spike in youth unemployment), the closure of a number of the District's businesses and reduced footfall and spend in city and town centre. Going forward it is likely we will see further jobs losses and business failures as the economic impacts continue to unfold.
- 1.3 The pandemic has highlighted the issues of social inequality which some communities in the district face and has had a disproportionate impact on our most disadvantaged residents, including those living in poverty, people from BAME communities, those living with disabilities, women, migrants and the elderly. This pandemic has also occurred at a time of real economic change for the country as we work together to tackle climate change and understand the impacts of exiting the European Union.
- 1.4 Council leadership and resources have played a critical role in the district's response to the Covid-19 emergency. This has included ensuring that £125 million of Small Business Grant Fund and Retail, Hospitality and Leisure Business Grant Fund has been paid to over 11,000 businesses throughout the crisis - the third highest amount of any city authority district in England after Birmingham and Leeds. A further £6.9 million of Local Authority Discretionary Grant funds has been paid to 639 businesses - the second highest amount after Birmingham. As the coronavirus pandemic has evolved from a health crisis to an economic one – there is a need for a recovery plan to sit alongside our existing economic strategy to address the impacts of the pandemic that have exposed and amplified the economic challenge facing the district.
- 1.5 To this end the Council has worked with the University of Bradford to form a new Bradford Economic Recovery Board that brings together a diverse and inclusive group of Council and business leaders alongside partner organisations and key stakeholders to help direct the district's economic response to the impacts of the pandemic and support businesses and communities to respond to the on-going challenges and opportunities presented by the Covid-19 crisis.
- 1.6 The Board has been responsible for directing and agreeing the production of a Bradford Economic Recovery Plan that will outline the actions we and our partners will need to take to address the key challenges and opportunities for the district going forward.
- 1.7 PwC have been appointed to work with Bradford Economic Recovery Board to produce an Economic Recovery Plan that builds on the existing Bradford District Economic Strategy and a revised Council Plan and sets out the actions we need to take now and over the next two years to accelerate our recovery from Covid-19 by sustaining employment and boosting productivity whilst continuing to build a more inclusive, sustainable and resilient economy for the subsequent period.
- 1.8 The overall aim is still for Bradford to become the UK's fastest growing economy, performing above the national average on key metrics of economic performance.

- 1.9 The Recovery Plan was considered at a meeting of the Council Executive held on 5th January. The Executive resolved that:
- (1) That the Executive would like to thank Professor Zahir Irani and the Economic Recovery Board members for their valuable contribution to this crucial area of work.
 - (2) That the approach to Economic Recovery outlined in the Bradford District Economic Recovery Plan be noted.
 - (3) That the Economic Partnership takes the lead in taking this plan forward and uses the plan to inform the District's approach to economic recovery supported by other appropriate partnership boards including the Skills Partnership and the Sustainable Development Partnership.
 - (4) That these plans are progressed for the whole District, working with the Keighley and Shipley Towns Fund Boards and other partnerships.

BACKGROUND

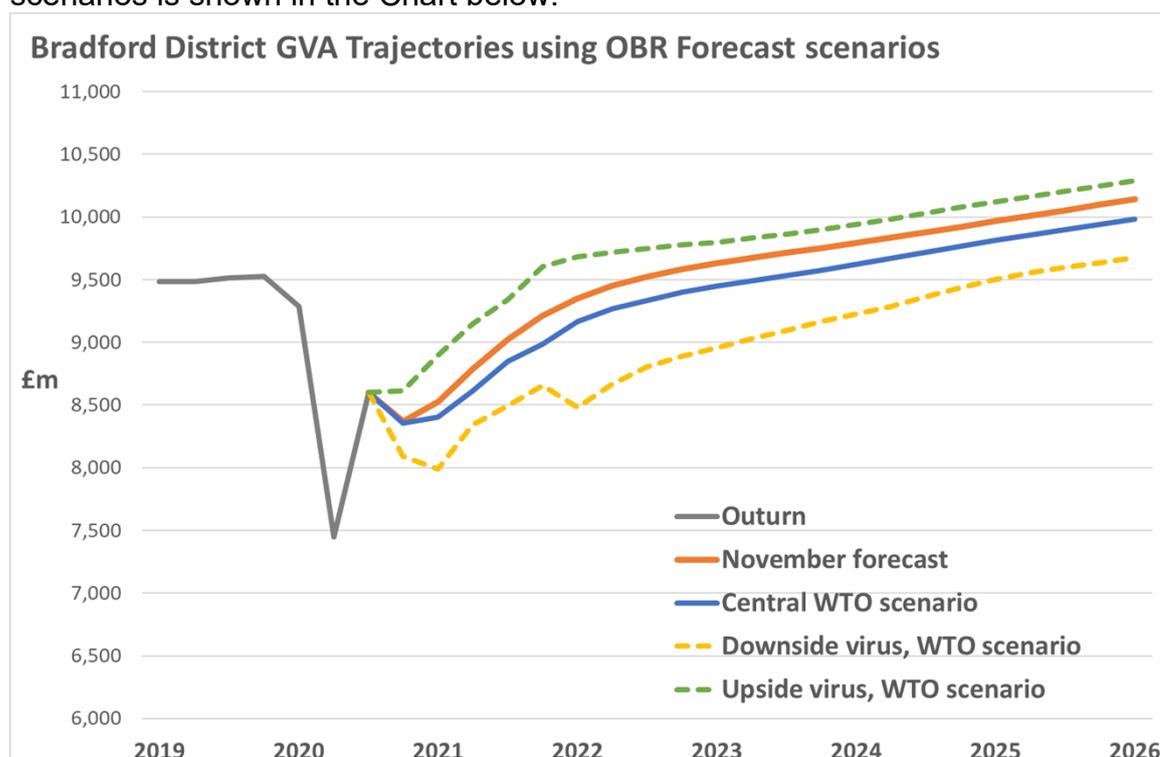

ECONOMIC IMPACTS OF COVID-19

- 2.1 As the full implications of COVID-19 become clearer, we can see that the impact on the district and our economy has been severe. At the time of writing in December 2020, we have already seen a number of measurable impacts across the district including:
- The Covid-19 pandemic has caused the deepest recession on record. The Office for Budget Responsibility's (OBR's) forecast expects GDP to shrink by 11.3 per cent in 2020 – the largest contraction in the economy for over 300 years. Applied to the current Bradford GVA figure of £9.482 billion, this equates to a projected figure of £8.411 billion in 2020, a fall of £1.07 billion.
 - Unemployment has risen sharply and will continue to rise as businesses make redundancies as the Job Retention Scheme winds down. Compared to the pre-lockdown figures of March, the October Claimant Count figure for the district shows an increase from 17,090 to 31,085 people - a rise of 82% over the period.
 - Youth Claimant Count unemployment has risen by 91% since March and the pattern of previous recessions shows that unemployment has a greater negative impact for young people, particularly in BAME communities and communities where there have been high levels of long term unemployment and deprivation. Bradford District's youth claimant count rate is the second highest of any city in the country.
 - Going forward national forecasts indicate we are likely to see further large increases in unemployment when the furlough scheme ends in March 2021 and the full impacts on the most affected sectors such as hospitality, retail and leisure are seen in a rise in business failures in the new year.
 - OBR forecasts UK unemployment will rise to 7.5% in 2021 - 2.6m people. This would equate to a Bradford rate of 10.4% which would mean around 25,000 unemployed residents compared to the current figure of 12,900. This would take unemployment close to the highest levels seen following the 2008 financial crash which peaked at 27,400 or 11.1% in September 2013.

- A third of the district workforce were furloughed through the Government’s Job Retention Scheme at the height of the summer lockdown. Figures for May indicated 58,000 employments out of an eligible 212,000 employments in the District were furloughed. More recently that figure has fallen significantly but as of August there were still 16,600 employments in furlough.
- Retail, manufacturing and hospitality have been most affected and are most at risk from redundancies with 12,800 retail employees furloughed at the height of the lockdown – 40% of all employees in the sector, 10,700 manufacturing employees– 40% of all employees and 8,800 hospitality employees – 73% of all employees.
- Figures for October show 18,200 self-employed residents have applied for support from the second Self Employed Income Support Scheme which is 74% of those eligible and is higher than the UK figure of 69%.
- Banksearch data for new business bank accounts used as a measure of business starts fell sharply in April but have since recovered and overall business start-ups during the nine months to September 2020 were up on the corresponding period in 2019.
- Job posting data suggests that job vacancies have fallen by 25% during the pandemic.
- We have seen huge declines in city and town centre footfall, in line with national and regional trends. At the height of the lockdown footfall in Bradford City dropped to 20% normal levels with a similar picture in our town centres.

2.2 Modelling commissioned by the West Yorkshire Economic Recovery Board demonstrates the significant impact this crisis will have on businesses and communities. Even in the event of a relatively strong recovery, the District economy is still set to contract by up to 10% in 2020 - in line with latest OBR forecasts.

The UK economy is expected to grow by 5.5% next year, then 6.6%, then 2.3%, then 1.7% and then 1.8%. This means it will be the end of 2022 before UK GDP recovers to pre-Covid levels. The impact on Bradford GVA of the main OBR scenarios is shown in the Chart below.

3. DEVELOPING OUR APPROACH TO RECOVERY

- 3.1 The ambition that was set out in the Economic Strategy, Pioneering, Confident and Connected for 2018-30 - to grow our economy, get more people into work, and improve the skills of our residents – is now more important than ever. Working with PwC, the Bradford Economic Recovery Board have drafted a Bradford Economic Recovery Plan that sets out the actions we need to take now and over the next two years to accelerate our recovery from Covid-19 by sustaining employment and boosting productivity whilst continuing to build a more inclusive, sustainable and resilient economy for the subsequent period.
- 3.2 The current economic strategy is focused on unlocking the growth potential of four key opportunities;
- Our young and enterprising population: ensuring all our people are equipped with the skills and confidence to succeed.
 - Our distinctive offer: using our unique architecture, heritage and cultural assets to create compelling investment propositions and an environment for growth.
 - Our growth potential: building on our business and sector strengths to drive innovation, increase productivity and create wealth.
 - Our globally connected district: improving our transport infrastructure and digital connectivity to strengthen our global trading links and access new markets.
- 3.3 Before the Covid-19 pandemic, we had begun to deliver on this ambition: employment had increased by 10,700 between 2017/18 and 2019/20, median weekly earnings had increased from £489 to £537 and we were working to strengthen the District's position in the global economy. We attracted interest and inward investment from national names including PwC, NEC and Channel 4 and we were ranked by Barclays as the best place to start a business and featured in The Sunday Times as one of the top cities for growth
- 3.4 The Bradford District Economic Recovery Board have reviewed our 2018 Economic Strategy in the light of the impacts and challenges of the pandemic and key megatrends that will shape the economy in the future.
- 3.5 The partnership support the aim for Bradford District to become the UK's fastest growing economy, performing above the national average on key metrics of economic performance. The complex challenges of the Covid-19 pandemic only serve to make it more important than ever to deliver on these opportunities for the district but also to reflect them in our Recovery Plan.
- 3.6 The development of the Economic Recovery Plan has been directed by the Bradford District Economic Recovery Board. The Board is a partnership, chaired by Professor Zahir Irani, Deputy Vice Chancellor, University of Bradford with membership from across the business community, public sector partners, education and voluntary sectors.

4. BRADFORD ECONOMIC RECOVERY PLAN FRAMEWORK

- 4.1 The Economic Recovery Plan proposes a series of actions to take now and over the next two years to accelerate our recovery from Covid-19 by sustaining employment and boosting productivity whilst continuing to build a more inclusive, sustainable and resilient economy for the subsequent period.

- 4.2 The plan is informed by what we already know of the district – its challenges, significant assets and unfulfilled potential – the known impact of Covid-19, what we can reasonably assume about the future, by the opportunities afforded through regional devolution and by our ambitions to deliver inclusive and sustainable economic growth to which more people can contribute and benefit from.
- 4.3 The plan is also aligned to the priorities outlined in the wider West Yorkshire Economic Recovery plan.
- 4.4 **Our Ambition** - Despite the unforeseen impact of Covid-19, our long-term ambition for Bradford’s economy in 2030 remains unchanged. Our aim is still to grow skills, jobs, productivity and earnings so that Bradford is the UK’s fastest growing economy and we are performing above the national average. This means;
- Increasing the value of Bradford’s economy faster than the UK average
 - Getting more people into work to bring employment rates closer to UK rates; and
 - Improving the skills of residents to close the gap to UK levels.
- 4.4 To achieve that, our Economic Recovery Plan needs to respond both to endemic local challenges and to emerging “megatrends” that can accentuate such challenges as set out in the table below.

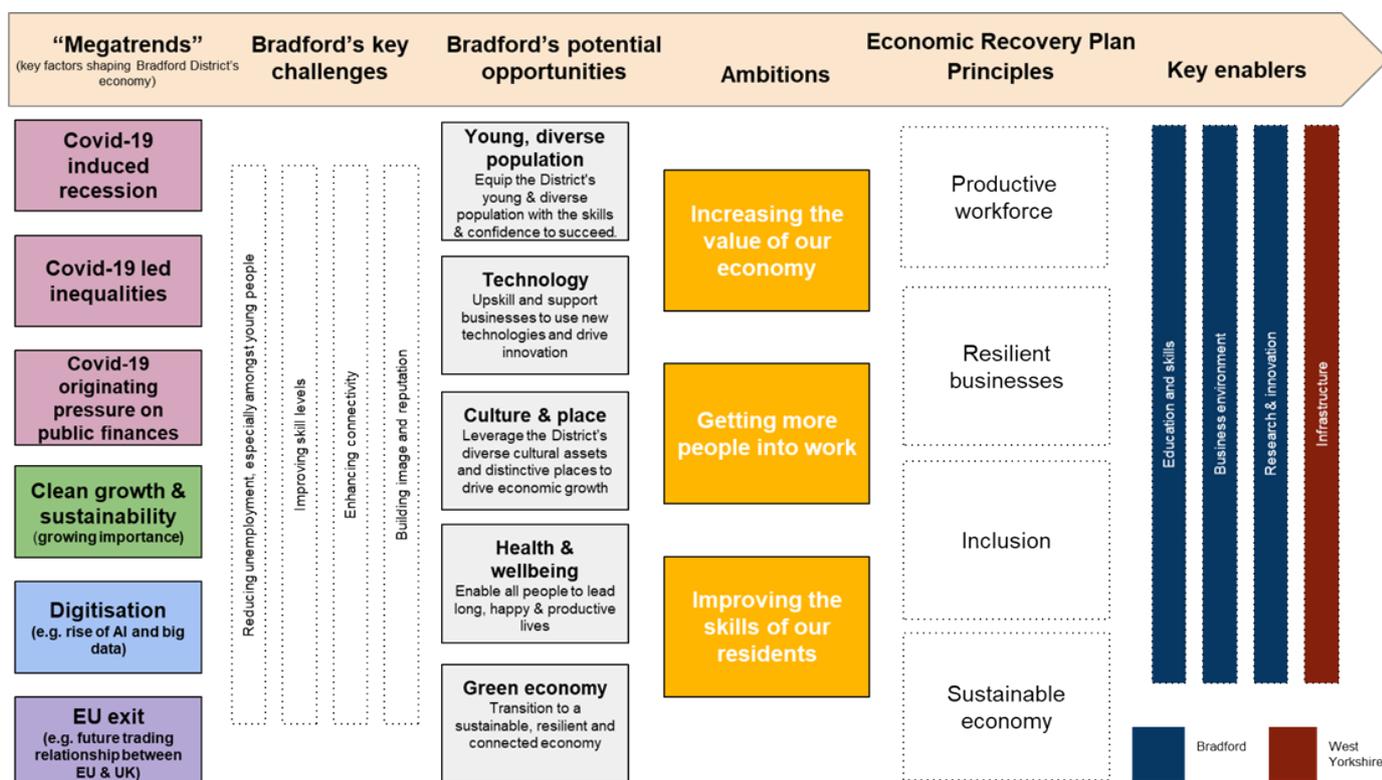

Key Megatrends	Key Local Challenges
<ul style="list-style-type: none"> • The effects of the sustained economic fallout from Covid-19; • The rise in inequalities that Covid-19 has provoked; • The increased pressure on public finances; • The UK’s exit from the EU; • Faster growth of the digital economy; • The emergence of the green economy. 	<ul style="list-style-type: none"> • A rapid rise in unemployment amongst young people; • A sustained gap in skills; • Poor connectivity; and • Building our image and reputation.

- 4.5 The plan also identifies five areas of opportunity for Bradford, some of which will be made possible by the acceleration of a ‘new economy’ based on developments in the application of digital technology, commitments to decarbonisation and the growth of more purpose-driven businesses. These areas of opportunity are:
- Equipping our **young, diverse population** with the skills and confidence they will need to succeed in our evolving economic environment in sectors where Bradford has the best growth potential;
 - Supporting businesses to adapt to and exploit developments in **technology** by upskilling and supporting businesses to use new technologies and drive innovation;
 - Leveraging Bradford’s diverse **cultural assets and distinctive places** to drive economic growth;
 - Accelerating the development of Bradford’s **green economy** by transitioning to a sustainable, resilient and connected economy; and
 - Promoting and enabling better **health & wellbeing** by enabling all people to lead long, happy & productive lives.

4.6 To realise the opportunities and overcome the challenges, our Recovery Plan is based on actions spread across four key enablers:

- Education and Skills – enabling residents to access employment and support jobs growth across the district
- Business Environment – encouraging business start-ups and attracting new businesses and investment
- Research and Innovation – promoting growth through strong collaborations across academia (notably University of Bradford), industry and government
- Infrastructure – improving the quality of our physical and digital infrastructure

4.7 The figure below summarises the framework used to shape the Economic Recovery Plan.

5. BRADFORD DISTRICT ECONOMIC RECOVERY PLAN DELIVERY

5.1 Key Interventions

Our planned interventions fall into three broad categories:

- Those that we will undertake with the support of our partners across Bradford District: in some cases, this will involve building on our existing initiatives but in others it will involve new interventions;
- Those where we want to work with partners in the region, notably the West Yorkshire Combined Authority and the Leeds City Region Local Enterprise Partnership to pursue our mutual goals: together, this partnership working can bring new investment to the District and greater local influence on how and where resources are spent; and
- Those where we want to work with the Government to seize the immediate opportunities to boost skills, employment and productivity and so contribute to 'levelling up' the national economy as well as contributing to its other priorities, for example achievement of Net Zero.

5.2 Priorities

Building on the extensive array of existing activity taking place in the District, our proposed priorities for the key areas of opportunity are summarised in table below:

Category	Intervention	Alignment to opportunities	Overview
Immediate asks	Make Bradford a Learning District	Young, diverse population	Leverage Bradford's Skills House to mobilise resources in every sector to promote inclusive learning, from basic to higher education
	Access to Work	Young, diverse population	Support residents find job opportunities and develop their skills to make them more employable and the economy more resilient
	Inspire, Reskill and Upskill	Young, diverse population	Use the SkillsHouse partnership to develop vocational provision, including higher level skills with a cohesive offer for employers, the self-employed and the unemployed
	Neighbourhood retrofit	Green economy	Build on existing plans in the District to retrofit individual homes and public buildings and develop the concept and strategy for creating '15-minute neighbourhoods' retrofitted to enable sustainable living
	Building Bradford's image	Cross-cutting	Provide a unifying positive image for Bradford as a place to live, work and play which can be communicated to communities inside and outside the District as its leaders promote the many opportunities Bradford District has to offer
	Bradford District business hub	Cross-cutting	Simplify business support provision and provide an impartial central resource, support and guidance for entrepreneurs and new start-ups by establishing a single body of experts working under one banner to help businesses navigate/co-ordinate business support
	'Culture is Our Plan'	Culture and place	Build on Bradford's City of Culture bid to implement our 10-year cultural strategy for the District to attract investment and act as a lever for multiple District-wide interventions
	Building an inclusive health and care economy	Health and wellbeing	Build an inclusive health and care economy through the effective collaboration between key partners such as the NHS, the University of Bradford and the Wolfson Centre for Applied Health Research, based on the development of a highly effective and compassionate integrated workforce based on a world class medical school, health and care learning infrastructure
	Act Early North	Health and wellbeing	Make the case for a new research centre in Bradford Institute of Health Research focusing on preventative health policy and early years measures to help create research jobs and attract wider investment to the District
	Northern Powerhouse Rail	Cross-cutting	Secure commitment to a new Bradford city centre station on the new Northern Powerhouse Rail (NPR) line
Aspirational	Sustainable food supply system	Green economy	Build on the District's existing assets and activity to develop a sustainable food supply system and build the District's reputation as a sustainable food hub
	Supply chain for hydrogen light goods vehicles (LGVs)	Green economy	Position the District's automotive businesses to win opportunities in the fuel cell electric vehicles supply-chain through having a UK 'test-bed' fleet of hydrogen light goods vehicles
	Circular economy demonstrator	Green economy	Position the District as a UK exemplar of the circular economy and encourage local businesses to invest in reprocessing of recycled or bi-product materials
	Greening the District	Culture and place	Develop new green spaces, including a new green park in the city centre
	Heritage Action Zone	Culture and place	Assess the potential for designating Little German as a Heritage Action Zone to support the needs of the cultural and creative sector by utilising vacant space and improving the visitor and citizen experience

6. NEXT STEPS

- 6.1 We believe that the current economic crisis can be turned to our advantage. By supporting change in the economy and encouraging new ways of working, we have a narrow, but real, opportunity to position Bradford better and deliver greater wellbeing for all.
- 6.2 Our ability to do this is helped by the big change in political attitudes we have seen since Covid-19. Bolder economic and social strategies are gaining force in policy debates around the world. The pandemic is the chance to reset our economy to create a healthier, more equitable, and more sustainable future. We need to use all the levers at our disposal, including taking advantage of devolution and the levelling-up agenda.
- 6.3 We have responded with speed and agility during the crisis to ensure our communities and businesses are supported through this difficult unprecedented time. We are already taking forward some immediate actions that our approach identifies, and our Council Plan (2021-25) commits us to a number of new initiatives. Other actions will require collective action across the district, working collaboratively with the mayoral West Yorkshire Combined Authority to leverage support and funding and making the case for additional support from Government.
- 6.4 Bradford Economic Partnership will oversee the next steps for this work and use this Economic Recovery Plan to inform the District's approach to economic recovery. The Economic Partnership will consider how we support economic recovery across the whole district. This work will be convened by a new chair as Dave Baldwin stood down from his chair role of the Economic Partnership in summer 2020. The process to replace his role is currently underway.
- 6.5 Where the actions fall under the remit of wider partnership boards, such as the skills plan and the culture strategy– these elements of the recovery plan will be progressed by these partnership boards. The economic recovery work will also be fed into the process for the Shipley and Keighley Towns Fund Boards to support recovery for these parts of our district.

7. FINANCIAL & RESOURCE APPRAISAL

- 7.1 The interventions in the Economic Recovery Plan will be for the partnership, including the Council to consider the delivery of. Many of the interventions are for the private sector and wider partners to support. The financial impact of actions arising from the Economic Recovery Plan will be considered at a future Executive meeting as required.

8. RISK MANAGEMENT AND GOVERNANCE ISSUES

- 8.1 It is intended that delivery of Economic Recovery Plan will be overseen by the Economic Partnership Board, part of the wider Health and Wellbeing board structure.

9. LEGAL APPRAISAL

- 9.1 The Economic Recovery Plan has been prepared under the Local Authority's General Power of Competence as provided in the Localism Act 2011, Section 1.

- 9.2 While there is no statutory duty on Local Authorities to produce an economic plan they are free to determine the breadth and depth of assessments of the economic condition of their area, ensuring a reflection of local priorities.
- 9.3 The agreement and implementation of the Economic Recovery Plan will require further decisions in due course and the legal implications of the specific proposals being recommended will need to be considered at that time

10. OTHER IMPLICATIONS

10.1 EQUALITY & DIVERSITY

- 10.1.1 Inclusion is one of the key principles of the Economic Recovery Plan with a commitment to an economy that everyone can contribute to and benefit from.

There is significant evidence that the COVID pandemic has had a greater economic impact on those with protected characteristics, who are more likely to work in the sectors most affected. This includes BAME communities, women, younger adults and people on low incomes in more insecure work. In line with the District Economic Strategy, the recovery plan aims to drive actions that specifically target under-represented groups and specific areas of deprivation. It will also address underlying historical labour market disparities and improve workforce diversity ensuring greater economic participation and opportunity.

- 10.1.2 If required, equality impact assessments will be considered as part of the delivery framework.

10.2 SUSTAINABILITY IMPLICATIONS

- 10.2.1 Sustainability is a key principle underpinning the Economic Recovery Plan approach which aims to achieve sustainable and long term economic growth through relevant interventions and investment. This includes consideration of sustainable use of resources, innovation approaches to best use of assets and resources. This will be supported by a focus on green jobs and enabling a more circular economy.

10.3 GREENHOUSE GAS EMISSIONS IMPACTS

- 10.3.1 Our recovery plan will align with our commitment to meet the Leeds City Region target of zero carbon emissions by 2038. Developing the Green economy is a key focus of the recovery plan.

10.4 COMMUNITY SAFETY IMPLICATIONS

- 10.4.1 Ensuring equality of access to economic opportunity and promoting local economic development will address deprivation that underpins the geographic disparities across the district and create a fairer district.

10.5 HUMAN RIGHTS ACT

None

10.6 TRADE UNION

None

10.7 WARD IMPLICATIONS

The recovery plan will take a district wide approach which focuses on understanding and supporting the economic role of all communities and wards across Bradford.

10.8 IMPLICATIONS FOR CORPORATE PARENTING

There are no issues in relation to corporate parenting.

10.9 ISSUES ARISING FROM PRIVACY IMPACT ASSESMENT

There are no impacts arising from this report on data protection and information security matters.

11. NOT FOR PUBLICATION DOCUMENTS

None

12. RECOMMENDATIONS

It is recommended that:

- The Regeneration and Environment Overview and Scrutiny Committee would like to thank Professor Zahir Irani and the Economic Recovery Board members for their valuable contribution to this crucial area of work
- The Committee note and comment on the approach to Economic Recovery outlined in this report and the accompanying Bradford District Economic Recovery Plan.

Foreword

Covid-19 has had a profound, adverse impact on Bradford District: it has led to loss of life, loss of liberty, a shrinking economy and greater inequality. Looking to the future, it threatens the livelihoods of many of our residents, with further challenges yet to come as the UK exits from the European Union.

Now, more than ever, we need to take steps to initiate a dynamic economic recovery that is right for Bradford. The Bradford Economic Recovery Board - a diverse and inclusive group of Council and business leaders, partner organisations and key stakeholders – was established to develop our Economic Recovery Plan.

Based on stress testing our existing Economic Strategy, we have identified key actions we need to take over the next two years to recover our pre-Covid-19 economic progress whilst continuing to build a more inclusive, sustainable and resilient economy. We have also outlined key steps we may need if we are to fulfil our ambitions subsequently: 'Building a Better Future' (Years 2-4) and 'Thriving & Resilient' (Year 5+).

Our aim is to be bold. We want to transform the District to create the conditions in which our businesses can become more competitive and we can tackle inequality by promoting and celebrating equality, diversity and inclusion. We must help our young talent to develop and prosper whilst recognising the powerful, positive link between a healthy population and a strong, sustainable economy.

We have focused on how business can be supported, how skills can be developed, how our diverse cultures and local assets can be leveraged so that we can take advantage of the opportunities presented by the growth of the digital and green economies. We want to make sure that business can develop and apply new ideas to bring value to the District.

Just as the development of this Plan has been a collaborative process, so its delivery will need everybody in the District to work together. We will play our part, but we also want to leverage support from the private sector and other stakeholders. We will also need additional support and resources from outside the district from the West Yorkshire Combined Authority and the Government if we are to achieve our ambitions.

Professor Zahir Irani, Deputy Vice-Chancellor, University of Bradford – Chair of Bradford Economic Recovery Board

Executive summary

Bradford District is home to a young, enterprising and creative population and strong and productive businesses. It can also boast to be one of the most multicultural and diverse places in the UK.

Our Economic Strategy developed in 2018 set out the District's ambition "to grow our economy, get more people into work, and improve the skills of our residents".

Covid-19 has, however, had a severe adverse effect on our economic performance. UK GVA is expected to contract by approximately 11.3% in 2020 and, at 9.4%, the unemployment rate (as measured by the claimant count) in Bradford District in October 2020 was 4.3 percentage points higher than in March 2020, making it the fourth highest in the country. The claimant rate amongst young people aged 16-24 (11.4%) is among the highest in the country and rose faster than the overall claimant rate. This has worsened youth unemployment everywhere in the District, especially in hotspots such as Manningham, Tong and Keighley Central wards. People from Black, Asian and minority ethnic (BAME) communities have been disproportionately affected by the health impacts of the pandemic and are also more likely to work in jobs and sectors most affected. This has exacerbated the economic inequalities across the District.

These impacts have undermined progress towards our ambition for the District and exposed and amplified many of our longstanding challenges such as high youth unemployment and low social mobility. Moreover, Covid-19 has the potential to leave long lasting 'scars' on our economy if the potential of our people is lost due to increasing spells of unemployment and investments and innovation are deferred. Our immediate prospects depend on controlling the pandemic, responding effectively and addressing the effects of the UK's exit from the European Union (EU) and leveraging the opportunities from devolution.

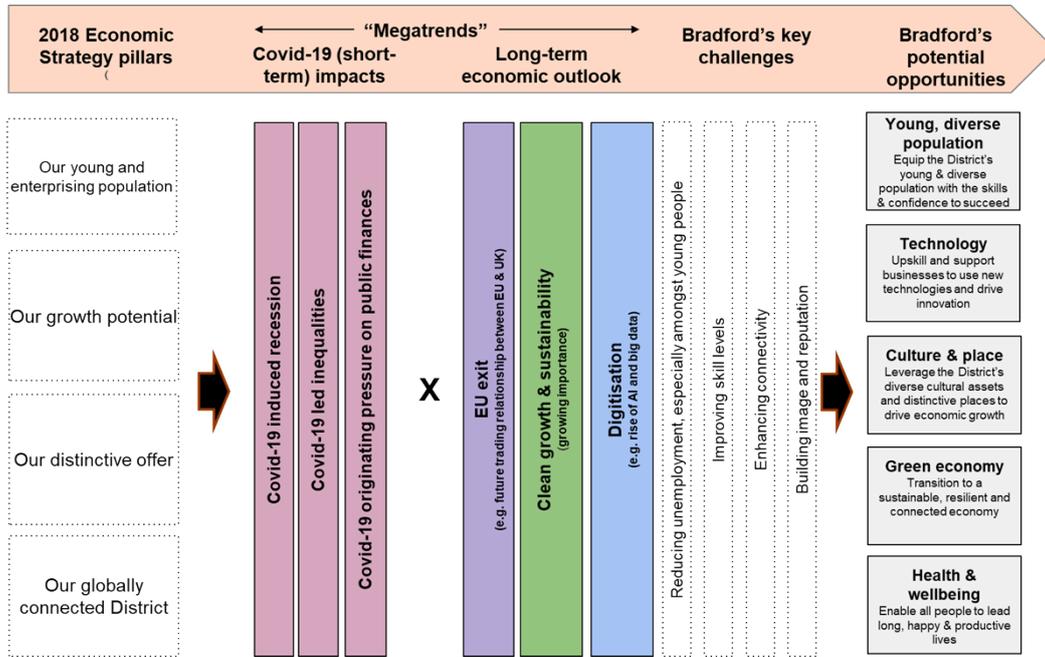

Our Economic Recovery Plan

This Economic Recovery Plan sets out the actions we need to take now and over the next two years to accelerate our recovery from Covid-19, by sustaining employment and boosting productivity whilst continuing to build a more *inclusive, sustainable and resilient* economy for the subsequent period.

Our overall aim is still for Bradford District to become the UK's fastest growing economy, performing above the national average on key metrics of economic performance. To achieve that, our Economic Recovery Plan needs to respond both to local challenges and to emerging "megatrends" that can accentuate such challenges but also bring new opportunities.

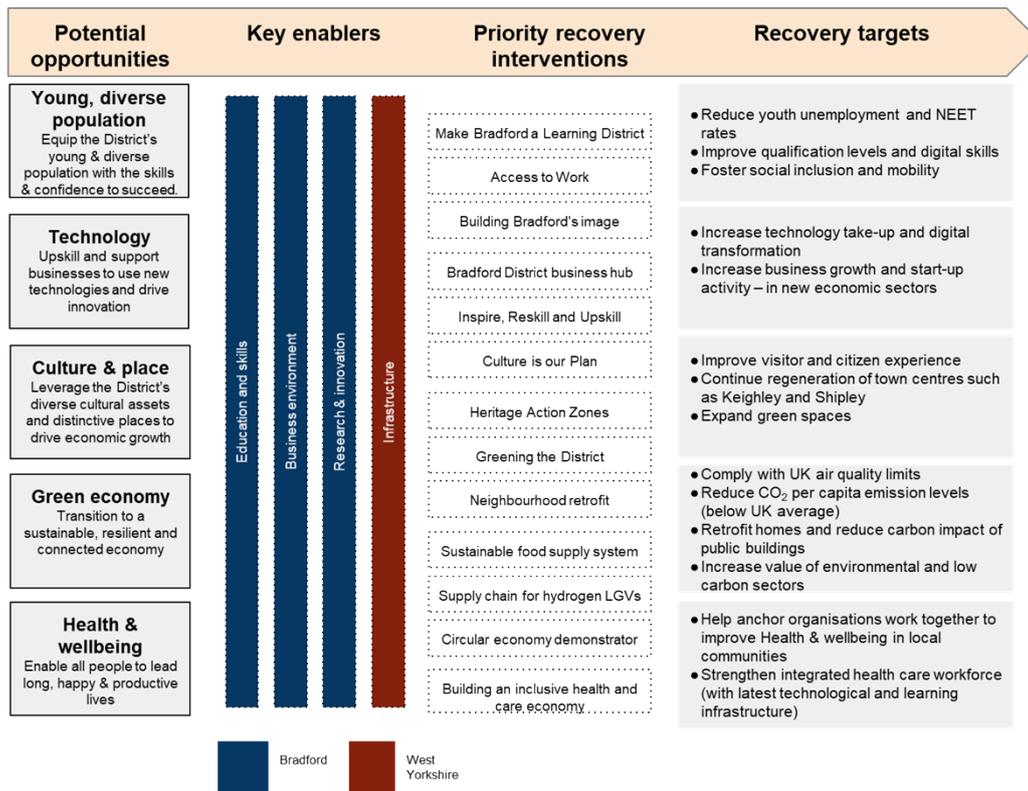

We have reviewed our 2018 Economic Strategy in the light of these megatrends and challenges, identifying key new areas of opportunity for Bradford District (see Figure 1), some of which made possible by the acceleration of a 'new economy' based on developments in the application of digital technology, commitments to decarbonisation and the growth of more purpose-driven businesses, with a reduced environmental footprint and more concern for their social impact.

Figure 1: Revisiting Bradford District's opportunities

Based on our current strengths as a District, we set key recovery targets, whose attainment will be initiated in the next two years via selected priority recovery interventions (see Figure 2). Full completion of targets needs a long-term follow up of key areas of action.

Figure 2: Capitalising on Bradford's opportunities

To realise the opportunities and overcome the challenges, our Recovery Plan is based on actions spread across four broad areas:

- **Education and skills:** will raise skill levels, including developing new skills, enabling more citizens to enter the labour market and fill vacancies and / or transition to jobs in growth sectors requiring these new skills. In addition, strengthening the skills base can generate employment in new, growing sectors such as technology, the green economy, culture and health.
- **Business environment:** will capitalise on the strong culture of entrepreneurship we have in the District by promoting and facilitating access to support and resources for new start-ups and growth businesses. This will encourage new

business creation locally and the attraction of businesses to the area - also facilitating regeneration across the District.

- *Research and innovation*: will allow us to pursue our ambitions, especially those related to digital technology, health and the green economy, particularly via strong collaborations across academia (notably the University of Bradford), business and the public sector.
- *Infrastructure*: will be the backbone of our recovery and long-term productivity by improving the quality and accessibility of our digital infrastructure (e.g. broadband coverage and 5G) and our physical infrastructure. The latter is key to boosting regeneration of our towns as well as aligning with our ambitions for a green recovery based on sustainable transport and city-centre green spaces.

Structuring our priorities - key interventions

To achieve these objectives, the interventions we propose use all the levers at our disposal and align to national objectives such as devolution and the levelling-up agenda. Our planned interventions fall into three broad categories:

- Those that we will undertake with the support of our partners across Bradford District;
- Those where we want to work with partners in the region, notably the West Yorkshire Combined Authority and the Leeds City Region Local Enterprise Partnership; and
- Those where we want to work with the Government to seize the immediate opportunities to boost skills, employment and productivity and so contribute to 'levelling up' the national economy as well as contributing to its other priorities, for example achievement of Net Zero.

Building on the extensive array of existing activity that is taking place in the District, we have organised our priorities against each of the key opportunities, and divided them into two categories:

- **Immediate asks** - interventions which are well-developed and can be delivered in the next two years; and
- **Aspirational** - interventions which require further development and are for delivery in the longer term.

Category	Intervention	Alignment to opportunities	Overview
Immediate asks	Make Bradford a Learning District	Young, diverse population	Leverage Bradford's Skills House to mobilise resources in every sector to promote inclusive learning, from basic to higher education
	Access to Work	Young, diverse population	Support residents find job opportunities and develop their skills to make them more employable and the economy more resilient
	Inspire, Reskill and Upskill	Young, diverse population	Use the SkillsHouse partnership to develop vocational provision, including higher level skills with a cohesive offer for employers, the self-employed and the unemployed
	Neighbourhood retrofit	Green economy	Build on existing plans in the District to retrofit individual homes and public buildings and develop the concept and strategy for creating '15-minute neighbourhoods' retrofitted to enable sustainable living
	Building Bradford's image	Cross-cutting	Provide a unifying positive image for Bradford as a place to live, work and play which can be communicated to communities inside and outside the District as its leaders promote the many opportunities Bradford District has to offer
	Bradford District business hub	Cross-cutting	Simplify business support provision and provide an impartial central resource, support and guidance for entrepreneurs and new start-ups by establishing a single body of experts working under one banner to help businesses navigate/co-ordinate business support
	'Culture is Our Plan'	Culture and place	Build on Bradford's City of Culture bid to implement our 10-year cultural strategy for the District to attract investment and act as a lever for multiple District-wide interventions
	Building an inclusive health and care economy	Health and wellbeing	Build an inclusive health and care economy through the effective collaboration between key partners such as the NHS, the University of Bradford and the Wolfson Centre for Applied Health Research, based on the development of a highly effective and compassionate integrated workforce based on a world class medical school, health and care learning infrastructure
	Act Early North	Health and wellbeing	Make the case for a new research centre in Bradford Institute of Health Research focusing on preventative health policy and early years measures to help create research jobs and attract wider investment to the District
	Northern Powerhouse Rail	Cross-cutting	Secure commitment to a new Bradford city centre station on the new Northern Powerhouse Rail (NPR) line
Aspirational	Sustainable food supply system	Green economy	Build on the District's existing assets and activity to develop a sustainable food supply system and build the District's reputation as a sustainable food hub
	Supply chain for hydrogen light goods vehicles (LGVs)	Green economy	Position the District's automotive businesses to win opportunities in the fuel cell electric vehicles supply-chain through having a UK 'test-bed' fleet of hydrogen light goods vehicles
	Circular economy demonstrator	Green economy	Position the District as a UK exemplar of the circular economy and encourage local businesses to invest in reprocessing of recycled or bi-product materials
	Greening the District	Culture and place	Develop new green spaces, including a new green park in the city centre

Category	Intervention	Alignment to opportunities	Overview
	Heritage Action Zone	Culture and place	Assess the potential for designating Little German as a Heritage Action Zone to support the needs of the cultural and creative sector by utilising vacant space and improving the visitor and citizen experience

Introduction

Bradford District's economic ambition

Bradford District is located at the centre of the Northern Powerhouse. It is a beautiful place, with a stunning architectural heritage and countryside. It is also home to young, enterprising and creative people and strong and productive businesses. It is one of the most multicultural and diverse areas in the UK, as well as being globally connected by businesses trading across the world and families.

In 2018, recognising that the next decade would be crucial for the economy, our Economic Strategy set out the District's ambition "to grow our economy, get more people into work, and improve the skills of our residents". Specifically, our aim was to:

- Be the UK's fastest growing economy;
- Increase the value of Bradford District's economy by £4 billion to £14 billion;
- Get 20,000 more people into work; and
- Improve the skills of 48,000 residents.

Before the Covid-19 pandemic, we had begun to deliver on this ambition: employment had increased by 10,700 between 2017/18 and 2019/20¹, median weekly earnings had increased from £489 to £537² and we were working to strengthen the District's position in the global economy. We attracted interest and inward investment from national names including PwC, NEC and Channel 4 and we were ranked by Barclays as the best place to start a business and featured in The Sunday Times as one of the top cities for growth³.

Like the rest of the UK, Covid-19 has had a severe adverse effect on our economic performance and the way the economy is working. The scale and nature of the changes have undermined our progress, exposed and amplified many of our longstanding challenges as well as bringing new opportunities and challenges. Behind the headline statistics are personal hardships and tragedies. We have seen the loss of good businesses and many more are struggling to survive. There has been a sharp increase in the level of unemployment, particularly amongst younger people and those in our most disadvantaged communities. We owe it to our businesses and communities as well as future generations to act and forge a great long term economic future for the District.

Our immediate prospects are, at best, uncertain; they depend on how the pandemic is controlled and how we respond collectively to it. They are also influenced by other factors, notably the effect of the UK's exit from the European Union (EU). This makes it even more important that we find ways to mitigate the risks whilst continuing to deliver on our long-term ambitions for the District, but to do so we need to revisit our approach and priorities. The Bradford Economic Recovery Board (BERB) - a diverse and inclusive group of Council and business leaders, partner organisations and key stakeholders chaired by a senior academic from the University of Bradford - has been established to produce this Economic Recovery Plan for the District.

Purpose of this Economic Recovery Plan

The primary purpose of our Economic Recovery Plan is to stress test our Economic Strategy to take account of the profound changes in the public health and economic context and set out the actions we need to take now and over the next two years to recover our pre-Covid-19 economic progress whilst building a more inclusive, sustainable and resilient economy. As such, it is intended to build on the steps the Council has already taken - in conjunction with others - to relieve some of the immediate impacts of Covid-19. This Economic Recovery Plan also outlines some of the actions that should be considered in the medium and longer term to fulfil our ambitions in the next subsequent phases: 'Building a Better Future' (Years 2-4) and 'Thriving & Resilient' (Year 5+). We expect to develop our longer-term plan when we iterate our Economic Strategy in 2022. By developing this Economic Recovery Plan, we want to inspire collaborative action and leverage support from the private sector and other stakeholders and establish a clear business case for further government investment.

Our Economic Recovery Plan is set out in three further sections:

- We summarise our assessment of the implications of Covid-19 and other changes we have seen and expect to see for Bradford's economic opportunities and challenges and, hence, for our economic priorities;

¹ Office for national Statistics, Annual Population Survey, People in employment, October 2017-September 2018 compared to July 2019-June 2020

² Office for National Statistics, Annual Survey of Hours and Earnings, Median gross weekly income (resident analysis), 2018 to 2020

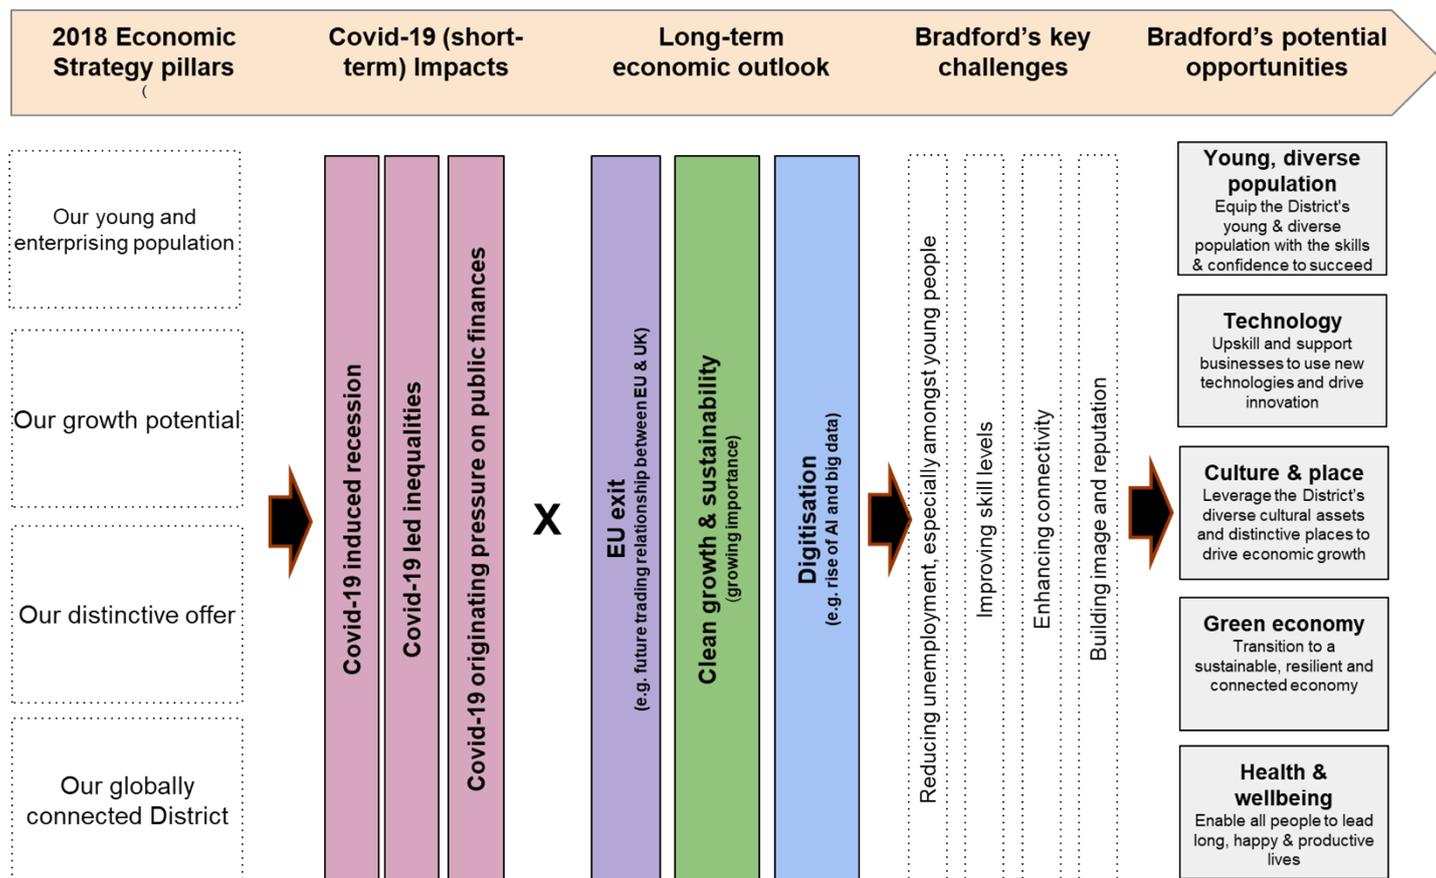

³ Sunday Times, 'Best Places for Business 2020', 9 February 2020

- We describe our response to these opportunities and challenges, setting out the vision and guiding principles underlying our approach, describing the enabling steps we want to take and articulating the impact we want to achieve. In developing our response, we have been determined to align our Economic Recovery Plan with other existing and anticipated strategies and plans, in particular those of the Government and the West Yorkshire Combined Authority (WYCA) Economic Recovery Plan.
- We set out how we will implement and deliver our Economic Recovery Plan, focusing on the 15 interventions that we see as critical to its success in the next two years and beyond.

How Bradford District's opportunities and challenges are being reshaped

Our first task in developing the Economic Recovery Plan has been to assess how far our existing Economic Strategy will enable us to address the actual and expected impacts of Covid-19 and the other potentially significant developments in the economic environment since our Economic Strategy was developed in 2018. In particular, we have considered the potential impact of the UK's exit from the EU and the accelerated development of both the green and digital economies. Our aim has been to assess the opportunities we have as well as the challenges we face realising them. Our approach is summarised in Figure 3.

Figure 3: Approach to stress testing the Economic Strategy

Our existing Economic Strategy

Our existing Economic Strategy seeks to leverage Bradford District's three key assets: our people, our businesses and our places and communities. It focuses on unlocking opportunities arising from:

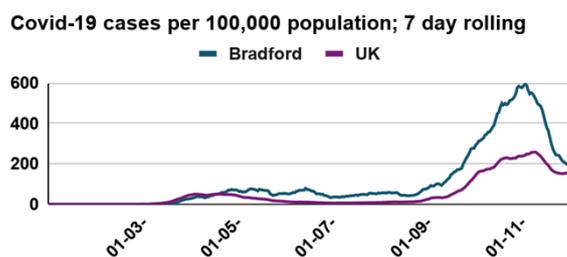

- Our young and enterprising population, ensuring that all are equipped with the skills and confidence to succeed;
- Our growth potential, building on our business and sector strengths to drive innovation, increase productivity and create wealth;
- Our distinctive offer, leveraging the District's unique architecture, heritage and cultural assets to create compelling investment propositions and provide an environment for growth; and
- Our globally connected District, by improving our transport infrastructure and digital connectivity to strengthen our international trading links and access to new markets.

Bradford District's changing economic environment

Since March 2020, Covid-19 has fundamentally altered the economic environment within which we want our long-term Economic Strategy to succeed. The outlook is for further change. Indeed, we recognise that a 'new normal' may emerge even if its precise shape is not yet certain. We want to anticipate the potential impacts rather than react to them.

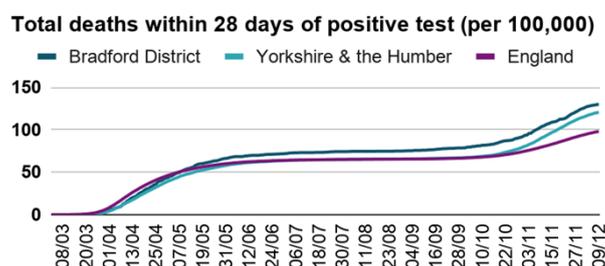

In Bradford District our rate of identified Covid-19 cases has been above the national average, being especially pronounced in September to November 2020 (see Figure 4): the rate peaked at nearly 600 identified cases per 100,000 in early November, two times the national average. Very sadly our death rate from Covid-19 has also been above the national average. As a result, the District has been subject to some of the most stringent restrictions of any area in England (see Figure 5).

The impact of Covid-19 to date

The economic impacts of the measures taken to contain the public health effects of Covid-19 have been profound since they were introduced. They have affected Bradford District's economy in five main ways:

- **Full and partial lockdowns** have led to the closure of many businesses in March 2020 resulting in a sharp fall in economic output - UK Gross Domestic Product (GDP) fell by 26% between January and April 2020⁴. The accommodation and food services, other services⁵, construction and transport sectors were hardest hit. Although the economy was gradually reopened, significant parts have now been closed down again so that, in November 2020, UK GDP was still 15% lower than in January 2020⁶.
- **Supply chain disruption** - businesses have been disrupted as suppliers have temporarily paused trading due to lockdown restrictions or weak demand: in the most recent Business Impact of Covid-19 Survey (BICS) (covering 19/10/2020 - 01/11/2020) 43.7% of businesses across the UK were able to get the materials, goods or services from within the UK in the last two weeks whilst 17.5% were able to but needed to change suppliers and 6.3% were unable to - the final 32.5% of businesses replied 'not applicable' to the survey question⁷. The scale of this impact has grown with the introduction of lockdown. In the Business Impact of Covid-19 Survey (BICS) running from 06/04/2020 - 19/04/2020, 48.9% of businesses were able to get the materials, goods or services from within the UK in the last two weeks, this proportion rose to 73.9% in the BICS covering 10/08/2020 - 06/09/2020. As referenced above, this figure has fallen again in the most recent Business Impact of Covid-19 survey.
- **Labour supply reduction** - social distancing measures initially saw non-essential workers working from home for an extended period and/or workers needing to care for children or other dependents, but the adverse impact has eased as schools reopened and businesses have adapted workplaces to accommodate social distancing requirements. The

⁵ Other services include: Activities of membership organisations, repair of computers and household goods, and other personal service activities

⁶ Office for Budget Responsibility, Economic and Fiscal Outlook, November 2020

⁷ Office for National Statistics, Business Impact of Covid-19 Survey (BICS), 19/10/2020 - 01/11/2020

[<https://www.ons.gov.uk/economy/economicoutputandproductivity/output/datasets/businessimpactofcovid19surveybicsresults>]

latest evidence shows that the workplace for 23% of individuals was closed and 55% were being asked to work from home⁸. In addition, working time has been lost to sickness linked to Covid-19.

- **Uncertainty** - reduced levels of business and consumer confidence have weakened demand, especially discretionary consumer spending (as some major purchases have been deferred) and lower business investment. Despite this, at the end of October, two thirds of businesses in Yorkshire & the Humber expected to survive for the next three months (compared to the national average of 57.8%)⁹.
- **Policy response** - the Government has mitigated some of the impact of Covid-19 on the economy by spending over £280 billion since March 2020, initially supporting jobs and incomes using the Coronavirus Job Retention Scheme (CJRS), the Self-Employment Income Support Scheme (SEISS) and by providing loans, grants and tax deferrals to business. It has also provided incentives for businesses to retain staff beyond the end of the furlough scheme and new job creation and training schemes, such as the Kickstart Scheme. At the same time, the Bank of England has reduced the Bank Rate to 0.1%, made an additional £450 billion of asset purchases and increased banks' incentives to lend to small and medium sized enterprises (SMEs). Although support was reduced as restrictions were eased in summer and early autumn, it has been reintroduced during the most recent lockdown.

We have seen some substantial economic impacts:

- **GVA** in the UK is expected to contract by 11.3% in 2020¹⁰.
- Across the UK, the biggest falls in **output** were in accommodation and food services, construction and other services throughout the UK (see Figure 6)¹¹.
- **UK private consumption** is expected to fall by nearly 10% in 2020 while the household saving ratio peaked at a record high of 28% in Q2 2020 before falling back to around 7.5%¹².
- During the first lockdown, **footfall** in Bradford city centre fell to 20% of normal levels, which had a dramatic impact on many high-street businesses, although it recovered to around 60% of pre-Covid-19 levels in October 2020, before the second national lockdown. The drop in footfall in Keighley, although similar in profile, was less severe.
- **Unemployment in Bradford District** - as measured by the number of claimants - rose by 82% between March 2020, before the first lockdown, and October 2020 so that the rate (as a % of 16-64 year old residents) was 9.4% in October 2020, 4.3 percentage points higher than March 2020, making it the fourth highest in the country¹³.
- **Young people's claimant rate in Bradford District** (as a % of 16-24 year old residents) is among the highest in the country and rose faster than the overall claimant rate to 11.4% in October 2020 from 6.0% in March 2020^{14,15}. This has worsened youth unemployment everywhere in the District, but especially in hotspots such as in Manningham, Tong and Keighley Central wards.

The economic effects of Covid-19 have affected some people more than others. Across the UK, certain groups of the population have been disproportionately affected by the health impacts of the virus itself¹⁶. This includes those living in poverty, people from Black, Asian and minority ethnic (BAME) communities, those with disabilities, women, and migrants. Many of these groups have also been hit hardest economically because they are more likely to work in sectors most adversely affected, such as hospitality and retail. Moreover, with businesses less likely to hire in the face of uncertainty, young people have also been badly impacted in terms of access to employment. A recent study by the Institute for Fiscal Studies shows that many minority groups have younger populations and younger people are more likely to work in sectors that have been shut down¹⁷. Furthermore, considering those on furlough, young workers were more likely to be out of work by September 2020 than older workers (see Figure 7)¹⁸.

Figure 7: Change in employment status of those employed pre-Covid-19 (February-September 2020)

Further details of the economic impact of Covid-19 are summarised in [Appendix A](#).

The short-term economic outlook

How Bradford District's economy recovers from the shock of Covid-19 in the next two years is conditioned by the unprecedented scale of its economic impact to date and the disruption it has caused. Analysis of previous recessions since the Second World War suggests that it takes around 2½ years to reach pre-recession output levels. This recession,

¹⁶ Resolution Foundation, 'A new settlement for the low paid', June 2020

¹⁷ Institute for Fiscal Studies, 'Are some ethnic groups more vulnerable to Covid-19 than others?', May 2020

¹⁸ Resolution Foundation, 'Jobs, jobs, jobs', October 2020 [https://www.resolutionfoundation.org/publications/jobs-jobs-jobs/]

however, is a lot deeper, although there are grounds for expecting a fast recovery because of the unusual nature of its effects. Nonetheless, the effects on our local economy could be with us for many years to come unless we act now to accelerate the recovery.

It also depends on how the public health impacts of Covid-19 can be and are managed and the terms on which the UK leaves the EU, in particular the basis of the trading relationship.

Management of the public health impacts will be affected by:

- The stringency, timing and effectiveness of restrictions to control spread of Covid-19;
- The effectiveness of test, trace and isolate measures; and
- The timing of access to vaccines and their effectiveness.

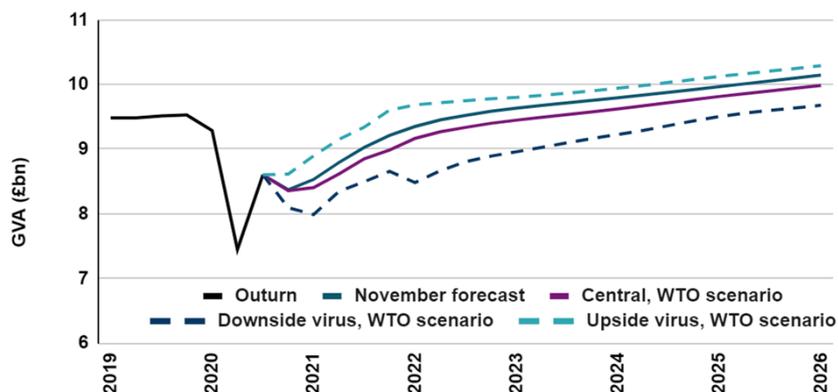

The basis on which the UK leaves the EU on 31 December 2020 was still unclear at the time our Recovery Plan was developed. Nonetheless, however the UK leaves the EU, our businesses will need to adapt to new regulations and trading relationships in the coming years.

Recent analysis by the Office for Budget Responsibility highlights the short-term implications of Covid-19 for the UK economy under three different scenarios:

- The downside scenario implies a fall in GDP of 12% in 2020 with pre-virus peak (in Q4 2019) not being reached until the end of 2024;
- The central (November) forecast envisages that GDP will fall by 11% in 2020, but will recover quickly, growing by 5.5% in 2021 and 6.6% in 2022, returning to the pre-virus peak by the end of 2022; and
- The upside scenario, where a vaccine is available in the first part of 2021, will see GDP fall by 10.6% in 2020 and grow at the same rate in 2021 (compared to 0.9% in the downside scenario)¹⁹.

Figure 8 shows projections for the GVA of Bradford District based on the OBR's forecasts for the UK economy in its latest Economic & Fiscal Outlook In November 2020.

Figure 8: Actual and projected GVA for Bradford District (2019 - 2026)

Source: OBR, CBMDC analysis

Covid-19 has the potential to leave long lasting 'scars' on the economy's capacity if:

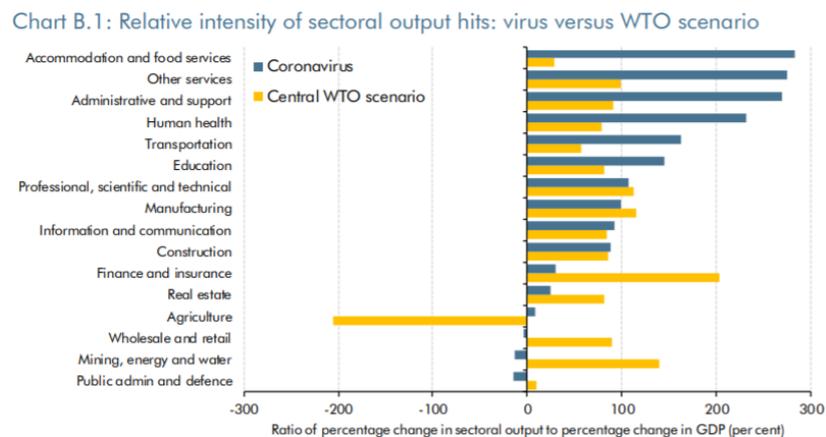

- Investment in physical capital and innovation is deferred due to the heightened uncertainty and increased debt incurred during the pandemic;
- Firm specific capital and knowledge are lost due to business failures; and
- Human capital is lost due to sustained unemployment as the economy restructures away from contact-intensive sectors, people retire earlier, and more days are lost to sickness as both employees and employers become more cautious.

The impact of the UK's exit from the EU also has the potential to drive long-term impacts on the economy. A 'no deal' exit would mean that the UK would default to World Trade Organisation (WTO) terms. Recent analysis suggests that the sectoral effects would be quite different to those of Covid-19 as Figure 9 illustrates. The most impacted sectors include manufacturing, financial services and mining and quarrying services - as outlined by the following figure. Short-term disruption would be driven by changes to administrative, policy and customs requirements. However, long-term economic

¹⁹ Office for Budget Responsibility, Economic and Fiscal Outlook, November 2020 [<https://obr.uk/efo/economic-and-fiscal-outlook-november-2020/>]

impacts would be driven by increased tariffs and wider trade barriers meaning that the UK and EU would be unable to benefit from fully leveraging their comparative advantages.

Figure 9: Relative intensity of sectoral output hits: virus versus WTO scenario

In practice, the nature and pace of Bradford District’s economic recovery will be influenced by how far local and national policy:

- Helps to prevent business failure from adversely affecting productive capacity and supports business to respond to new market opportunities: this will depend, in part, on the generosity (i.e. duration and coverage) of existing and planned support schemes for business;
- Mitigates the effects of potential sustained disruption to supply chains;
- Maintains real wages and prevents workers from leaving the labour market (e.g. potentially because of a long-lasting crisis); and
- Creates financial stability, for example if corporate and household insolvencies spill over into the financial sector leading to a slow down in bank lending and an adverse impact on growth.

Further details of the forecasts we have reviewed are summarised in [Appendix B](#).

The longer-term forces shaping a “new normal”

Both our Economic Recovery Plan and our refresh of the Economic Strategy also need to consider the potential longer term implications for Bradford District of Covid-19 and the UK’s exit from the EU as well as the other forces for change that seem likely to continue to affect our economy.

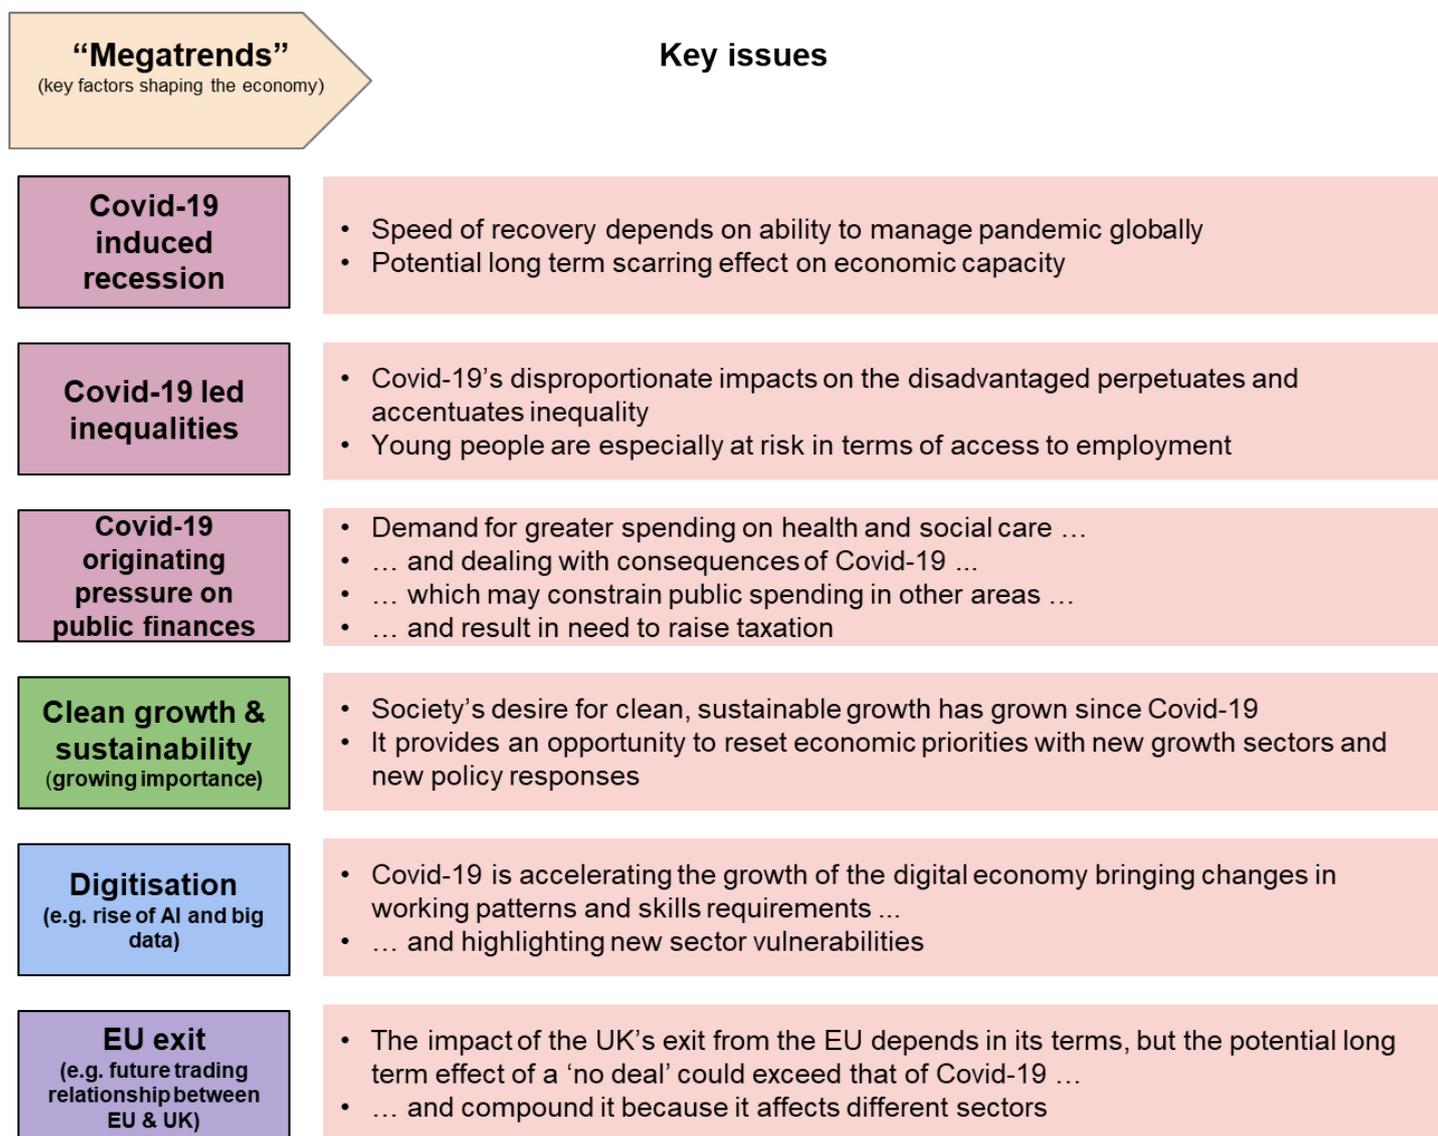

Even before the impact of Covid-19, a “new economy” was emerging in many developed countries led by developments in the application of digital technology, commitments to decarbonisation and the growth of more purpose-driven businesses, with a reduced environmental footprint and more concern for their social impact. Covid-19 has accelerated this transformation, offering the prospect of a healthier, more equitable, and more sustainable future. In Bradford District, we need to be alert to what these changes could mean for us.

Our analysis suggests that our Economic Recovery Plan needs to respond to six key “megatrends” (see Figure 10):

- The effects of the sustained economic fallout from Covid-19;
- The rise in inequalities that Covid-19 has provoked;
- The increased pressure on the public finances as future governments seek to reconcile the costs of continuing to mitigate the impacts of Covid-19, demand for extra spending on health and social care and the need to restore balance between spending and revenue²⁰;
- The UK’s exit from the EU will also require the economy to adjust, affecting different sectors to Covid-19 and with a larger, adverse impact on long-term economic performance;
- The acceleration of the structural adjustment associated with the growth of the digital economy; and
- The acceleration of the structural adjustment associated with the growth of the green economy.

²⁰ Pressure on the public finances will affect local government in Bradford District in two ways: directly, if the local authority is expected to fund more of its spending, and indirectly, as the level of government spending which benefits Bradford District is lower than might otherwise be expected

Figure 10: Megatrends affecting Bradford District's economy

Further details of the supporting evidence are summarised in [Appendix B](#).

Implications for Bradford District

Covid-19 has shone a light on fundamental structural problems that have blighted the UK for generations. As the Prime Minister has recognised: 'too many parts' of the country have been 'left behind, neglected, unloved'²¹. The prospect of EU exit and other transformative forces are reshaping and, in some cases, accentuating the challenges we face in Bradford District, but they are also revealing new opportunities for us to pursue.

Stress testing our existing Economic Strategy

We have tested how Bradford District's existing Economic Strategy, in particular the opportunities and challenges it seeks to address, is likely to be affected by the trends we have identified. We recognise that Covid-19 has accelerated important economic transformations: we will not simply go back to 'normal' once we are able to manage Covid-19. We have assessed how the opportunities targeted by our current Economic Strategy have been and are likely to be impacted - see Table 1.

²¹ Prime Minister, 'Economy speech', June 2020

Table 1: Impact of “new normal” on Bradford District’s Economic Strategy

Bradford District Economic Strategy opportunities	Bradford District’s challenges pre Covid-19	Implications for Bradford District
Our young and enterprising population	<ul style="list-style-type: none"> • Relatively high birth rates and international inward migration mean that the population is growing • Employment rates have lagged the UK average over the past decade • BAME women make up three quarters of employment gap • Vulnerable ‘hard-to-reach’ communities lack access to training, work or education • Skills gaps persist at the top and bottom of the labour market: 14% of the working age population have no qualifications (vs. 8.3% at UK level); 25% are qualified to degree level (vs. 37% UK level) • Large gaps in life experiences and opportunity remain between the richest and poorest; for example, a recent report ranked Bradford second in the country for areas with the least social mobility²² 	<ul style="list-style-type: none"> • Need to focus more on unemployment amongst those aged 16-24 which has doubled during the pandemic: young people leaving education will face the toughest job market in decades • Need to reduce the number of talented people leaving the District by providing strong economic, social and cultural reasons for staying • Need to focus more on inclusion since job losses are more likely to affect those who are already disadvantaged in the labour market • Need to protect against the risk to jobs requiring these mid-level skills from globalisation, technological change and automation • Need to facilitate job transition as a wave of horizontal moves is expected with laid off workers seeking work in different sectors • Need to reinforce support for skill-job matching efforts since people are now more likely to consider jobs for which they do not necessarily have the right skills or qualifications^{23,24} • Need to rethink the skills considered relevant for upskilling programmes in addition to those skills specific to key sectors that are likely to grow (e.g. healthcare), transversal skills that can be used across occupations and sectors will likely increase in importance • Need to understand and counteract the impacts of automation, which is likely to accelerate as businesses seek to become more resilient increasing the risk of more jobs being displaced - adding pressure on young people • Need to pay more attention to the mental and physical health of people and business owners to boost productivity
Our growth potential	<ul style="list-style-type: none"> • The job density is low: 690 jobs per thousand work age population (vs. 840 nationally) • Productivity (measured as output per worker) is higher than other cities in the Northern Powerhouse • The low job density means that the business base needs to expand to be as productive as UK peers per head of population • A quarter of current jobs in Bradford are in occupations that are likely to shrink by 2030 and only 10% are in occupations that are likely to grow²⁵ • Median weekly workplace earnings are less than the national average (£465 vs. £479)²⁶ • Business creation in high-growth, high productivity sectors is slow • Awareness and use of business support are poor, in part delivery is 	<ul style="list-style-type: none"> • Need to focus support on hardest hit sectors such as retail and hospitality • Greater need to ensure that businesses across the District can operate safely and adapt and thrive in the new conditions with more uncertainty • Need to prepare businesses for new ways of working accelerated by experience of lockdown and working from home • Need to identify new skills requirements as sectoral shifts accelerate • Greater need to support businesses with digital transformation • Needs to consider implications of more local spending • Need to understand which sectors offer the most growth potential for the District • Need to position Bradford District to benefit from a ‘Green Industrial Revolution’

²² Social Mobility Commission, <https://www.gov.uk/government/news/the-long-shadow-of-deprivation> (15.9.2020)

²³ The number of jobseekers leaving occupation fields blank when searching for jobs has risen 5 percentage points to 28% since March 2020

Bradford District Economic Strategy opportunities	Bradford District's challenges pre Covid-19	Implications for Bradford District
	fragmented	
Our distinctive offer	<ul style="list-style-type: none"> • Many areas, including high streets, have suffered years of decline • Many homes are either empty and/or unfit • Land and building are unused and under-utilised • Underdeveloped visitor experience • Potential investment sites are not well defined • Poor connectivity holds back economic growth: Bradford is the largest place in the UK not on the mainline rail network 	<ul style="list-style-type: none"> • Need to get the visitor economy back on track • More pressing need to adapt our offering to technological innovation, globalisation and environmental pressures that are changing the way we live and work • Need to identify new business opportunities emerging for locally produced goods and services (as substitutes for ones supplied elsewhere) - EU Exit may exacerbate this • Need to promote value of our local cultural assets • Need to prepare people for the creative industry • Need to adapt the role of town centres and high streets in light of more teleworking and less commuting - especially if they offer local community facilities, as people interact closer to home
Our globally connected District	<ul style="list-style-type: none"> • Poor connectivity holds back economic growth: Bradford is the largest place in the UK not on the mainline rail network • Digital inequalities persist: only 69% of properties in the 20% most deprived areas have access to superfast broadband 	<ul style="list-style-type: none"> • Greater need to plan our public spaces and infrastructure (for example, due to the shift online/home working). • Greater need to understand the use of housing and commercial property as concentrations of those sectors where occupations are better able to work from home may see long term shifts in commuting patterns and housing and commercial property demand • Need to consider implications of reduced car usage and more active travel • Greater need to reduce digital inequalities since these have exacerbated access to the opportunities emerging after Covid-19 • Need to prepare businesses for a potential further rapid contraction of retail and commercial use in our District

The new opportunities

Our recent review of the Economic Strategy explored the intersection of megatrends with our local context, resulting in a more comprehensive set of areas of opportunity:

- Equipping our **young, diverse population** with the skills and confidence they will need to succeed in our evolving economic environment in sectors where Bradford District has the best growth potential;
- Supporting businesses to adapt to and exploit developments in **technology** by upskilling and supporting businesses to use new technologies and drive innovation;
- Leveraging Bradford District's diverse **cultural assets** and **distinctive places** to drive economic growth;
- Accelerating the development of Bradford District's **green economy** by transitioning to a sustainable, resilient and connected economy; and
- Promoting and enabling better **health** and **wellbeing** by enabling all people to lead long, happy & productive lives.

Young, diverse population: With more than 25% of the population under 18, and over 330,000 people of working age, governments and businesses (working together) need to prioritise upskilling as a critical tool in navigating out of the crisis and into a world of stronger economic stability enabled through a high-skilled and intellectually mobile workforce. Though there is a relatively high number of new entrants to higher education²⁷, currently only 25% of our adult population is qualified to degree level (vs. 37% UK level). There is a big opportunity to improve our human capital to support a more productive economy. There is a large potential for our diverse population to contribute to the economy, particularly BAME women, who made up three quarters of our employment gap.

Technology: Covid-19 has highlighted the significant digital divide, with digital poverty and poor digital skills. It has also increased unemployment - with further increases to be expected, in part due to structural economic changes and new ways of working which it has accelerated. A quarter of current jobs in Bradford District are in mid-skill occupations that are

²⁷ Leeds City Region Labour Market Information Report 2019/2020

likely to shrink by 2030; only 10% are in occupations that are likely to grow²⁸. But these changes also present an opportunity to make the District's economy more resilient: if we create the right business conditions, more jobs can be created. There is a large potential for digitally upskilling workers to be redeployed in high-growth sectors. To do this, we need to prepare our workforce so that job creation happens in Bradford District. This means better education and more effective upskilling. It is also about supporting businesses to realise the opportunities, especially in the digital economy from artificial intelligence and big data, by being agile, creative and innovative. Although our Economic Strategy identified the opportunity to do more to make Bradford District more distinctive in its offering to business and skilled individuals, we need to do more, building on existing sectoral strengths such as manufacturing, health and social care, through the topical lenses of green and digital activities, will help drive economic recovery.

Green economy: Despite the Covid-19 pandemic, the importance of transitioning to a more sustainable low-carbon economy has continued to gain momentum and move up the agenda for policymakers, businesses and investors. Unlike in previous recessions, where support has waned, the green economy is now widely seen as integral to global and national economic recovery - 48% of the UK public agree that the Government should respond "with the same urgency to climate change as it has with Covid-19" (compared with 28% who say not)²⁹. The Prime Minister announced plans to stimulate a green industrial revolution, seeing it as the basis for 'building a better future' to stimulate employment³⁰.

The District already has around 10,000 environmental sector jobs. Clean growth could add £11 billion to the Leeds City Region economy and create 100,000 extra skilled jobs for local people in sectors ranging from energy and utilities to innovative design to food to construction³¹. Bradford District is expected to require around 7,800 new jobs in the low carbon and renewable alone by 2030³².

The District is also home to some unique social, business and physical assets which, if fully and effectively harnessed, can position us well to take advantage of the opportunities available from clean and inclusive economic growth that creates new jobs, increases employment and incomes, and in turn supports improvements in health and well-being. In addition, the District's physical geography offers significant potential for the generation of renewable energy, flood alleviation and carbon sequestration measures. Furthermore, opportunities exist to develop local artisan economies, such as local food producers, farm shops and markets.

Culture & place: Bradford attracted 9.2 million visitors, bringing significant visitor spend³³. We were proud to be named Europe's 'Emerging destination of the year' in 2018 by the Luxury Travel Guide, which called us a modern cosmopolitan city with a thousand stories to tell. But our hospitality sector has been one of the hardest hit by Covid-19.

Looking forward, we still believe that our cultural, heritage and natural assets will be a valuable basis from which to drive economic growth by attracting visitors, residents and businesses. We are supporting Bradford's bid to be the UK City of Culture in 2025. The District has a range of fine Victorian architecture and a wealth of heritage buildings that present opportunities for highly desirable living and working spaces. Encouraging and enabling the imaginative reuse of these assets will be an important focus of our recovery.

One effect of Covid-19 has been to demonstrate that home working can be effective and to encourage more people to think about moving from urban areas - which have tended to be where Covid-19 case have been concentrated - to less urban areas, often bringing with them valuable spending power³⁴.

In addition, Bradford District is strategically located between Leeds and Manchester but currently lacks the transport infrastructure to realise fully the opportunities this presents. Northern Powerhouse Rail and other rail/infrastructure investment would enable better connectivity³⁵.

Health & wellbeing: Covid-19 means that the value of good health and social care is better recognised. The pandemic has also added to pressures elsewhere in the health and social care systems. It is an economically significant sector which is expected to grow. Bradford District will gain by being well positioned to take advantage of initiatives aimed at ensuring a healthy workforce and society and by developing and attracting workers to support the development of its health and social care sectors. There is in particular a big potential in promoting universities coming together with employers to assess and plan for skills needed (especially health care).

Box: Upskilling and innovation for green jobs

“Now is the time to plan for a green recovery with high-skilled jobs that give people the satisfaction of knowing they are helping to make the country cleaner, greener and more beautiful.”, Boris Johnson, Prime Minister³⁶.

Successful economic recovery depends on developing a suitably skilled workforce able to meet the needs of growth sectors. This is key to job creation. The emergence of the green economy is a vital source of growth for Bradford District. We need to support it in both the short- and long-term beyond this recovery plan.

The 10-point plan proposed by the Government in November 2020 will mobilise £12 billion of government investment, and potentially three times as much from the private sector. The launch of the Green Jobs Taskforce seeks to support the creation of 2 million skilled jobs to build back greener and reach net zero emissions by 2050.

Bradford District can set a new direction for the job market as we transition to a high-skill, low carbon economy

What support is needed for people in transitioning industries?

- Ensuring we have the immediate skills needed for building back greener, such as in-home retrofitting and the circular economy.
- Developing a long-term plan that figures out the skills needed to help deliver a net zero economy.
- Supporting workers in high carbon transitioning sectors, like oil and gas, to retrain in new green technologies.
- Stimulate demand for high value-added green infrastructure products and services. Improve the economics of delivery through scale effects³⁷.

Whilst there is no shortfall of solutions that target decarbonisation and unemployment, delivering integrated policy solutions at speed and scale remains challenging. Currently, the relevant players across the value chain required to deliver technical solutions, operate largely independently. There is no common demand signal visible to all players. In time, the open market would respond with waterfall demand along the value chain but to accelerate this, a well orchestrated solution is required that takes an end-to-end value chain approach and encourages effective collaboration across the public and private sectors.

The first step for Bradford District is to convene a consortium of private sector companies across multiple industries in the end to end value chain such as housebuilding, wholesale distribution, field services, equipment, project management and utilities. Bringing together leading businesses from across the delivery chain will highlight a range of opportunities to accelerate the implementation of the 10-point plan and generate new jobs.

We believe that the current economic crisis can be turned to our advantage. By supporting change in the economy and encouraging new ways of working, we have a narrow, but real, opportunity to position Bradford better and deliver greater wellbeing for all.

Our ability to do this is helped by the big change in political attitudes we have seen since Covid-19. Bolder economic and social strategies are gaining force in policy debates around the world. The pandemic is the chance to reset our economy to create a healthier, more equitable, and more sustainable future.

We need to use all the levers at our disposal, including taking advantage of devolution and the levelling-up agenda. Further devolution of funding and powers will mean that we can take further steps to make our economy fairer, in part by creating a better sense of local connection and ownership among citizens. We want to work in partnership with Whitehall to develop and implement an ambitious Economic Recovery Plan.

³⁶ Prime Minister, Financial Times, 17 November 2020

Our Economic Recovery Plan

Introduction

Our Economic Recovery Plan for Bradford District must respond to the changing economic context and opportunities. It must enable us to realise the new opportunities we anticipate beyond Covid-19 whilst addressing the key challenges we face. We need to be bold, ambitious and innovative in the actions we take. We must also build on our existing strengths. In short, we must continue to transform our economy to fulfil our ambitions.

We have built our Economic Recovery Plan around a set of ambitions, principles and enablers which we see as our response to the key challenges and opportunities we expect to arise from the “megatrends” we expect to shape the District’s economy (see Figure 11).

Figure 11: Framework for developing the Economic Recovery Plan for Bradford District

Our ambition

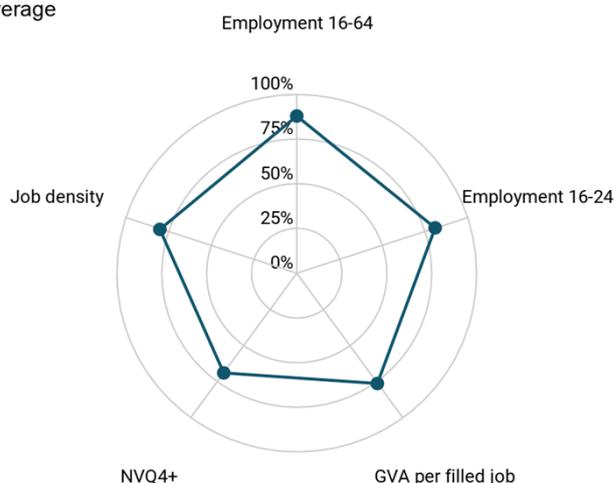

Despite the unforeseen impact of Covid-19, our long-term ambition for the District’s economy in 2030 remains unchanged. Our aim is still to grow skills, jobs, productivity and earnings so that Bradford District is performing above the national average (see Figure 12). This means:

- Increasing the value of Bradford’s economy faster than the UK average;
- Getting more people into work to bring employment rates closer to UK rates; and
- Improving the skills of residents to close the gap to UK levels.

Figure 12: Bradford District performance against UK average in key metrics

Bradford performance

% of UK average

Source:

The purpose of our Economic Recovery Plan is to reset our economy so that we can accelerate our progress towards this long-term ambition by capitalising on the five distinct opportunities we have identified, namely:

- Equipping our **young, diverse population** with the skills and confidence they will need to succeed in our evolving economic environment in sectors where Bradford District has the best growth potential;
- Supporting businesses to adapt to and exploit developments in **technology** by upskilling and supporting businesses to use new technologies and drive innovation;
- Leveraging Bradford District's diverse **cultural assets and distinctive places** to drive economic growth;
- Accelerating the development of Bradford District's **green economy** by transitioning to a sustainable, resilient and connected economy; and
- Promoting and enabling better **health and wellbeing** by enabling all people to lead long, happy & productive lives.

It is also designed to enable us to address the key challenges that could slow our progress or even prevent us from achieving our ambition. This means:

- Reducing unemployment, especially among young people;
- Improving skill levels;
- Enhancing connectivity - both physical and digital; and
- Building our image and reputation, especially outside the District.

Our principles for recovery

We want our Economic Recovery Plan to set us on a course to restore our economy in a way that is:

- **Productive** so that workers and businesses have the right tools to create more, higher value jobs which offers the foundation for rising living standards;
- **Inclusive** so that everyone can contribute to and benefit from it, building a fairer and more cohesive District: this means continuing to address underlying historical labour market disparities;
- **Sustainable** so that growth protects and enhances the natural environment, both locally and globally, and meets this generation's needs without compromising those of future generations; and
- **Resilient** so that growth can be sustained into the long term by unlocking new opportunities from the low-carbon, digital economy that will make the District stronger and more resilient to future economic shocks.

We need to be agile in our approach so that we can respond quickly and effectively to any further changes in either public health or the economic context so that we can address the new opportunities and challenges. To do this we will be committed to tracking our progress and learning any lessons as we move forwards. We also need to make sure that our goals for productivity and inclusion are compatible with those for sustainability and resilience.

We want to build on our strong track record of working with our partners to create a better Bradford District for all.

Our targets

For each opportunity area, we have outlined indicative targets for the Economic Recovery Plan. Once they have been confirmed – as the proposed interventions are confirmed – we will use them to track our progress and adjust our approach if we need to.

Opportunity	Recovery targets
Young, diverse population Equip the District's young & diverse population with the skills & confidence needed to succeed.	<ul style="list-style-type: none"> • Reduce unemployment, especially among people aged 16-24 • Reduce proportion of young people who are not in education, employment or training (NEET) • Reduce proportion of working age population with no qualifications • Increase levels of digital literacy • Increase support for adult learners accessing further and higher education.
Technology Support businesses to use new technologies and drive innovation.	<ul style="list-style-type: none"> • Increase take up of business support • Increase satisfaction with business support • Increase number of business start-ups • Increase business growth rates
Culture & place Leverage the District's diverse cultural assets and distinctive places to drive economic growth.	<ul style="list-style-type: none"> • Improve the visitor and citizen experience • Increase visitor numbers and spend • Increase the value of cultural and creative sectors and the number of jobs in these sectors • Create new spaces for living, work and leisure and enhance existing ones
Green economy Accelerate the transition to a sustainable, resilient and connected economy.	<ul style="list-style-type: none"> • Improve the quality and energy efficiency of homes and public buildings • Reduce levels of fuel poverty • Comply with UK air quality limits by 2022 • Reduce CO₂ per capita emission levels and keep them below UK average • Develop local expertise and capabilities in retrofitting, sustainable food production, hydrogen LGVs and the circular economy • Increase the value of environmental and low carbon sectors and the number of jobs in these sectors
Health & wellbeing Enable all people to lead long, happy & productive lives.	<ul style="list-style-type: none"> • Support the development of a healthy workforce to generate economic and social value • Adopt and integrate digital solutions into health and care delivery models and interventions • Begin development of a unique Bradford medical education and training undergraduate programme

Enablers to achieve our ambitions

We will only achieve our ambitions for both the Economic Recovery Plan and the longer-term if we take enabling actions in four broad, but interconnected, areas.

Education and skills

Education and skills development are key enablers if we are to capitalise on the opportunity presented by our population. Developing the human capital of the District's population will encourage and enable more citizens to enter the labour market by accessing well paid, skilled employment and / or transitioning to jobs in different sectors requiring new skills. By targeting existing and expected skills gaps in the District, we can help to fill vacancies, improve matching efficiency and create the skills base so that businesses in the new and growing sectors (such as technology, the green economy, culture and health) have access to the skills they need and can help us to reduce the rate of unemployment rate, especially the proportion of the population who are NEET. It will also help us to retain skilled employees and local talent which is especially important for our young people.

Business environment

We want a thriving business community in Bradford District to create good employment opportunities for local people and serve the needs of the District's consumers. To achieve this, we must make sure we encourage start-ups, small and micro business expansion. We must help them to adopt new ideas, processes and technologies so that they can develop products, services and employment in new and emerging sectors. We must also attract new businesses to the area by marketing Bradford District to prospective inward investors. This means making appropriate support available and accessible so that we can capitalise on the strong culture of entrepreneurship we have in the District. This will be vital in enabling Bradford businesses to capitalise on the opportunities we have identified so that they can provide the jobs our economy will need. It will also facilitate regeneration across the District.

Research and innovation

Investing in research and innovation will play an important role in enabling Bradford District to achieve its ambitions, particularly those relating to technology, health and the green economy. We want to encourage collaboration across academia, industry and government to foster economic and social development, building on the knowledge institutions in the District, notably the University of Bradford. We want to enhance our reputation for adopting new technologies, such as digital health, and developing distinct capabilities such as sustainable food production and the production of green hydrogen vehicles.

Infrastructure: physical and digital

Finally, we need to make sure that our physical and digital infrastructure enables us to capitalise on our opportunities. This means ensuring that our transport network gives us the physical connectivity we need to boost our productivity. At the same time, we want it to boost regeneration of our towns as well as aligning with our ambitions for a green recovery based on sustainable transport with a more efficient, extensive and greener public transport network.

Similarly, improvements to our digital infrastructure such as broadband and mobile coverage and the roll-out of full-fibre and, subsequently, 5G will enable both our businesses and citizens to be more digitally connected. This will drive innovation but reinforce the need for upskilling if we are to capitalise on the opportunity to boost productivity and create more jobs. Mobile coverage, particularly in less urban areas, can also bring benefits via connected healthcare. 5G could also support information sharing by a mobile health and social care workforce and will be important in Industry 4.0.

Reinforcing the supply side: stimulating jobs

If investments in education and skills are to deliver value as a response to Covid-19, they need to align with the current and expected demand from employers. Creation of new skilled jobs will only be made possible if we can attract business (by strengthening the business environment and selling Bradford to prospective investors), support business start-up and growth and boost competitiveness by encouraging collaboration between our local businesses and academia to drive innovation. Although this is a long-term endeavour - beyond the scope of this Economic Recovery Plan, it can play a valuable role in stimulating job creation.

Digital infrastructure will also enable innovation in new sectors of the economy, in particular in aspects of the green economy through efficient management of smart buildings, monitoring of the environment and connected transport. Close links exist, for example, between digitisation of manufacturing / Industry 4.0 – to reduce waste and generate more efficient production and processes - and the circular economy. We have strengths in manufacturing – can production lines be pivoted to new products and supply chains?

Key interventions

Our Plan sets out how we intend to respond over the next two years to drive economic recovery across the District as well as the issues we need to consider when we refresh our Economic Strategy in 2022. Our planned interventions fall into three broad categories:

- Those that we will undertake with the support of our partners across Bradford District: in some cases, this will involve building on our existing initiatives but in others it will involve new interventions;
- Those where we want to work with partners in the region, notably the West Yorkshire Combined Authority and the Leeds City Region Local Enterprise Partnership to pursue our mutual goals: together, this partnership working can bring new investment to the District and greater local influence on how and where resources are spent; and
- Those where we want to work with the Government to seize the immediate opportunities to boost skills, employment and productivity and so contribute to 'levelling up' the national economy as well as contributing to its other priorities, for example achievement of Net Zero.

We have some clear asks of our partners from the private, public and third sectors to help us deliver a successful recovery.

Below, we identify the priority actions we have identified for each opportunity area. We also describe three key cross-cutting interventions which are relevant to several opportunity areas: these relate to skills, business support and infrastructure. We distinguish those actions that we have already taken in the relief phase, our priorities for the recovery period and the key considerations for our long-term strategy.

Young, diverse population

Our vision is to leverage our young, diverse population as an asset. To do this, we need to provide them with the skills and confidence they will need to succeed in Bradford District's economy. In particular, we want them to contribute to those sectors of the economy which offer Bradford District the best growth potential.

We already have initiatives in place which are helping young people in the District:

- Our Opportunity Area Programme uses funding from the Department for Education to improve education standards and promote social mobility for young people, helping disadvantaged people to develop critical life skills;
- The Industrial Centres of Excellence are education-industry partnerships which equip young people with experiences and skills required for work by connecting education and business partners;
- SkillsHouse provides unemployed people with the skills and opportunities to find employment within Bradford District;
- Reach Higher enables 4,000 disadvantaged people to access high level education and training through graduate placements, mentor support and subsidies for employers; and
- Bradford Pathways is an employer-led model of careers and technical educational support designed to give young people the skills that employers need.

We are already working with West Yorkshire Combined Authority on two programmes to support recovery:

- [Re]boot which provides support over two years for people who are unemployed / at risk of redundancy to help them retrain with a line of sight to employment opportunities across West Yorkshire, delivered through the five districts, colleges and other providers; and
- Employment Hubs, another two-year programme, designed to facilitate access to advice and support, across West Yorkshire to enable individuals to access training, retraining and/or employment, particularly to new opportunities being created to support the Covid-19 recovery efforts.

Our priorities are targeted at the disproportionate challenges being experienced by young people, especially those in BAME communities. Evidence indicates that those from ethnic minority communities are, on average, younger than white British people and younger people are more likely to work in a sector vulnerable to shut down³⁸. This suggests that young, ethnic minority individuals are more likely to be adversely impacted by Covid-19. Bradford District has a young and ethnically diverse population indicating this is a critical issue that needs to be addressed. Our Economic Recovery Plan aims to support those who are most impacted by providing them with the opportunity to upskill and/or engage in work.

Building on this existing activity, our priorities for the recovery period are as follows:

- **Making Bradford a learning District** - Providing our residents with opportunities through SkillsHouse, providing a District wide prospectus and careers portal
- **Providing access to work** - Offering opportunities to young people by making them more employable and the economy more resilient
- **Inspire, Reskill and Upskill** - Informing the development of vocational provision, including higher level skills - with a cohesive offer for employers, the self-employed and the unemployed.

Furthermore, the Council recognises that a successful future for the District depends on securing a successful future for our children. We want to make sure every child can reach their full potential regardless of where they live, cultural background or financial circumstance. This means offering the right help at the right time to ensure they are happy, healthy and achieving throughout their lives. A good education is central to this, and more is needed. We have been actively supporting schools to deal with Covid-19, including with infection control and provision of IT equipment and support to enable them to learn remotely.

Looking forward, as we refresh our Economic Strategy, we will need to make sure that our skills system in Bradford District is responding efficiently and effectively in delivering the skills needed in growth areas such as the green economy and the creative sector.

Technology

We want to help existing businesses in the District adapt to take full advantage of recent developments in technology. We also want Bradford District to be an attractive location for mobile business investment. To do this, we need to make sure that businesses have the support they need to use new technologies and drive innovation. We also want them to have (better) access to the workforce skills they'll need. At the same time, we want to support increased access to digital resources to tackle the risk of digital poverty. This means linking our skills policy and programmes with other efforts to support innovation and growth across the District so that we have the skills needed to drive workplace innovation and make jobs more productive.

Through our Economic Recovery Plan, we want to drive a technology led recovery in two ways:

³⁸ The Institute for Fiscal Studies, Are some ethnic groups more vulnerable to COVID-19 than others? May 2020
[<https://www.ifs.org.uk/inequality/chapter/are-some-ethnic-groups-more-vulnerable-to-covid-19-than-others/>]

- **Digitally upskilling Bradford:** several interventions already address the challenges and opportunities associated with the accelerated digital trends caused by Covid-19 which primarily include upskilling opportunities for generic, basic digital skills and more advanced, sector-specific tools. We want to develop a targeted programme to address digital poverty amongst vulnerable groups.
- **Providing digital infrastructure and capital:** In order to facilitate technological advancement, suitable equipment is required. This will include a wide variety of products such as full-fibre internet, laptops, software etc. This strand of work aims to support vulnerable individuals by providing important equipment to them, removing digital poverty barriers.

We also investigate the development of an Institute of Technology in Bradford that would bring together the University, further education colleges and employers to support the development of specialist skills that support local students with a route to technically skilled employment.

We already have the Digital Health Enterprise Zone (DHZE) which helps incubate and grow digital health businesses.

Looking forward, we see digital connectivity as a core part of making Bradford District globally connected with strong international trading links and access to new markets. We will continue to monitor what we do to stimulate concentrations of high-value production businesses, including in the digital technology sector, and facilitate the growth of small and medium sized enterprises.

Culture & place

Bradford District has a diverse, multicultural population as well as several distinctive cultural, heritage and natural assets which provide opportunities to stimulate growth and generate skilled employment based on attracting visitors and developing new living and working spaces. Covid-19 has meant that people spend more time near where they live. It has accelerated changes in the way the city centre, towns and public spaces are occupied. It has shifted patterns of use away from consumerism and retail to more experiential and cultural uses. As such, we want to use the recovery period to start to reimagine how we can use the District's assets and spaces for home, work and leisure so that we can regenerate the District: we want to explore the principle of 'reuse, don't rebuild' as a means of regenerating the District's existing cultural assets to create new spaces for living, work and leisure.

Our vision for culture and place in the context of economic recovery is based on leveraging our ambition to be the UK City of Culture in 2025 and using it to raise Bradford's profile globally. We want to make Bradford a compelling location for cultural and creative businesses to thrive by creating a business environment which supports and nurtures start-ups. We also want to create places that citizens are proud of.

We have already acted to leverage our cultural assets and distinctive places, for example:

- We formed a Cultural Place Partnership and a Cultural Recovery Board;
- We launched Bradford's bid for UK City of Culture 2025;
- We have commissioned a Night-time and Evening Economy Study, a City of Film Screen Strategy, and an economic impact study to assess economic impact of a successful City of Culture designation and a 10-year cultural strategy for the Bradford District;
- We are developing a 10-year cultural strategy, Culture is Our Plan, in recognition of the cultural sector's rich contribution to economic and social wellbeing;
- Arts Council England is funding Bradford Producing Hub as a pilot project to develop local talent and boost the District's ability to produce new work;
- The LEAP – a new Creative People and Places programme - is working to create arts experiences for, by and with local communities where people tend to engage less with arts and culture;
- We are supporting the conversion of the former Odeon cinema into a premier live music venue;
- We are creating a strong city centre business destination through investment in the One City Park office scheme and other developments; and
- We are working with the Towns Fund boards to improve the prosperity of Keighley, Shipley and other places in the District.

Building on this existing activity, our priorities for the recovery period are as follows:

- **Culture is Our Plan** - implementation of our 10-year cultural strategy for the District to attract investment and act as a lever for multiple District-wide interventions;
- **Greening the District** - a new crowd-sourced green space and a new green park in the city centre; and
- **Designate Little Germany as a Heritage Action Zone** to support business needs of CCI workforce and improve the visitor and citizen experience.

Looking out to 2030, as we refresh our Economic Strategy, we will need to consider:

- How we can capitalise fully on the opportunity if we become the UK City of Culture 2025 by ensuring we deliver successfully and maintain our momentum through further investment in the cultural and creative industries beyond 2025; and
- How we continue to improve our infrastructure through the City Centre Action Plan and the Northern Powerhouse Rail Growth Strategy.

Green economy

Our vision for the District is to transition to become a sustainable, resilient and connected low-carbon economy through infrastructure investment, business innovation and collective action.

The Council declared a Climate Emergency in 2019 and published its Sustainable Development Action Plan in early 2020. A Sustainable Development Partnership has now been established to drive forward our commitment to be carbon 'net zero' by 2038 and help create a more sustainable District. The development of Bradford District's green economy and green jobs is central to this ambition. It will provide an important economic opportunity that will become increasingly significant over time. We want to invest in more sustainable homes and businesses, adapting to the impacts of climate change and building the skills that will be needed will help to ensure the District is ready to capture opportunities in a new green economy.

We already have many initiatives underway aimed at accelerating this transition. These include flagship projects identified by the Council for tackling the Climate Emergency which will:

- Reduce the energy used for street lighting;
- Deliver a district heat network, with the potential for saving on Council and partner heating costs as well as significantly reducing carbon emissions associated with the provision of heat and electricity in the city centre;
- Expand the network of electric vehicle (EV) charging points and transitioning the Council's fleet to electric vehicles;
- Increase renewable energy and electricity generation on the Council estate; and
- Improve air quality through our Breathe Better Bradford clean air plan;
- Buy Fair Trade goods and produce, encourage our partners and businesses to do the same and look for ways to support Fair Trade further across the District.

In addition, the Council's budget, agreed in February 2020, allocated £25 million to climate action including:

- 'Tree for Every Child' - an ambitious programme to plant more than 55,000 new trees, one for each primary school pupil in the Bradford District;
- Community projects – biodiversity, environmental management and renewables; and
- Introduction of new 20mph zones to promote walking and cycling and cleaner air.

We are also working with the West Yorkshire Combined Authority to deliver a portfolio of major transport schemes worth in the region of £250 million over the next three years which include City Centre Transforming Cities Fund and capital programmes within the Local Growth Deal and West Yorkshire Transport Fund. In addition, the Leeds City Region is leading on transport and energy infrastructure related to the green economy such as Northern Powerhouse Rail and Leeds City Region Mass Transit. Critical within this is securing a city centre station for Bradford on Northern Powerhouse Rail.

Building on this extensive array of existing activity that is taking place in the District, the Economic Recovery Board has suggested that our priorities for the recovery period should be to develop business cases for action in four key areas:

- **Implementation of a neighbourhood-based energy efficiency retrofit programme** - building on existing plans in the District to retrofit individual homes and public buildings, and developing the concept of creating '15-minute neighbourhoods', to extend retrofitting to promote more sustainable living;
- **Creation of a sustainable food supply system** - building on the District's existing assets and activity to develop a sustainable food supply system and building the District's reputation as a regional / national sustainable food hub;
- **Development of the supply chain for hydrogen light goods vehicles** - positioning the District's automotive businesses to win opportunities in the fuel cell electric vehicles supply-chain through having a UK 'test-bed' fleet of hydrogen light goods vehicles; and
- **Construction of a circular economy demonstrator** - encouraging local businesses to invest in reprocessing of recycled or by-product materials and positioning the District as an exemplar of the circular economy in the UK.

Furthermore, a number of complementary initiatives are envisaged by local partners:

- Yorkshire Water plans to transform redundant land surrounding the Esholt wastewater treatment works to create a model development of sustainable housing and industry; and
- Bradford Community Energy Ltd is a Community Benefit Society set up to bring the benefits of community-owned renewables to Bradford.

Looking to 2030, we will need to consider:

- What, if anything, we will need to do to remain on track to achieve net-zero carbon by 2038;
- What more we should be doing to improve our transport and energy infrastructure; and
- How we build on our positioning as a national / regional exemplar for the circular economy, in the production and use of hydrogen vehicles and sustainable food supply.

Health & wellbeing

Promotion of health and wellbeing in Bradford District is important for several reasons:

- It enables a step change in the health, wellbeing and economic prosperity of our local communities;
- It provides the opportunity to create more, valued jobs in the District.

Achieving an inclusive health and care economy depends on collaboration between key institutions such as the NHS, the University of Bradford and the Wolfson Centre for Applied Health Research to revitalise and transform the District. This involves the development of a highly effective and compassionate integrated workforce based on a world class medical, health and care learning infrastructure which can translate the latest technologies and research quickly into practice.

The creation of a world class interdisciplinary health and care learning centre with strong collaboration will accelerate:

- Transformation to integrated place-based health and care delivery;
- Adoption and integration of digital solutions into health and care delivery models and interventions;
- Development of an agile workforce;
- Creation of a health and care workforce that harnesses and liberates the talents of the diverse population of Bradford District;
- Creation of a unique Bradford medical education and training undergraduate programme centred on prevention and community based integrated care; and
- Alignment of anchor organisations' investment in the District to improve social and economic outcomes.

Our work in this area is being led by our Health and Social Care Economic Partnership, but the nature of its impacts means that the ambition aligns closely to that of the Bradford Economic Recovery Plan. It builds on previous and complementary initiatives such as:

- Born in Bradford;
- The desire to open a Medical School in Bradford; and
- Establishment of the One Workforce Centre to support health and care employment.

Act Early North is a key priority. It will build on the work of Bradford Institute of Health Research, Born in Bradford and Act Early research programmes to understand the impact of preventative policy in the context of health. The prevention of ill health has the potential to be more cost effective than attempts to cure or manage disease. Act Early North aims to create a strong cost-benefit evidence base that supports early interventions and the levelling up agenda. In addition, it will provide jobs and training to boost the local economy. Digital literacy is a focal point of the initiative and will help to create a higher skilled workforce as well as acting as a 'catalyst for much needed additional research and prevention investment in the North'. It is hoped that the preventative health policy and early years interventions in young people will have knock-on impacts improving population health, reducing the cost of non-communicable diseases on public finances, and creating a healthier workforce.

Cross-cutting interventions

Skills: Besides addressing the specific challenges faced by young people, we must recognise the need for a broader set of skills-related interventions to support all the working population of Bradford District. Our proposed investments as part of our Recovery Plan are geared to enabling us to close the skills gap with the national average.

Our approach to addressing the challenges linked to skills within Bradford District is based on the following priority interventions:

- **Basic skills:** we plan to provide basic skills to everyone that wishes to participate which encompass core skills, including basic digital literacy, to equip people with the ability to succeed in the dynamically changing economy;

- **Advanced, sector specific skills:** we also plan to develop several, more focused interventions designed to help the District better match supply and demand of those skills needed in specific, key growth sectors where Bradford has both strengths and opportunities. Examples of our planned activities include using the Leeds City Region Local Enterprise Partnership's [re]boot programme to develop sector specific training courses and supporting the development of Future Technology Centres, for industries such as advanced engineering, computing and green technology. As part of this, we'd like to provide digital platforms and infrastructure to support employment growth and retraining via remote learning, access to peers and wider networks;
- **Language skills:** One of the challenges faced by our diverse inhabitants is that they do not speak English with sufficient fluency, and this inhibits them from realising their potential: we will facilitate access to/provide basic language programmes to support these people as part of our Economic Recovery Plan.
- **Support people furthest from the labour market into work,** including those with learning disabilities: we will create new employment opportunities, particularly in sectors with workforce shortages such as health and social care.

We will maximise the opportunity to leverage funding for the two Towns Fund areas (Keighley and Shipley) to secure resources for skills and a transformational programme of activity and investment in town and high street regeneration; promoting the distinctive offer of each place, improving the resilience and sustainability of those places and communities and contributing to economic growth.

Business support: Businesses across the District, in particular SMEs, will need to adapt to the new economic environment if they are to survive and then thrive. This means refining their strategies and operations to respond to the potential disruptive impacts of the trends that will impact them, including the UK's exit from the EU. We aim to make Bradford District a diverse business hub with a robust support framework for all businesses - with a focus on start-ups, small and micro businesses. By fostering their growth potential, we aim to foster the potential of local businesses. To support them, we need to make sure that they can access high quality business support.

Currently, support is provided through many channels with multiple providers across the District but it is underutilised due, in part, to businesses' lack of awareness and trust in its value. As part of our Economic Recovery Plan, we want to make sure that the available resources are fully leveraged. This will help our economy become more diverse and resilient. Consequently, our priority is to unite existing business support offerings across the District under a single banner, the 'Bradford District business hub' - this will offer a single point of contact to direct businesses and prospective entrepreneurs to business support offerings, including advice on funding. Under this banner, we are looking to provide:

- Community enterprise support for people considering starting a new business by offering access to coaching, finance, office space and business services and training, with key targets being specific gaps and priority areas to help remove barriers to employment;
- Support to social enterprises and social entrepreneurs through the Local Access Fund and Impact Hub investments in the District;
- Help to businesses to increase exports and grow global trade links; and
- Businesses with the information and support they'll need thrive following the UK's exit from the European Union.

We will also investigate how we can work with the Federation of Small Businesses and Chamber of Commerce to develop and extend a subsidised membership package for small and medium sized businesses (with less than 50 employees) in Bradford District. This will provide them with access to legal, tax and employment law support along with many other resources that will help their recovery and sustainability post Covid-19 crisis.

Finally, we want to explore what more the Council and other major public sector organisations can do to make the most of the 'Bradford District Pound'. Specifically, we will look at how we can increase the proportion of our spending so that it drives social value for local businesses and community organisations: the Council alone spends £475 million with third parties.

Infrastructure: We have long recognised that we need better infrastructure to facilitate strong economic growth which benefits all our population. We will continue to work with the West Yorkshire Combined Authority on this agenda as it remains critical to our economic recovery.

Our overriding priority is to make the case for sustainable transport development, in particular for Northern Powerhouse Rail. It is imperative that Bradford has a city centre station on the line.

Other transport infrastructure investments are also important to our long-term economic performance, notably Northern Connect, the City Centre and Rail Station Master Plans, the Calder Valley Rail Line Upgrade and the Skipton-Colne rail link.

Our digital infrastructure is also key to a more inclusive economic recovery: improved connectivity and better mobile coverage for rural and urban businesses can help to address digital exclusion in communities. Improved digital

connectivity can speed up business growth and connect more people to opportunities in the digital economy. We must ensure that our businesses are able to access high-speed broadband wherever they are in the District. Longer term activities are also needed to ensure that we recover with a more robust, resilient economy.

There are plans for significant investment by commercial fibre providers over the next five years starting in February 2021 with Cityfibre rollout of full fibre, followed by other providers. This will be complemented by the final Superfast West Yorkshire Broadband contract 3 in remaining rural areas. In addition, the fully funded DCMS Rural Gigabit Connectivity “outside in” programme will connect our hardest to reach rural areas with gigabit capable broadband.

The Council has several work streams underway to leverage government and commercial investment: we aim to use our assets and connectivity to incentivise investment by commercial providers in less commercially viable areas to extend connectivity more widely. Without our intervention, we’d have gaps in our rural and deprived areas. There are also opportunities to leverage social value from providers to support digital skills, devices and cheap connectivity.

Our other priorities for economic recovery also align with those of West Yorkshire in both the short and longer term. Shovel ready initiatives include improvements to broadband access, green infrastructure (e.g. cycle lanes and walking paths), retrofitting houses with energy efficiency can have immediate benefits for struggling communities.

Reputation: We need to continue to strengthen Bradford District’s image as a great place to live, work and play. We will improve our narrative for the District so that it resonates with communities within the District and beyond to promote the many opportunities Bradford District offers. Over time, this will help to build the District’s brand and attract business from emerging sectors. Bradford District has lots to offer businesses and prospective workers, it was named the best place to start a business in December 2017 by Barclays. A complementary, yet separate, intervention will unite our voice under a single narrative. We will work together to identify local leaders and build a comms campaign to provide a clear narrative to the rest of the country and world on everything that makes us distinct and the fantastic offering we provide.

Our priorities

Our Economic Recovery Plan is structured around a set of ambitions, principles and enablers which respond to the key challenges and opportunities we see arising from the “megatrends” which will affect the District’s economy. Building on the many activities we already have underway, we have identified the priority interventions we need against each of the five key opportunity areas. They fall into two categories:

- **Immediate asks** - interventions which are well-developed and can be delivered in the next two years; and
- **Aspirational** - interventions which require further development and are for delivery in the longer term.

Table 1 lists the planned interventions by category and shows which opportunity they address, the key owner and their alignment to regional / national partners and priorities. We summarise each in the rest of Section.

Table 2: Planned interventions by timeframe for implementation

Category	Intervention	Alignment to opportunity areas	Ownership	Alignment to regional / national partners and priorities	
				Regional (e.g. WYCA, Leeds City Region)	National
Immediate asks	Make Bradford a Learning District	Young, diverse population	Employment and Skills partnership	✓	
	Access to Work	Young, diverse population	Employment and Skills partnership	✓	
	Inspire, Reskill and Upskill	Young, diverse population	Employment and Skills partnership	✓	
	Neighbourhood retrofit	Green economy	Sustainable Development Partnership	✓	✓
	Building Bradford’s image	Cross-cutting	Economic Partnership		
	Bradford District business hub	Cross-cutting	Economic Partnership		
	‘Culture is Our Plan’	Culture and place	Cultural Place Partnership	✓	✓
	Building an inclusive health and care economy	Health and wellbeing	Health and Social Care Economic Partnership	✓	✓
	Act Early North	Health and wellbeing	Health and Social Care Economic Partnership	✓	✓
Northern Powerhouse Rail	Cross-cutting	CMBDC	✓	✓	
Aspirational	Sustainable food supply system	Green economy	Sustainable Development Partnership	✓	✓
	Supply chain for hydrogen LGVs	Green economy	Sustainable Development Partnership	✓	✓

Category	Intervention	Alignment to opportunity areas	Ownership	Alignment to regional / national partners and priorities	
				Regional (e.g. WYCA, Leeds City Region)	National
	Circular economy demonstrator	Green economy	Sustainable Development Partnership	✓	✓
	Greening the District	Culture and place	Cultural Place Partnership		
	Heritage Action Zone	Culture and place	Cultural Place Partnership		✓

Make Bradford a Learning District

Aim

SkillsHouse is a partnership which seeks to bring together a seamless education and skills offer for employers and individuals alike. It will mobilise resources in every sector to promote inclusive learning, from basic to higher education.

Rationale

Covid-19 has dramatically altered Bradford District's economic outlook. It is expected to increase unemployment, further especially among our young people. The District requires a skilled, resilient workforce that can make the most of job opportunities in a changing world. This intervention is designed to help the District's population, especially young people, to develop their skills and find work opportunities. If the young experience the greatest benefit, this will help to counter the disproportionate negative impact that the pandemic is having on them.

Key enablers

The Council has already committed £3 million to support SkillsHouse staffing across the Partnership until April 2024. To succeed the Partnership will require:

- Increased commitment to the work of SkillsHouse from local stakeholders
- Funding to support an online District wide prospectus
- Increased funding to support skills development
- Examples of success to be celebrated and cascaded across the District.

Key stakeholders - roles & responsibilities

The SkillsHouse Advisory Group will include the Council, the Department for Work and Pensions, major employers plus education, training and voluntary organisations. These include the Council, the District's three further education providers, the University of Bradford and Skills for Care. The Group will monitor progress and coordinate course provision along with advice and guidance available to Bradford residents.

The intervention will be led by the Council and Employment & Skills partnership but will draw on other key stakeholders such as the FE institutions.

SkillsHouse will be managed by Council staff but working with partners to provide a 'no wrong door' service to Bradford District residents. SkillsHouse will monitor numbers supported into employment and those being upskilled across the District.

Delivery plan

Step 1: Establish Advisory Group and management structure for SkillsHouse to develop a strategy and key success factors

Step 2: Agree an approach to stakeholder engagement and information, advice & guidance

Step 3: Establish a District wide prospectus and careers portal alongside a 'get into learning' campaign. The portal will signpost opportunities for those looking, and for businesses to raise awareness of education, training and careers

Step 4: Develop a Statement of Need against the updated context of Covid-19 and Bradford's economy.

Benefits

The expected benefits of successful delivery of existing initiatives through to 2024 will be:

- 24,000 people supported through SkillsHouse Partnership
- 12,000 residents supported into employment.

The expected benefits of new initiatives requiring funding to 'Make Bradford a Learning District' to 2024 will be:

- 42,000 further people supported through SkillsHouse Partnership
- 1,000 residents on salary subsidised apprenticeships.

Costs

The estimated additional costs to the public sector to 2024 are:

- £500k to establish a careers portal and undertake a marketing campaign
- £9 million for the SkillsHouse Partnership (in addition to the current commitment)
- £15 million to cover support for apprenticeships across multiple sectors (i.e. £15,000 per apprentice).

Next steps

Bradford Employment & Skills partnership will be responsible for building momentum, in particular driving the development of the SkillsHouse Advisory Group.

Access to Work

Aim

The aim of 'Access to Work' is to support residents find job opportunities and develop their skills to make them more employable and the economy more resilient. Particularly in industries with expected high labour market demand such as social care, digital skills and green economy

Rationale

Bradford residents are disadvantaged:

- The rate of unemployment is above the national average, particularly amongst young people
- Over 11% of the population do not know how to access the internet
- Bradford ranks 354 out of 374 local authorities in terms of broadband connections
- In some areas, 27% of adults in households speak no English, a key influence on access to employment.

Key enablers

Successful delivery of 'Access to Work' depends on:

- Coordinated delivery of current resources via SkillsHouse
- Increased support for adult basic skills development including digital skills
- Increased resources to reduce digital poverty
- Increased language skills for newly arrived migrants

- Increased funding for personalised specialist support for the long-term unemployed and disadvantaged.

Key stakeholders - roles & responsibilities

District-wide training and education will be overseen by the SkillsHouse Partnership.

Provision for Access to Work will be delivered by Bradford's three further education colleges and a range of voluntary organisations.

Delivery plan

Step 1: Establish a 'Kickstart gateway' in the Council to support a range of 6 month paid placements for 18-24-year olds

Step 2: District wide promotion of literacy, numeracy and general and specialist digital skills courses delivered by local education institutions

Step 3: Enable digital access resources for residents with a network of community centres offering skills development and internet access

Step 4: Introduce entry level English for Speakers of Other Languages for newly arrived migrants

Benefits

Delivery metrics covering participation numbers, employment impacts, cost, educational attainment and job conversion rates will be reported to the SkillsHouse Advisory Group.

The expected benefits of the 'Access to Work' programme up to 2024 will be:

- 3,000 young people into Kickstart placements, with the first 18 months Government funded
- 3,000 24+ adults into 6-month career placements
- 10,000 residents supported into Apprenticeships (Government funded)
- 20,000 residents with improved basic skills (Level 1 and below) and 20,000 residents with improved Level 2 skills
- 15 digitally enabled community access points
- 4,000 newly arrived migrants with improved English skills by 2024
- Personalised support delivered for 6,000 people who are most distant from the labour market.

Costs

The costs to the public sector to 2024 will be:

- £45 million to cover Kickstart
- £45 million to cover adult career placements
- £60 million to cover basic and Level 2 skills
- £1 million to cover digital community access points
- £1 million for an English language programme
- £12 million to support individuals distant from the labour market.

Next steps

The immediate next step is to get SkillsHouse fully operational, the Employment & Skills partnership will be responsible for driving this.

Inspire, Reskill and Upskill

Aim

The SkillsHouse partnership will inform the development of vocational provision, including higher level skills - with a cohesive offer for employers, the self-employed and the unemployed.

Rationale

Covid-19 has accelerated demand for new, particularly digital, skills. Bradford can retrain its young and diverse population as well as those leaving struggling firms.

Key enablers

Successful delivery of 'Inspire, Reskill and Upskill' depends on:

- Additional resources to support higher level skills
- District wide prospectus and communication plan to signpost skills provision
- Production of an annual statement of need to determine strategic priorities and investment in employment and skills provision
- Demand amongst employers for new skills to support post-pandemic resilience and growth.
- A Health and Social Care Partnership building a sustainable and inclusive health economy while working towards a new Medical School

Key stakeholders - roles & responsibilities

SkillsHouse will oversee an Annual Statement of Need to shape the strategic commissioning and delivery of skills provision in the District

Further education providers will coordinate provision via Delivery Agreements developed with the Local Enterprise Partnership and Bradford Local Authority. The University will supplement Higher Skills delivery with targeted interventions in consultation with

SkillsHouse, the LEP, employers and their representative bodies.

Delivery plan

Step 1: Establish a District wide prospectus, careers portal and skills marketing campaign

Step 2: Commence enhanced higher-level skills delivery through existing and new delivery vehicles such as the LEP'S reboot model and One Workforce centre

Step 3: Publish renewed Delivery Agreements with Further / Higher Education providers. Provision will include general digital skills, leadership & management, digital skills (e.g. big data, artificial intelligence and cyber security), and a range of sector specific modules.

Step 4: Secure funding for Future Technology Centres

Benefits

The expected benefits of 'Inspire, Reskill and Upskill' up to 2024 include:

- 10,000 individuals qualified to Level 3
- 3,000 individuals qualified to level 4+
- Deliver a range of leadership programmes to inspire Entrepreneurship (start up and scale up) for 1000 individuals
- Future Technology Centres created to support computing, Engineering and Green Skills - £18m
- Significant enhancement to health and social care training through improved HE and FE learning infrastructure.

Costs

The costs to the public sector to 2024 will be:

- Level 3 qualifications £45 million on top of current spend
- Level 4+ qualifications £9 million on top of current spend
- Leadership programmes £5 million on top of current spend
- Future Technology Centres costing £18 million (Computing at Shipley £5m, Engineering at Keighley £3m, Green Tech in Bradford £10m)
- Health and Social Care training / infrastructure to support a new Medical School costing £50m.

Next steps

The immediate next step is to get SkillsHouse fully operational, the Employment & Skills partnership will be responsible for driving this.

Neighbourhood retrofit

Aim

The primary, immediate aim is to build on existing plans to improve energy efficiency in the District by retrofitting individual homes and public buildings.

A further, longer-term aim is to create '15-minute neighbourhoods' retrofitted to contribute to more sustainable living. This means that access to local work, retail and services, sustainable transport links and green space can also be addressed holistically - a key step to a 'Sustainable District'.

Rationale

The poor quality of significant elements of Bradford District's housing stock contributes to high levels of fuel poverty and carbon emissions.

Improving energy efficiency in homes aligns with regional and national priorities, notably initiatives such as the West Yorkshire Combined Authority's energy efficiency schemes and the Government's Green Home Grants voucher scheme and fuel poverty targets.

Key enablers

Successful delivery will require:

- Development of a strategy for enabling more efficient, larger-scale solutions to upgrading building fabric and energy systems which meets the goals of the wider retrofit programme
- Engagement across the Council, the Sustainable Development Partnership Board, local businesses and communities
- Alignment with local, regional and national priorities and initiatives, on building retrofit
- Alignment with West Yorkshire Combined Authority pathways to carbon emissions reduction, including transport

- Assessment of potential sources of funding, for example a municipal green bond
- Development of plans for fifteen '15-minute neighbour-hoods' across the District to be co-developed with the communities to create a tangible and aspirational model.

Key stakeholders - roles & responsibilities

The Sustainable Development Partnership Board will be responsible for overseeing development of the business case for the programme, including defining its objectives and delivery plan. It will work closely with the Council, West Yorkshire Combined Authority, communities, businesses and property owners.

Delivery plan

Step 1: Identify which types of properties would be suitable for a scaled-up retrofit of fabric and energy systems and engage with District planners to assess the technical feasibility and propose priority locations.

Step 2: Engage key stakeholders on the skills, labour and technology required to deliver the retrofit programme, establish the Strategic Outline Business Case and identify funding options.

Step 3: Secure the necessary funding to launch the retrofit programme.

Step 4: Develop the concept and strategy for creating multiple '15-minute neighbourhoods'.

Step 5: Co-develop specific proposals for each '15-minute neighbourhood' community.

Step 6: Deliver the programme of '15-minute neighbourhoods'.

Benefits

The expected benefits of successful delivery of a District-wide retrofit programme and the creation of '15 neighbourhoods' that enable sustainable living are:

- Improved quality and energy efficiency of homes, commercial and public buildings
- Development of local expertise in retrofitting at scale, with new products and services
- Creation of green jobs and GVA in fabric and energy retrofits
- Reduced fuel poverty
- Demonstration of sustainable neighbourhoods creates synergies with wider transport and energy systems.

Costs

The costs to the public sector will depend on:

- The extent of public ownership of social housing retrofitted and / or created
- Sharing the costs / benefits of sustainable living.

Next steps

The Sustainable Development Partnership Board to appoint sponsors to lead the completion of a Strategic Outline Business Case.

Building Bradford's image

Aim

The aim in building Bradford's image is to provide a unifying positive image for Bradford as a place to live, work and play which can be communicated to communities within the region through the District's leaders to promote the many opportunities Bradford District offers. Over time, this will help to build the District's brand.

Rationale

Bradford District has lots to offer businesses and prospective workers, it was named the best place to start a business in December 2017 by Barclays.

Key enablers

In order to maximise impact, delivering successful results, the following requirements need to be met:

- A high-profile launch to key stakeholders to gain commitment and buy-in across public and private sector leadership.
- An agreed source and schedule of publication that local leaders / stakeholders use to identify support and opportunities under a single narrative
- Ongoing online/social media presence, centrally coordinated and shared by business leaders across the district to drive awareness and traction
- Online presence would target grass roots businesses and those in need, providing support and information
- Case study material that showcases support and resources.

Key stakeholders - roles & responsibilities

A new board of public and private local leaders will be responsible for coordinating the intervention. Members will be chosen to ensure all the diverse communities within Bradford District are represented. People from the Council, University Chamber and wider business environment will be part of the board. They will review messaging and key information from fortnightly meetings and email correspondence. A weekly business bulletin will be released across social media interfaces to provide important updates.

The Council will track progress on a monthly basis using qualitative input and KPIs such as (number of new start-ups, number of times link has been clicked, number of newly employed etc.).

The board will be responsible for driving engagement from the business community so that the narrative of the region, including 'success stories', is shared. All key organisations will need to support the narrative to provide a single voice, including the Chamber of Commerce, the Federation of Small Business and the University of Bradford.

Delivery plan

Step 1: Establish a board of leaders from across the region to feed into key messaging and track intervention progress.

Step 2: Agree the narrative underpinning the District's brand building on its assets and what they offer to target audiences

Step 3: Board of leaders to agree a communication plan & structure moving forwards identifying key topics, sectors and aims. Identify communication

streams and consolidate KPI targets, publish plan into public domain

Step 4: Highlight the launch on local gov website and other mediums, begin communications. High Profile Launch event to bring together key stakeholders and launch Bradford's narrative and engagement strategy.

Step 5 - Jun 21: The board will review progress and agree any alterations required to improve effectiveness of actions taken and adjust as necessary

Benefits

The expected benefits of successfully delivering business support simplification will be:

- Increased local pride and external reputation
- Increased inward investment by business
- Retain our young and diverse population and talent.

Costs

The cost to the public sector will be limited to the marketing budget associated with organising events, promotional activities etc. This is estimated to be c. £30k per annum.

There will be no FTEs associated with business support simplification as it would be run by a voluntary board of Bradford's leaders.

Next steps

Bradford Economic Partnership will be responsible for ensuring successful delivery of the intervention and will work with the chamber of commerce and, small business federation. Once the economic recovery plan has been approved mobilisation activities should begin to draw out the key offerings within Bradford District.

Bradford District business hub

Aim

The aim of creating the 'Bradford District business hub' is to simplify business support provide an impartial central resource, support and guidance for entrepreneurs and new start-ups based on a single body of experts working under one banner to help businesses navigate/co-ordinate business support. This will enhance current provision of support services.

Rationale

Many ongoing initiatives such as the Leeds City Region Enterprise Partnership and the Opportunity Area programme within Bradford already provide people with the skills and opportunity to create start-ups. Current business support is delivered by Business advisors and Leeds City Region SME growth managers - the latter are part funded by ERDF which focuses on high growth businesses.

Access to business support could significantly increase the survival rate of start-up businesses. Furthermore, it could enable those that are, or have been, successful to continue to grow and scale up resulting in increased employment.

Key enablers

Successful delivery of Bradford District business hub depends on:

- Building a team of business advisors with strong and well networked leadership as an evolution of existing functions including: Growth Managers, Invest in Bradford (IIB), Impact Hub, Northern MAX business support accelerator programme, MIT REAP.
- Bradford District business hub workers will be involved in three primary activities; spending

time becoming experts on what is available and developing the relevant material, delivery through the channel of choice, and support delivery and events.

- Working with the Federation of Small Businesses and the Chamber of Commerce, testing the case for a subsidised membership package for small businesses which provides them with legal, tax and employment law support along with other resources needed to recover post Covid-19.

Buy-in from external private sector leaders to support events with expert speakers and promote the events

Key stakeholders - roles & responsibilities

The intervention will require a board to be set up to oversee the formation of 'Bradford District business hub'. This will incorporate existing structures such as the Bradford Growth Hub.

Local anchor institutions such as the Council, Chamber of Commerce, Born in Bradford will be responsible for providing information on the range of existing initiatives including support delivered through the Growth Managers and IIB team.

The Growth Manager service is networked regionally and delivered locally - It's a central point for providing initial and on-going contact with SMEs, conducting diagnostics and referring into other support and grant programmes. supporting businesses in grant applications to local and regional funds.

Members will need to bring together a quality set of materials on key business topics (e.g. finance, accounting, legal, human resources, sales and marketing and online/digital awareness).

Delivery plan

Step 1: Key public and private sector leaders to form board to oversee 'Bradford District business hub' activities

Step 2: Board to recruit leader for organisation and empower to recruit business advisors

Step 3: The Bradford District business hub team to work together to create a brand, create an online presence and grow expertise in the broad range of business support available both public and private.

Step 4: Start one to one business engagement via face to face, online and telephone interactions to support local businesses to access the resources to support their growth.

Step 5: Launch ongoing business and management skills training programmes, calendar for business support workshops, promotion channels (e.g. social media), and material engaging with key stakeholders to rally support for events and provide expert input.

Benefits

The expected benefits of successfully delivering the 'Bradford District business hub' will be:

- More businesses provided with support
- More new start-ups and better survival rate
- Businesses reporting that they have better access to advice from various sources
- More growth businesses.

Costs

The estimated costs to the public sector will be:

- An initial budget of approximately £250,000 to establish the 'Bradford District business hub'
- Around £250,000 per annum to pay for staff to provide leadership, business support and establish links between different parts of the business community.

Next steps

The Bradford Economic Partnership will be responsible for selecting the board who will oversee selection of individuals responsible for forming the 'business hub'.

‘Culture is Our Plan’

Aim

The Council and the Bradford Cultural Place Partnership, supported by the Arts Council, are working to develop Bradford District’s 10-year culture strategy, ‘Culture is our Plan’. The Plan will align with local priorities for regenerating the city centre and provide spaces for culture, creativity and community. The aim is to implement the short-term priorities within ‘Culture is Our Plan’ as part of the Economic Recovery Plan.

Rationale

The District’s economy has considerable potential to benefit from cultivating new cultural opportunities by positioning Bradford nationally as a compelling destination for culture and improving the experience of citizens and visitors alike.

Key enablers

Successful delivery of ‘Culture is our Plan’ depends on:

- Responding to the insights from recent research and consultation, such as the Night-time and Evening Economy Study, City of Film Screen Strategy and City of Culture research
- Aligning key interventions with other plans and pipeline developments such as Bradford’s City Centre Area Action Plan, Top of the Town, Bradford Live and the City of Culture 2025 bid
- Engaging creative and cultural groups in defining the role of the District’s city centre and its towns
- Bradford being designated as the UK City of Culture for 2025.

Key stakeholders - roles & responsibilities

The scope of ‘Culture is our Plan’ is wide ranging. The Council and the Bradford Cultural Place Partnership will play leading roles in implementing it by:

- Driving a campaign to publicise it and, potentially, to support wider place marketing
- Identifying Council assets that could be repurposed, for example for cultural use.

Bradford District has several new and emerging stakeholders – such as City of Culture 2025, The LEAP, Bradford Producing Hub. They have a valuable role to play in delivering ‘Culture is our Plan’. It will be important to draw on them as well as more established cultural partners to convene cultural and creative groups to identify sites for cultural use.

Delivery plan

In the next two years, key activities include:

- **Step 1:** Incorporation of the findings of recent research and consultation into ‘Culture is Our Plan’
- **Step 2:** Identification of sites for capital investment / designation of cultural use: these could include Council assets which can be repurposed (e.g. Vintry House or Keighley Creative)
- **Step 3:** Undertaking a place marketing / destination management campaign to support Bradford’s City of Culture ambitions and selling the District’s distinctive offer
- **Step 4:** Consideration of how we use available resources including, but not limited to, those from the Towns Fund to support cultural development in Keighley and Shipley.
- **Step 5:** Retrofitting existing buildings to satisfy both cultural and place needs.

Benefits

The expected benefits of successful delivery of ‘Culture is our Plan’ will be:

- More cultural activity to improve the District’s chances of designation of Bradford as UK City of Culture for 2025
- Activation of a cluster of cultural and creative organisations within and around existing heritage assets
- Support for cultural groups
- Rejuvenation of Bradford District’s high streets and long term improvement of town and city centres through reuse of redundant sites
- More sharing of (new) cultural sites to reduce costs
- Improved citizen and visitor experience resulting in additional (or protected) GVA and jobs linked to the visitor economy.

Costs

The costs to the public sector will depend on the scope of the early initiatives taken forward as part of ‘Culture is our Plan’. They may include:

- The costs of making Council owned sites available as new cultural hubs
- The costs associated with a significant ‘destination marketing’ campaign
- The resources needed by an organisation, such as Producing Hub, which could become an anchor support hub for the creative and cultural sector.

Next steps

The immediate next steps are to finalise ‘Culture is Our Plan’, incorporating the key findings from research that has been carried out.

Building an inclusive health and care economy

Aim

The aim is to build an inclusive health and care economy through the power of collaboration.

Rationale

Getting anchor organisations such as the NHS, the University of Bradford and the Wolfson Centre for Applied Health Research to work together to revitalise and transform our District will enable us to create a step change in the health, wellbeing and economic prosperity of our local communities.

It requires Bradford to develop a highly effective and compassionate integrated workforce based on a world class medical, health and care learning infrastructure, translating the latest technologies and research quickly into practice.

Key enablers

The creation of a world class interdisciplinary health and care learning centre and strong collaboration that will accelerate:

- Transformation to integrated place-based health and care delivery.
- Adoption and integration of digital solutions into health and care delivery models and interventions
- Development of an agile workforce
- Creation of a health and care workforce that harnesses and liberates the talents of the diverse population of Bradford
- Creation of a unique Bradford medical education and training undergraduate programme centred on prevention and community based integrated care – including support the development of for

a business case for a medical school at the University of Bradford

- Alignment of key organisations' investment in the District to improve social and economic outcomes.

Key stakeholders - roles & responsibilities

The key stakeholders are those organisations who are committed to a collaborative approach through the Health and Social Care Economic Partnership that will promote ongoing dialogue and deepening collaboration around core strategic objectives. They will act as a catalyst to help fund projects to transform the health and care workforce, the built environment, and the lives of residents.

Delivery plan

Step 1: Continue and broaden the aim and intent of collaboration between key organisations in the priorities of the Health and Social Care Economic Partnership

Step 2: Continue to shape and drive integrated approaches to workforce development with a focus on the full talent pipeline: recruitment, education and training, career development and retention

Step 3: Further develop the One Workforce website showcasing the District and the sector and providing resources that enable a system-wide approach to recruitment, education and training, career development and retention

Step 4: Review and refresh the Community Recruitment Strategy and progress the focus from community outreach to establishment of a system-wide approach to recruitment

Step 5: Establish a system approach to evidence based workforce planning based on shared data analytics, through the creation of the workforce observatory

Benefits

The expected benefits are:

- Bradford pioneering social inclusion models to grow health and wealth that are reflective of local communities, thus improving health, well-being and economic prosperity
- World class education and training infrastructure that will enable us to train, develop and retain our talent
- Healthier fairer futures for children living in deprived areas through improved environments that influence health (Act Early).

Costs

The estimated costs to the public sector are:

- £50 million - medical, health and social care infrastructure
- £35 million - to deliver health and social care training infrastructure
- £2.5 million to deliver the partnership priorities at pace
- £500k – communications plan.

Next steps

The next steps are to agree the HSCEP delivery plan for the next three years and secure future financial sustainability.

Act Early North

Aim

The aim of Act Early North is to provide policy makers with the evidence needed to inform cost-effective preventive health policy and early years interventions in the lives of young people. This, in turn, aims to improve population health, reduce the cost of dealing with non-communicable diseases and create a healthier workforce.

Rationale

Evidence suggests that prevention of ill health is more cost effective than developing a cure or managing diseases: every £1 spend on prevention provides £14 of benefit.³⁹ Prevention is also clearly preferable to patients and will support the better health of the general population.

Investing in ActEarly North will help support the economy in the Bradford District by working with local initiatives to improve the workforce by bringing jobs, training and investment to Bradford.

Key enablers

Successful implementation of Act Early North will require collaboration with various ongoing programmes within Bradford. Clear marketing of the opportunities is needed to engage local people: up to 50,000 people will need to engage with the system to form the test bed.

Key stakeholders - roles & responsibilities

Collaboration will be needed between many stakeholders within the region to maximise the likelihood of its success and impact, including:

- Local initiatives such as Bradford Institute for Health Research, Born in Bradford
- Digital learning partnership with key national industry partners such as the BBC, Channel 4 and Lego
- Suitable data gatherers within the region to provide consented data linkages on maternal and child cohorts.

Delivery plan

Step 1: Secure funding to recruit a suitable team and a budget for key activities

Step 2: Establish the Act Early North workforce within Bradford including a core operational team, data and implementation team, and digital makes outreach team

Step 3: Develop relationships with local organisations including data providers, education institutions, the private sector etc

Step 4: Build on the research plan to develop a detailed step-by-step plan from start to finish outlining the key actions and forecasted outcomes.

Benefits

Estimated benefits include:

- The direct output benefits of a research centre are estimated to be £12 million per annum
- The increased in private sector research investment in Bradford and West Yorkshire is estimated to be £6.2 million per annum
- The consequential, additional employment benefits are estimated to be £9 million per annum
- Improvement of digital skills within the local population

- An improved evidence base on early interventions and subsequent public sector savings.

Costs

Costs are expected to total approximately £2 million a year. A more detailed breakdown outlines the cost over five years:

- Leadership costs £954k
- Core operational tea million £2m
- Data and implementation tea million £3.5m
- Digital makers outreach centre £2.2m
- Activities and innovation budget £1.4m

Next Steps

If Act Early North is to progress, funding needs to be secured from the West Yorkshire Combined Authority and central government. This will allow the initiative to progress into more detailed planning.

³⁹ Masters et al, 2016. Return on investment of public health interventions: a systematic review. JECH, 71 (8) <https://jech.bmj.com/content/71/8/827>

Northern Powerhouse Rail

Aim

This intervention aims to secure commitment for Bradford city centre station on the new Northern Powerhouse Rail (NPR) line.

Rationale

Bradford is the largest place in the UK without a rail through route. A city centre station on the NPR line would completely alter the transport links between Bradford and other key northern cities. It would reduce the journey time from Bradford to Manchester to 20 minutes from 1 hour; likewise, the time to Leeds would fall from 20 minutes to 7.

Analysis shows that a better connected Bradford would add approximately £1.3 billion to the regional economy each year. It is a critical need that will shape the growth of Bradford's economy. It will transform connectivity with Leeds, joining two of the largest and fastest growing cities in the UK.

A NPR link will put Bradford District on the map, transforming the area's brand, making it more attractive. It will attract inward investment and help unlock the latent potential of the District's assets.

Key enablers

To secure a city centre station on the NPR line requires:

- A clear implementation plan of how the new rail link would be implemented
- Collaboration between the NPR programme board and other key stakeholders to demonstrate the magnitude of the benefit to the District
- Alignment of the NPR plan for Bradford District to other policies and plans, for example the WYCA connectivity strategy, TfN strategic transport plan and national plans and policies

Key stakeholders - roles & responsibilities

To realise the District's ambition, a concise approach is needed.

Local leaders need to be clear and consistent in their narrative and ask of TfN. Clearly articulating the benefit and alignment to national priorities will make the case all the more compelling.

There will need to be collaboration from members of the public and private sectors to show the benefit that linking to NPR would bring for Bradford, but also for the wider Northern region.

Delivery plan

Step 1: Build on the progress made by the Bradford NPR programme board helping them produce work evidencing the benefits and working with Bradford District Metropolitan Council to support engagement with Transport for the North. This will help inform a detailed NPR Growth Strategy.

Step 2: Additionally, the NPR programme board will progress existing plans and key action areas which will make the business case more compelling and will also make the NPR links more impactful should it be approved. These key action areas are: regeneration and spatial planning, developing the economic case, skills and supply chain, local connectivity, delivery and funding mechanisms, and governance.

Step 3: Bradford will work with TfN and Government to make the case for devolved fiscal powers, which could potentially support investment in interventions to maximise the benefits of NPR

Benefits

The provision of a new high-speed rail connection will provide important benefits worth £1.3 billion each year for the region. These include:

- Improved access to job opportunities across the North, helping to ease unemployment
- Improving business access to new markets
- Supporting regeneration of the city centre through increased opportunities and access.

By 2060 NPR is forecasted to benefit Bradford District by providing:

- 14,250 net additional FTEs
- £14.6 billion additional GVA

Costs

The principal short-term costs are those associated with continuing to make the case for a city centre station in the District.

Next Steps

Following the agreement of the TfN Board in November 2019 that Bradford city centre should be on the preferred NPR network, additional master planning work is needed around the potential NPR location and Southern Gateway opportunity.

Sustainable food supply system

Aim

The aim of this intervention is to build on the District's existing assets and activity to develop a sustainable food supply system. This would mean increased local sourcing, better availability of affordable healthy food, reduced environmental impact and improved resilience to external shocks. By engaging strategically with diverse communities, local producers, processors, wholesalers and retailers of food, caterers, restaurants and fast-food outlets, Bradford District can build a reputation as a sustainable food hub for the North of England.

Rationale

Bradford District's physical geography and its farmers and growers/producers offer real potential for the development of a sustainable food supply chain, from farm to fork. Food insecurity is a chronic and growing issue in the District, with a sharp increase anticipated in 2021. Poor childhood nutrition is an ongoing area of public health concern which is being addressed by Act Early. Furthermore, one of the effects of Covid-19 has been to favour local production.

Key enablers

Successful delivery depends on:

- Development of a compelling vision and strategy for a sustainable food supply system in the Bradford District that addresses key impacts across environment, health, deprivation, economy and culture
- Engagement and partnership working across the Sustainable Development Partnership Board, local food businesses, the Council, the NHS, other businesses and communities

- Alignment with local, regional and national priorities and initiatives, including the Agriculture Act and National Food Strategy, expected in 2022.

Key stakeholders - roles & responsibilities

The Sustainable Development Partnership Board will be responsible for developing the business case, including defining the objectives and delivery plan. It will require the support of the Council, the NHS, local producers, businesses and communities to work in partnership. It will do this by establishing a Sustainable Food System Council with leaders of local food businesses.

Delivery plan

Step 1: Develop the Strategic Outline Business Case for a Bradford District sustainable food supply system, and test it with stakeholders. Ensure that this works with the Act Early public health initiative, with clearly defined remits.

Step 2: Establish the business-led Bradford Sustainable Food System Council (BSFSC) to scope and prioritise areas for development and assess Bradford District's existing capabilities and opportunities for re-positioning and growth.

Step 3: BSFSC identifies, aligns and engages with, the key local / regional / national stakeholders and exemplars relevant to its priority areas (e.g. Council, University and NHS catering, Farm to Fork) as well as potential sources of funding.

Step 4: BSFSC secures data to evidence business case for interventions and engages stakeholders to secure necessary funding.

Step 5: Delivery of plans to develop a sustainable food supply chain and system, enhancing the capabilities and USPs of local food producers and food system businesses. Use insights to improve timely food insecurity interventions.

Benefits

The expected benefits of successful delivery of a sustainable food supply system are:

- Higher revenue for the local supply chain
- Greater food security and access to nutrition
- Reduced CO₂ emissions.
- More sustainable use of resources
- Preservation of soils and biodiversity
- Improved health outcomes e.g. reduced obesity
- Greater community cohesion
- Development of Bradford's reputation as a sustainable food cultural centre
- Creation of green jobs and GVA.

Costs

The costs to the public sector will depend on:

- The funding model for improved health impacts and benefits to the high street
- The extent to which this intervention is supported and driven by private sector partners (e.g. local producers and large food retailers).

Next steps

The Sustainable Development Partnership Board to appoint sponsors to lead the completion of a Strategic Outline Business Case.

Supply chain for hydrogen LGVs

Aim

Plans for battery electric vehicles (BEVs) have so far been prioritised but the role of Fuel Cell Electric Vehicles (FCEVs) will be important due to their different range, performance, supply chains, refuelling time and infrastructure.

The aim of this intervention is to position Bradford's automotive businesses to win opportunities in the FCEV supply-chain through having a UK 'test-bed' fleet of hydrogen Light Goods Vehicles (LGVs). There is a particular opportunity because of the bespoke nature of assembly of some LGVs which is a strength of local companies (e.g. VCS ambulances).

Rationale

A Bradford District based LGV fleet of a size that would support the infrastructure for hydrogen refuelling would be achieved by coordinated procurement across public and private sector businesses of LGVs from current and soon-to-be available FCEVs.

Further opportunities would be anticipated once the infrastructure for green hydrogen is created and the potential to bid for the Government's planned 'hydrogen town' should be considered.

In addition, the Government ban on the sale of new petrol and diesel cars from 2030 means this intervention will help the District's existing manufacturing base transition towards a growing, future market.

Key enablers

Successful delivery depends on:

- FCEVs being competitive with BEVs.

- Engagement and partnership working across the Sustainable Development Partnership Board, CBMDC, NHS, local and national manufacturers and businesses
- Alignment with local, regional, national and international priorities and initiatives on green hydrogen and FCEVs.
- Working with supply chain companies to establish viable refuelling infrastructure and service models.
- Coordinated procurement across local public and private sector businesses of LGVs from current and soon-to-be available FCEVs.
- Local businesses innovate products and services in the supply chain of FCEV LGVs.

Key stakeholders - roles & responsibilities

This intervention will require the Sustainable Development Partnership Board, CBMDC, local and national manufacturers, key organisations and businesses to work in partnership. It will be led by a sponsor on the Sustainable Development Partnership Board.

The Sustainable Development Partnership Board will be responsible for developing the business case.

Delivery plan

Step 1: Develop a Strategic Outline Case for the intervention, supported by technical / engineering feasibility and cost modelling.

Step 2: Engage with local businesses to assess Bradford's existing capabilities in FCEV LGV fleets and the opportunities for growth.

Step 3: Identify the key local / regional / national / international stakeholders, organisations and initiatives to align and engage with, and explore these as

sources of funding for infrastructure and potential inward investors in the supply chain.

Step 4: Convene a consortium of local LGV fleet operators (e.g. CBMDC, NHS, logistics companies), existing Bradford automotive businesses and associated supply chain businesses to engage and partner with key stakeholders to build the business case and funding model.

Step 5: Commercial agreements in place for infrastructure, green hydrogen sourcing and signed up to by FCEV LGV fleet participants.

Step 6: Delivery programme for infrastructure and procurement of local LGV fleets. Supply chain development for FCEVs.

Benefits

The expected benefits of successful delivery of a supply chain for green hydrogen light commercial vehicles are:

- Reduced CO₂ emissions, more effective use of green electricity and better air quality (in line with CBMDC's plans for a Clean Air Zone) .
- Development of local supply chain and innovation in FCEVs.
- Establishment of 'test-bed' green hydrogen infrastructure leads to further opportunities.
- Creation of green jobs and GVA.

Costs

The costs to the public sector are to be determined.

Next steps

The Sustainable Development Partnership Board to appoint sponsors to lead completion of a Strategic Outline Business Case.

Circular economy demonstrator

Aim

The aim of developing a circular economy demonstrator is to encourage local businesses to invest in the reprocessing of recycled or by-product materials.

Rationale

Building the circular economy is a key principle of the District's long-term economic strategy.

The ambition is to attract innovation funding and inward investment by making industrial space and infrastructure available - hosted by local businesses - and so reduce the investment barrier.

With a number of key investments, a 'Circular Economy Business Park' could act as an exemplar of the circular economy in the UK and address some of the District's environmental challenges such as low recycling rates, while also providing new green jobs.

Key enablers

Successful delivery depends on:

- Engagement and partnership working across the Sustainable Development Partnership Board, CBMDC, local businesses and communities
- Alignment with local, regional and national priorities and initiatives
- Discussion with local business(es) to co-develop proposals that meet the ambition of this intervention and the development of a distinctive

proposition for the creation of a national circular economy demonstrator in the Bradford District

- Necessary permits and planning are approved by relevant authorities.

Key stakeholders - roles & responsibilities

The Sustainable Development Partnership Board will be responsible for developing the Strategic Outline Business Case for the circular economy demonstrator, including defining its objectives and delivery plan.

This intervention will require the Sustainable Development Partnership Board, CBMDC, local businesses and communities to work in partnership. It will be led by a sponsor on the Sustainable Development Partnership Board.

Delivery plan

Step 1: Develop a Strategic Outline Case for the Circular Economy Business Park and engage with local candidate(s) industrial sites.

Step 2: Assess the potential of local sites that have synergies with existing businesses and the potential for attracting inward investment of new processes. This step includes initial discussions with relevant authorities (by local business).

Step 3: Identify the key local / regional / national stakeholders, organisations and initiatives to align and engage with, and explore sources of funding for innovation and inward investment.

Step 4: Relevant authorities consider application by local business of proposal, with support of the Sustainable Development Partnership.

Step 5: Begin the construction of the demonstrator site.

Step 6: Investment in the processing of recyclates to address national capacity gaps and meet local needs at the demonstrator site by existing and new businesses. Attract innovation funding in collaboration with the University of Bradford.

Benefits

The expected benefits of establishing a circular economy demonstrator are:

- Reduction in resource usage through industrial symbiosis.
- Demonstration of the circular economy creates synergies with other businesses in supply chain(s).
- Development of local expertise in circular economy with skills and start-up spin-offs.
- Creation of green jobs and GVA.

Costs

The potential costs to the public sector will be determined as part of the development of the Strategic Outline Business Case.

Next steps

The Sustainable Development Partnership Board to appoint sponsors to lead the completion of a Strategic Outline Business Case.

‘Greening the District’

Aim

One of the key aims of ‘Greening the District’ is to enhance public access to green space.

Consideration is also being given to creating Community Improvement Districts and low traffic neighbourhoods.

Rationale

Covid-19 has accelerated the need to improve community wellbeing by improving public space. Developing new, crowd-sourced green spaces, for example a new green park in Bradford’s city centre, will improve wellbeing across the community. It will also serve as a symbol at a key gateway in the District and align with local priorities for regenerating the city centre whilst providing space for culture, creativity and community.

Key enablers

Successful delivery of ‘Greening the District’ will build on work already underway, for example through Transforming Cities, the Towns Fund and active travel schemes. It will also depend on:

- Integrating delivery with the City of Culture 2025 bid, other developments and city centre master plans (e.g. Top of the Town)
- Engagement and collaborative working across the Council, including the relevant stakeholders in District planning, and the Sustainable Development Partnership Board.

Key stakeholders - roles & responsibilities

Work on ‘Greening the District’ is expected to be led by the Council working in conjunction with the Cultural Place Partnership and Sustainable Development Partnership.

Active involvement of the District’s creative and cultural industries will contribute to better placemaking.

The identity of the other key stakeholders depends on the ownership of sites for possible development.

Delivery plan

Early work is needed to develop the business case for ‘Greening the District’. This involves:

- **Step 1:** Completing a feasibility study for the creation of a permanent, green urban park in Bradford city centre, including consideration of whether to use the derelict site at Forster Square
- **Step 2:** Launching a design competition for a green urban park
- **Step 3:** Engaging on the location and style of parks with citizens, cultural groups and other stakeholders as part of a District-wide consultation about public space
- **Step 4:** Establishing a Land Commission for Bradford District to examine whether and how more vacant sites can be brought into beneficial use, especially close to the city centre
- **Step 5:** Developing proposals in line with the vision of ‘Greening the District’ for inclusion in Towns Fund activities in Keighley and Shipley
- **Step 6:** Examining the potential case for creating Community Improvement Districts
- **Step 7:** Assessing the feasibility of new mixed-use culture / leisure community centres
- **Step 8:** Investigating the possible role of Low Traffic Neighbourhoods.

Benefits

The potential benefits of successful delivery of ‘Greening the District’, in particular creation of a new

urban park in the city centre and other urban green spaces around the District, will be:

- Improved physical and mental wellbeing across the community
- Creation of a more favourable environment for private sector investment (based on better use of public space)
- Greater citizen participation in placemaking
- Greater community cohesion
- Improvements to the public realm which enhance the experience of both citizens and visitors, in line with the ‘Culture is our Plan’ strategy
- A bigger contribution to Bradford District’s economy through support for more green jobs.
- Establishment of new low traffic neighbourhoods would potentially repurpose streets making them safer and reducing CO₂ emissions.

Costs

The potential costs to the public sector will depend on the scope of the initiatives taken forward under the banner of ‘Greening the District’.

Next steps

The immediate next step is to consider the proposal as part of the District’s local planning framework, which is currently under review.

Heritage Action Zone

Aim

The aim of this intervention is to assess the potential for designating Little Germany as a Heritage Action Zone (HAZ) so as to drive its transformation into a regional creative centre.

Rationale

Designating Little Germany as a HAZ has the potential to transform the creative quarter from what is currently a low value site into a regional creative centre. It would combine heritage, legacy and placemaking and help to regenerate the area by providing new living, work and leisure space. It would also support the business needs of the culture and creative industries as well as improving the visitor and citizen experience.

Key enablers

Key considerations in assessing the potential of HAZ designation for Little Germany are:

- Confirming the likely effectiveness of HAZ designation in changing investor behaviour
- Obtaining buy-in from both local public and private sector partners and aligning with the plans of the West Yorkshire Combined Authority (e.g. whether the emerging West Yorkshire Mass Transit Network makes Little Germany more accessible)
- How well it aligns with local priorities for regenerating Bradford city centre as part of the City Centre Area Action Plan by providing spaces for culture, creativity and community
- Whether heritage buildings can be identified which are suitable for sole traders and SMEs within the cultural and creative industries

How Bradford Playhouse is repositioned as a cultural anchor, aligned with Bradford's City of Culture bid for 2025.

Key stakeholders - roles & responsibilities

The Council along with the Bradford Cultural Place Partnership will play key roles in assessing the potential of HAZ designation for Little Germany and developing a subsequent Strategic Outline Business Case. They will need to engage with other private and public sector partners to identify how they can work together to fund and develop Little Germany.

Delivery plan

Early work is needed to assess the potential and test the feasibility of HAZ designation for Little Germany as part of developing a Strategic Outline Business Case. This includes:

- **Step 1:** Establish a working group building on the legacy of the Little Germany Action Group
- **Step 2:** Consider how the designation of Little Germany as a HAZ would fit in with other developments and city centre master plans
- **Step 2:** Consult with public sector partners and private sector investors to gauge and test interest in the HAZ proposal
- **Step 3:** Assess interest from cultural and creative organisations in reusing the heritage buildings
- **Step 4:** Examine the feasibility and desirability of creating a low traffic neighbourhood and other activities and streetscape investments as part of the HAZ
- **Step 5:** Prepare a report into potential HAZ designation for Little Germany.

Benefits

The potential benefits of designating Little Germany as a HAZ are:

- Transformation of the creative quarter of Bradford leading to more street-level commercial use, more residents living in Little Germany and better use of public space
- Creation of a new digital, creative and cultural industries cluster in the city centre which supports wider regeneration
- Better use of space in an area where one third of buildings is currently vacant.

Costs

The costs to the public sector will depend on:

- The outcome of the decision to designate Little Germany as a HAZ.
- The extent to which the HAZ proposal is supported and driven by private sector partners.
- The extent of the development plans for the Little Germany site.

Next steps

The immediate next steps are for the Council to allocate officers from the Conservation and / or Landscape teams to begin work on assessing the potential for HAZ designation and establish a working group.

Report of the Strategic Director of Place to the meeting of Regeneration and Economy Overview and Scrutiny Committee to be held on 19th January 2021

P

Subject: “Culture is Our Plan”

Summary statement:

This report provides a briefing to members on the work in progress on development of a new 10-year cultural strategy for Bradford district.

The strategy is entitled “**Culture is Our Plan**” and is being developed by the Bradford Cultural Place Partnership, funded by Bradford Council and Arts Council England.

This report gives members the opportunity to note the progress being made and to give comment on the draft vision and headline strategic ambitions, which are informed on the engagement and information gathered to date.

The first iteration of “**Culture is Our Plan**” is scheduled to be completed and launched by the Bradford Cultural Place Partnership in March 2021.

Jason Longhurst
Strategic Director (Interim),
Department of Place

Portfolio: Place

Report Contact: Nicola Greenan
Principal Officer for Cultural Partnerships
Phone: (01274) 431301
E-mail: nicola.greenan@bradford.gov.uk

Overview & Scrutiny Area:

Regeneration and Environment

1. SUMMARY

- 1.1 This report provides a briefing to members on the work in progress on development of a new 10-year cultural strategy for Bradford district.

The strategy is entitled “**Culture is Our Plan**” and is being developed by the Bradford Cultural Place Partnership, funded by Bradford Council and Arts Council England.

This report gives members the opportunity to note the progress being made and to give comment as stakeholders on the draft vision and headline strategic ambitions, which are informed on the engagement and information gathered to date.

The first iteration of “**Culture is Our Plan**” is scheduled to be completed and launched by the Bradford Cultural Place Partnership in March 2021.

- 1.2 The ambition is for “**Culture is Our Plan**” to be co-created with and owned by the cultural sector and the people of the district. It has been developed through listening and asking questions, through chats, artistic commissions, workshops and surveys with the ambition of connecting to people in every corner of our district and with the artists and creative organisations that make up our extraordinary cultural scene.
- 1.3 “**Culture is Our Plan**” also aims to be agile and responsive and to stay fresh to the needs of the district, evolving across the ten-years of its life.
- 1.4 COVID 19 has made this process very challenging to achieve but we have benefitted from an unprecedented amount of public and sector consultation on arts and culture undertaken across the district since 2019 and in particular with communities least engaged in traditional cultural activity.
- 1.4 This has enabled us to concentrate our recent work on addressing gaps in existing knowledge. It has also allowed us to avoid consultation fatigue with some communities and parts of the sector.
- 1.5 To ensure that the spirit of co-creation and co-ownership is maintained, the plan will be launched to the public with an exhibition of work made as part of its development. The launch will itself be an opportunity to encourage further public consultation and comment as the plan will never stop evolving.

The plan will then be refreshed every two years through an annual gathering of the cultural sector, public events, exhibitions and roadshows, sharing a dashboard of progress made, listening to people’s views and co-creating future iterations of the “**Culture is Our Plan**”.

- 1.6 Half way along the lifetime of the plan we aim to become the UK City of Culture 2025. Winning this designation would put rocket fuel in our tank and accelerate us faster into a better future. But whether we win that accolade or not, “**Culture is Our Plan**” will stand, and should be the guide for us into a better, more creative and more successful Bradford for everyone.

2. BACKGROUND

- 2.1 The need for a new cultural strategy for the district was reported to REOS in October 2019 alongside a suite of other recommendations for strategic investment in new cultural activity which were approved by Council Executive in February 2020.
- 2.2 This strategic investment of £1,435,000 has already levered £3,560,000 of new investment into Bradford District and led to considerable success including:
- Establishment of the Bradford Culture Company¹ and recruitment of Richard Shaw as its director and creation of a new team to lead on the bid to be UK City of Culture 2025
 - Successful bid won to establish THE LEAP an Arts Council England Creative People and Places programme for the district which over 10 years will focus on the celebrating and growing cultural activity in the 12 most deprived ward areas of the district: Bradford Moor, Bowling and Barkerend, City, Eccleshill, Great Horton, Keighley Central, Keighley West, Little Horton, Manningham, Royds, Toller and Tong
 - Successful bid to win status as an Arts Council Producing Hub pilot to share resources and provide training, mentoring and business development for artists and small businesses in the performing arts
 - These successes are as a result of sector lead approaches and wide collaboration across the sector with the Council supporting this work. This is a significant change in Council action which has seen BMDC become an enabler of the sector rather than leading on bids and projects itself, which it had done previously and with little success.
- 2.3 As agreed in October 2019, the existing Bradford Council Cultural Strategy, '**A Leading Cultural City**' is set to expire in 2024. It is clear that the landscape and opportunities have changed significantly for the City and the existing plan has been overtaken by events.
- 2.4 As part of the requirements of bidding for UK City of Culture, DCMS will require an up-to-date cultural strategy. Both Arts Council England and National Lottery Heritage Fund have recently launched new ten-year strategies which focus on the wider public and welcome new approaches from Museums, Galleries and Libraries amongst others. The city needs a fresh cultural framework to take advantage of these and other emerging local, national and regional funding opportunities.
- 2.5 Bradford District has a wealth of cultural assets. The District has stunning landscapes, heritage buildings, great cultural organisations, entrepreneurs and venues. Bradford is home to the UK's first UNESCO City of Film designation.

¹ The Bradford Culture Company is currently working toward charitable status and is doing so in line with legal guidance in regard to the Council constitution and as noted to the Executive in February 2020

2.6 The opportunity for Bradford in developing its cultural and creative sector is significant.

The 'cultural and creative industries sector' includes individuals and/or organisations which operate as creative businesses and/or deliver creative services. This includes but is not limited to:

- Advertising and marketing
- Gaming and computer services
- Architecture
- Museums, galleries and libraries
- Dance, Music, Theatre and cultural festivals
- Literature, Poetry and Publishing
- Design: product, graphic and fashion
- Visual arts and crafts
- Film, TV, video, radio and photography

UK's cultural and creative industries have been an international powerhouse and, prior to the coronavirus pandemic were the fastest growing sector of our economy. Government statistics published in February 2020 showed that in 2018 the UK's creative industries contributed more than £111 billion to the UK economy, equivalent to £306 million every day or £13 million every hour. That's more than the automotive, aerospace, life sciences and oil and gas industries combined. This was a 7.4 per cent increase on 2017, so growth in the creative industries was more than five times larger than growth across the UK economy as a whole.

Meanwhile statistics released in February 2020 show the creative industries have increased their combined contribution to Gross Value Added (GVA) by 43.2 per cent in current prices since 2010. More than 2 million people worked in the UK's creative industries and, before the COVID-19 crisis, the sector was projected to create another million jobs by 2030. Jobs in the creative economy also tend to be higher value, better paid and be more skilled than the average in the wider economy.

2.7 Bradford's sector does benefit from some investment by Arts Council England. However, despite being the 5th largest local authority by population in England, Arts Council England investment is ranked only 78th out of 180 authorities. Whilst the district has eleven ACE National Portfolio Organisations (NPO's), these are relatively small entities compared to other cities of similar size (there is no major orchestra here and no theatre company on the scale of Sheffield Crucible or Leeds Playhouse) and there is just one NPO in visual arts and one in dance. Whilst there were new NPO awards for the Literature Festival, Bronte Society and Common Wealth in 2018/19, the city still has no major producing theatre or music NPO.

2.8 Bradford's cultural provision is also not evenly distributed across its communities and this lack of provision contributes to low levels of engagement. Audience Agency data for Creative People and Places shows that 53% of the district population are in the lowest / least engaged Culture Segments compared to an England average of 33%. 80% of the people in the 12 most deprived wards of Bradford are in these lowest engaged Culture Segments.

- 2.9 The immediate success of BMDC's new enabling role and strategic investments in leveraging substantial new funds to the district and creating new jobs and capacity in the sector means that the District is at a tipping point regarding culture and in turn, the way it is perceived and its ability to compete as a major UK city.

Work to date

- 2.10 The Bradford Cultural Place Partnership commissioned "**Culture Is Our Plan**" with funds from BMDC and Arts Council England. The Bradford Cultural Place Partnership is chaired by the Leader of the Council and attended by Chief Executive and Portfolio Holder for Culture. The Place Partnership membership includes leaders of the major strategic cultural initiatives in the District: Bradford University and College, The Creative People and Places programme The Leap, led by Bradford Institute for Health Research, the Bradford Producing Hub, UNESCO City of Film and senior managers from key stakeholders including Arts Council England (ACE) and National Lottery Heritage Fund (NLHF). Representatives from the independent cultural sector nominated by the Cultural Voice Forum are also members.
- 2.11 BMDC lead officer for cultural partnerships has led a consultative and co-created process since June 2020, to place the cultural sector and the public at the heart of this strategy development.
- 2.12 The aim is to develop a strategy which is owned by and is reflective of the diverse communities and geographies of district and the cultural sector and its potential for growth.

To this end we have worked extensively with the Bradford Cultural Voice Forum. The Cultural Voice Forum is a cultural sector network, chaired by sector representatives Alex Croft (Director of Kala Sangam) and Kirran Shah and coordinated by Bradford based arts organisation Brick Box. The Cultural Voice brings together more than 250 artists and cultural organisations across the district to share sector knowledge, experience and opportunity. Together, we have conducted more than 15 hours of focus group work with 200+ leaders of cultural and heritage organisations and individual artists and freelancers to date.

We are also holding individual consultations with all of the district's National Portfolio Organisations: Kala Sangam, Freedom Studios, Ilkley Literature Festival, Bronte Parsonage, Common Wealth, Theatre in the Mill, Impressions Gallery, Artworks, Mind the Gap, Dance United Yorkshire, Bradford Literature Festival and other significant cultural partners such as National Science and Media Museum and NEC the incoming operators of Bradford Live.

- 2.13 This strategy development sits in the context of an unprecedented level of sector and public consultation about culture in the district over the last two years, starting with work by Culture Creativity Place Ltd to explore the feasibility of bidding to become UK City of Culture 2025.

It was therefore vital to avoid consultation fatigue and at the same time to ensure that the views of communities, artists and individuals collected through these processes were not lost and were considered as part of the development of **Culture**

Is Our Plan. To do this we have:

- Collated a resource of existing data, consultation sessions and previous reporting on culture across the district within the last two years and revisited consultation sessions carried out by (amongst others):
 - Bradford 2025 Bid feasibility and the extensive consultations 121 and in focus groups as part of the current bid development work led by Richard Shaw
 - Creative People and Places consultation, bid and business plan (which focussed on the 12 most deprived ward areas of the district)
 - Bradford Producing Hub Bid, business plan and their Bradford District Joint Cultural Needs Analysis (JCNA) produced for Arts Council England
 - Bradford Local Cultural Education Partnership (LCEP) Action Plan
 - BMDC Visitor Profile Research 2018 2019 (NGI Solutions)
 - Museums and Galleries / City Hall feasibility (Amion and Black Radley)

- We have also drawn on national and international data sources from ONS/NOMIS, Arts Council England and National Lottery Heritage Fund and British Film Institute including:
 - Audience Agency Area Profile Reporting 2019 (which includes Experian and Mosaic data on the district)
 - Active Lives Survey (Ipsos Mori) 2017
 - EU Cultural Creative Cities Monitor an online resource that ranks creative cities by comparing '3Cs': Cultural Vibrancy, Creative Economy and Enabling Environment of 168 cities across Europe
 - 20 Years of Lottery Funding of Heritage in Local Areas: Bradford (report by Britain Thinks 2015)
 - As well as local resources such as the excellent Understanding Bradford District intelligence bulletins by BMDC.

- Individual arts organisations have generously shared relevant independent research that they have commissioned including the annual benchmarking studies for Bradford Theatres and the National Science and Media Museum.

- We have drawn on the learning of other relevant work in the district including:
 - Bradford Economic Strategy
 - Bradford Economic Recovery Plan
 - Extensive public consultation work undertaken by BMDC Neighbourhoods team / Social Kinetic for the MHCLG Bradford for Everyone programme
 - Wellbeing board Integration and Better care fund Narrative Plan 2017-19
 - Bradford District destination management plan 2016
 - Public Health Joint Strategic Needs Assessment
 - BMDC standard comparators: CIPFA Nearest Neighbours / Children's Services statistical neighbours / Police most similar groups / YOT statistical neighbours

We are also working closely with other major pieces of strategic work currently underway and which will have an important place in the first iteration of **“Culture is our Plan”** including:

- Screen Strategy for Bradford District (Under the Moon)
- Forward plan for BMDC Museums and Galleries

Consultation sessions in groups and 121 continue to take place; with Producing Hub Creativity Council, young emerging leaders via Common Purpose, Headteachers, Bradford for Everyone community ambassadors, business and community leaders.

Where specific gaps in knowledge and/or existing recent consultation exist (and to address specific DCMS City of Culture bid questions), we have partnered with Bradford 2025 bid to cost-efficiently co-commission new independent pieces of work which by the end of January will include:

- Survey of Cultural Workforce and Governance (Anne Franks)
- Cultural asset mapping and economic impact and potential of cultural and creative industries 2020 (Burns Owen Partnership)
- Bradford City Night time economy (Sound Diplomacy)
- Audience Baseline and Audience Development (Indigo)
- Culture Tourism mapping and economic impact and potential of Visitor Economy (NGI Solutions)

All of these independent research programmes are overseen and peer reviewed by a research reference group led by Professor Marcus Rattray of Bradford University.

We have also sought to address gaps in specific community engagement through a programme of artist-led consultation and engagement projects (see attachment) with 270 participants including with:

- Rural communities
- Participants in South Asian Heritage Month
- Learning disabled adults
- Communities in Ilkley, Keighley and Shipley
- Young people not in employment, education or training
- Black artists in the district

Due to their size and capacity, very few of Bradford’s arts organisations currently operate box office systems or have access to rich customer data. Therefore, to hear the views of existing arts attenders and participants across Bradford district we also ran an informal public opinion survey called CULTURE AND ME (see attachment)

We also used this survey to raise the profile of Culture is our Plan with the general public and capture indications of wider public perceptions and engagement with culture in the district

- Simple light-touch online survey – easy to complete and no personal data collected to ease distribution
- Distributed via various channels
- General public via Telegraph and Argus, BMDC and VCS email lists and Facebook, Twitter and Instagram
- Arts attenders via Cultural organisation email lists / social channels and Bradford 2025 Bid social and email

- Survey open for 30 days Oct 2020

1700 responses were gained and whilst there are caveats to the report, not least that is deliberately skewed toward attenders and participants at our existing arts can and cultural offer, it offers useful perspectives which reinforce the issues and opportunities which have emerged elsewhere and consistently in the work in regard to:

- The value placed on culture and the high level of engagement with it
- People's wide definition of culture and the range of unconventional places where culture is accessed
- The need for Art and Culture to better reflect the rich diversity and vibrancy of the district and the lived experience of people here
- The need for more opportunity and a better distribution of cultural opportunity and resources across the geography of the district and especially into the poorest neighbourhoods
- The importance of culture to bring different communities together
- The significant role for young people in shaping the future of the district

Nature of the plan and next steps

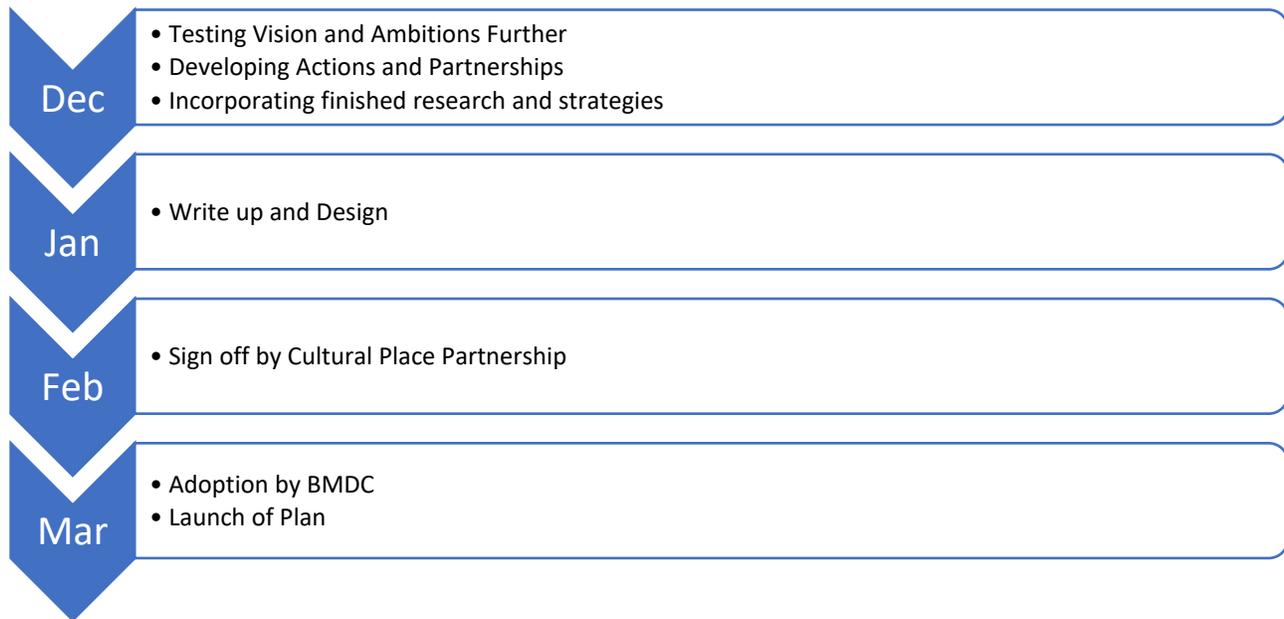

2.14 The development of **Culture Is Our Plan** has been recognised in the Culture and Place workstream of the new Bradford Economic Recovery Plan.

Now we have established a draft vision and ambitions we are engaging and re-engaging with key stakeholders including Arts Council England, National Lottery Heritage Fund, Bradford University and Bradford College, BIHR, the emerging Bradford Cultural Education Partnership and the Industry Centre of Excellence (ICE).

We see the Regeneration and Economy Overview and Scrutiny Committee as one of these important stakeholder groups.

We have also returned to many key community voices in the existing bodies of work to gain further insight, such as Inspired Neighbourhoods and Bradford Moor Pass and Black Artists Group and we are closely engaged with other directorates within BMDC where there are important linkages to be made including: Health and Wellbeing and Children and Young People.

The detail of the final plan will be completed during January and February as research reports and consultation on the draft vision and ambitions is completed. A tender for designer will be issued in early January.

The plan will be a circa 30-page online document with a small run of physical copies which will contain:

- Narrative
- Vision
- 10 ambitions
- Outcomes - where we want to be in 10 years' time
- Actions for the first two years that we can be measured against
- Thanks and credits
- Summaries of Research
- Consultees
- Case studies and Precedent – learning from others

The final plan will be picture-led, using artworks created as part of the public consultation across the district (see attachment). We are aiming to also provide accessible 'easy read' versions of the plan as well as versions in a range of key languages.

CULTURE IS OUR PLAN Draft narrative, vision and ambitions for comment

- 2.15 Based on this work to date, we have now developed
- A draft Vision
 - 10 strategic ambitions along with a supporting narrative

This high-level draft extract is now out for further comment and consultation to the sector and stakeholders prior to final presentation to the Cultural Place Partnership in February 2021 and launch to the public in March 2021.

It is this draft extract below that we ask the committee to review and comment on now as part of this ongoing consultation and engagement.

2. 16 Draft Narrative

'You can't Imagine what you can't imagine' but our plan will help the people of

Bradford to use their culture to play a leading part in reimagining and reshaping our district and creating a resilient and successful future. The youngest place in the UK will use its energy and creativity to show the whole country what Bradford can be.

We will reimagine the whole of Bradford district as a cultural space – our homes, our mills, hills, streets, markets, moors and parks. We recognise that our cultural life is everywhere and in everyone and is vital to our wellbeing, education and sense of pride in where we live.

We will build on our existing cultural assets, valuing them, enhancing them and creating and delivering plans to revitalise our public realm and transform our night-time economy.

We will create a more sustainable culture too, playing a leading role in the new green economy and making culture a valued part of every district agenda from education, to health, to transport, to economic regeneration.

We will celebrate the creativity of everyone and in every corner of our district and give platform to the diverse and sometimes hidden cultural buzz of Bradford. Our district will be fertile ground for culture, a place where Bradfordians and artists from across the region, nation and beyond can experiment, take risks and create new approaches to the meaning of culture.

Culture of friendship and hospitality - a spirit of caring and connecting communities will underpin our plan - welcoming and hosting residents and visitors from across the UK and the world to hear our stories and share theirs with us. Bradford is famous for welcoming people from across the globe and we are proud to be a home to so many different people today - whether they are here for an hour, a day or a lifetime.

We will value, celebrate and use our distinctiveness, platforming the rich cultural heritages that make us Bradford to create new definitions of culture and to bring all people of the district together.

Bradford will know itself better too. Culture will help us to see the beauty in change and the unnoticed detail of our district. We will shine a light on our industrial past and digital future, celebrating our creativity and our radical and reforming heritage in every community and every school. Laying the foundations and pathways for creative participation and for a new generation of opportunity and choice for young Bradfordians to forge creative careers.

While learning from our past, Bradford will look forward, encouraging the new, responding to change, valuing art and culture that is relevant in specific time and place – that is, in the here and now.

This is our plan. Created for our district. It has been developed through listening and asking questions, through chats, artistic commissions, workshops, surveys connecting to thousands of people in every corner of our district, with the artists and creative organisations that make up our extraordinary cultural scene.

The plan doesn't begin to have all the answers but is a set of ambitions and values to help us make choices as we navigate and shape a shared journey across a decade.

The plan and the promises we make to each other through it, should be revisited constantly; in arts venues, front rooms, bars and cafes across Bradford. We will measure our journey with a dashboard of progress which tests how our work is reaching more people, changing lives and improving the quality of cultural life for the people of Bradford.

Every two years, we will bring the whole cultural sector together for a day to celebrate what we have achieved, acknowledge what we have not and check in and refresh for the next leg of our voyage.

Half way along our journey we aim to become the UK City of Culture 2025. Winning this designation would put rocket fuel in our tank and accelerate us faster into a better future, but whether we win that accolade or not, our plan will stand, and should be the guide for us into a better, more creative and more successful Bradford for everyone.

2.17 Draft Vision

Our plan will offer a definition of culture that reimagines Bradford District as a place that is knowingly different and radically alternative. A place where we can test new ideas, where creativity is celebrated in every home and where we can prove the positive impact of culture in our lives

2.18 10 Draft Ambitions

Ambitions	
1. Creativity thrives in every corner of the district;	We celebrate the artists in every street. Bradford's culture will happen in our homes, our parks, our markets and our amazing outdoor spaces as well as our cultural venues
2. Make the most of our existing assets;	Building and upscaling success, revitalising heritage spaces, repurposing temporary space and reimagining our landscapes and cityscapes. We will make reusing, upcycling and repurposing cornerstones of our creativity - building new buildings if we need them - but ensuring that everything contributes to a sustainable green economy
3. Revaluing and prioritising our distinctiveness;	A culture that offers something for everyone but not the same for everyone. We are excited to celebrate and showcase our different voices and cultures to make exceptional art that will bring everyone together. By 2031, 50% of Bradford's art, artists, audiences and cultural leadership will be drawn from people currently underrepresented in our sector
4. Connecting culture makes us	More effective and more sustainable, through

more powerful;	joined up working and sharing resources. Growing our new sector networks, sharing digital skills and experience, supporting, championing, connecting and mentoring each other as a creative community, working collectively to develop talent, audiences and to make culture a consideration on every district agenda
5. Making work;	Encouraging producers and bold production at scale across the district, in all art forms and media. Creating the support structures and opportunity for more artistic ambition, more work and more employment; for more Bradford artists to work at home and for more artists to see Bradford as a fertile ground for visionary projects and international collaborations
6. Grow a new calendar of exceptional festivals and events;	Celebrations and one-off moments across the district – from the hyper local to the global. Show that Bradford is ‘open for business’, building capacity, giving permissions, encouraging innovations and making Bradford a host of choice for national and international cultural events and partnerships
7. Create an explosion of opportunity;	Working with families, schools, FE and HE partners to create a critical mass of coordinated training and employment pathways. To evidence the viability of creative careers for young, digitally native Bradfordians and to ensure they take the lead in shaping the future of Bradford’s culture to 2040 and beyond
8. Bradford will know itself better;	We will understand our histories and our many cultural heritages. Our culture will speak honestly and openly, won't tolerate racism or discrimination and will have difficult conversations when needed – giving confidence to our communities, boosting pride and promoting our mental and physical wellbeing
9. We will write our own story;	Bradford’s culture will live in the here and now and look to the future. We will celebrate the vision and imagination of our young people and encourage innovation, respond to rapid change and harness new technologies to share our stories with the world. We will aspire to be the best we can be - we will bid to be UK City of Culture 2025 - and we will tell the world new stories about Bradford’s incredible people and distinctive places
10. Make life better;	Working as part of the Born in Bradford City Collaboratory, we will prove the difference our cultural plan makes and show the positive impact it will have on the lives, aspirations and the life outcomes of all the people of Bradford

- 2.19 COVID-19 has had a devastating effect on the cultural and creative industries nationally and Bradford has been no exception to this. Indeed, with a cultural workforce that is at least 50% made up of freelance workers, sole traders and small enterprises the impact of Covid is very dramatic and we have worked successfully alongside regional colleagues to ensure support for recovery of the sector is included in the WYCA recovery ask of central Government.

Recovery from COVID will define much of the sectors work for the next 12-18 months and this will be reflected in the final plan, however we have taken the decision not to let the impact of COVID overshadow the forward-looking nature of the vision or ambitions.

3. OTHER CONSIDERATIONS

4. FINANCIAL & RESOURCE APPRAISAL

- 4.1 As noted, strategic investment of £1,435,000 was approved and has already levered £3,560,000 of new investment into Bradford District and led to considerable success including:

- Establishment of the Bradford Culture Company and recruitment of Richard Shaw as director and creation of a new team to lead on the bid to be UK City of Culture 2025
- Successful bid won to establish THE LEAP an Arts Council England Creative People and Places programme for the district which over 10 years will focus on the celebrating and growing cultural activity in the 12 most deprived ward areas of the district²
- Successful bid to win status as an Arts Council Producing Hub pilot to share resources and provide training, mentoring and business development for artists and small businesses in the performing arts
- These successes are as result of sector lead approaches and wide collaboration across the sector with the Council supporting this work. This is a significant change in Council action which has seen BMDC become an enabler of the sector rather than leading on bids and projects which it had done previously and with little success.

- 4.2 Cost of development of the 10-year Cultural Plan was included in this investment and sees £20,000 of BMDC funding matched by £20,000 of Arts Council England funds.

5. RISK MANAGEMENT AND GOVERNANCE ISSUES

No risk or governance issue arising

6. LEGAL APPRAISAL

² Bradford Moor, Bowling and Barkerend, City, Eccleshill, Great Horton, Keighley Central, Keighley West, Little Horton, Manningham, Royds, Toller and Tong

No legal issues arising

7. OTHER IMPLICATIONS

7.1 EQUALITY & DIVERSITY

The plan reflects the importance of equality and will recommend demanding targets to improve diversity and representation across the districts cultural sector in workforce, programme and leadership. BMDC funding and support for projects outside of the Council will require this is supported by our partner organisations.

7.2 SUSTAINABILITY IMPLICATIONS

The plan reflects the importance of sustainability for the cultural sector and BMDC funding and support for projects outside of the Council will ensure that this, Council declaration of climate emergency and BMDC green targets aims are supported by our partner organisations.

7.4 COMMUNITY SAFETY IMPLICATIONS

Through the positive integration and intercultural ambitions of the plan it is hoped that activity resulting from it will increase activity in communities and have a positive effect on community engagement and collaboration to improve community relations.

7.5 HUMAN RIGHTS ACT

There are no known Human Rights Implications arising from this report.

7.6 TRADE UNION

➤ There are no staffing implications for BMDC

7.7 WARD IMPLICATIONS

➤ The implementation of this plan will have positive benefit for the whole district over the coming 10 years.

7.9 IMPLICATIONS FOR CORPORATE PARENTING

There will be a range of activity and outcomes of the plan that will have significant opportunities for children through the Councils responsibility as a corporate parent and this will be woven into the strategy and activities in the future

7.10 ISSUES ARISING FROM PRIVACY IMPACT ASSESMENT

No impact

8. NOT FOR PUBLICATION DOCUMENTS

➤ N/A

10. RECOMMENDATIONS

It is recommended that:

- The committee notes the work to date and work still in progress on this strategic plan
- The committee gives its comment on the draft narrative, vision and strategic ambitions as part of ongoing consultation on the emerging plan

11. APPENDICES

- 1. Culture is our Plan Consultation Draft: Narrative, Vision and Ambitions
- 2. Culture is our Plan Examples of artist-led community consultations
- 3. Culture and Me opinion survey overview

12. BACKGROUND DOCUMENTS

- Background documents are documents relating to the subject matter of the report which disclose any facts or matters on which the report or an important part of the report is based and have been relied on to a material extent in preparing the report. Published works are not included.
- All documents referred to in the report must be listed, including exempt documents.
- All documents used in the compilation of the report but not specifically referred to, must be listed.

Ambition 7

Create an explosion of opportunity; working with families, schools, FE and HE partners to create a critical mass of coordinated training and employment pathways. To evidence the viability of creative careers for young, digitally-native Bradfordians and to ensure they take the lead in shaping the future of Bradford's culture to 2040 and beyond

Image: Saliha R, Karol Wyszynski CIOP project

Ambition 8

Bradford will know itself better; we will understand our histories and our many cultural heritages. Our culture will speak honestly and openly, won't tolerate racism or discrimination and will have difficult conversations when needed – giving confidence to our communities, boosting pride and promoting our mental and physical wellbeing

THE ARTS
are
POWERFUL

INVEST IN YOUNG PEOPLE OF BRADFORD

Ambition 9

We will write our own story; Bradford's culture will live in the here and now and look to the future. We will celebrate the vision and imagination of our young people and encourage innovation, respond to rapid change and harness new technologies to share our stories with the world. We will aspire to be the best we can be, we will bid to be UK City of Culture 2025 and we will tell the world new stories about Bradford's incredible people and distinctive places

Ambition 10

Make life better; working as part of the Born in Bradford City Collaboratory, we will prove the difference our cultural plan makes and show the positive impact it will have on the lives, aspirations and the life outcomes of all the people of Bradford

Rachel

Culture for me is about a sense of place as well as community.

Culture is thinking big and bold and sharing a reality and a vision.

We need to do more than just scratch the surface of the culture

Image and text: Rachel Shaw, Karol Wyszynski CIOP project

Ross

Culture is about seeing the beauty in seasonal change

Culture to me is different to what it may mean to you. That's the beauty of it. Our cultures should be celebrated, explored and shared

- Image and text: Ross E, Karol Wyszynski CIOP project

Q: Definition of the word creativity

ARTS! ...

"One of the things a young group did in Bradford was they re-

modelled their cars- sprayed them and did all sorts to them!"

"It should encompass music and drama too- a very active rock scene through to

serious classical"

"Amateur dramatics"

folk, Punk, & Many More!!!
Spoken word
"in terms of creative ideas one of the aspects of Bradford and Keighley is that we have a very diverse population very rich in culture, language and that applies to food. So we have had food festivals in the past like Curry festivals and general food markets and it's one of our strengths!"

"Some of Keighley's creativity/ art forms are quite hidden unless you

are involved in these scenes, but once you are involved you realise how much is going on."

Dance

food

Poetry

film

Participation!

JOINED UP THINKING!

"How do you get the people who live in Keighley to be aware of what is happening in Keighley?"

Keighley and Worth Valley railway is an immensely creative project.

Jennifer S

Culture is all our stories and how they are interpreted to help us to understand each other

Culture is what brings people and communities together to develop pride in the city!

Image and text: Jennifer S, Karol Wyszynski CIOP project

Image: Community consultation at Keighley Creative, Naseem Darbey

Karol

Culture is about connecting

Culture is about enriching the place we live in

Culture is celebrating life together

Image and text: Karol Wyszynski CIOP project

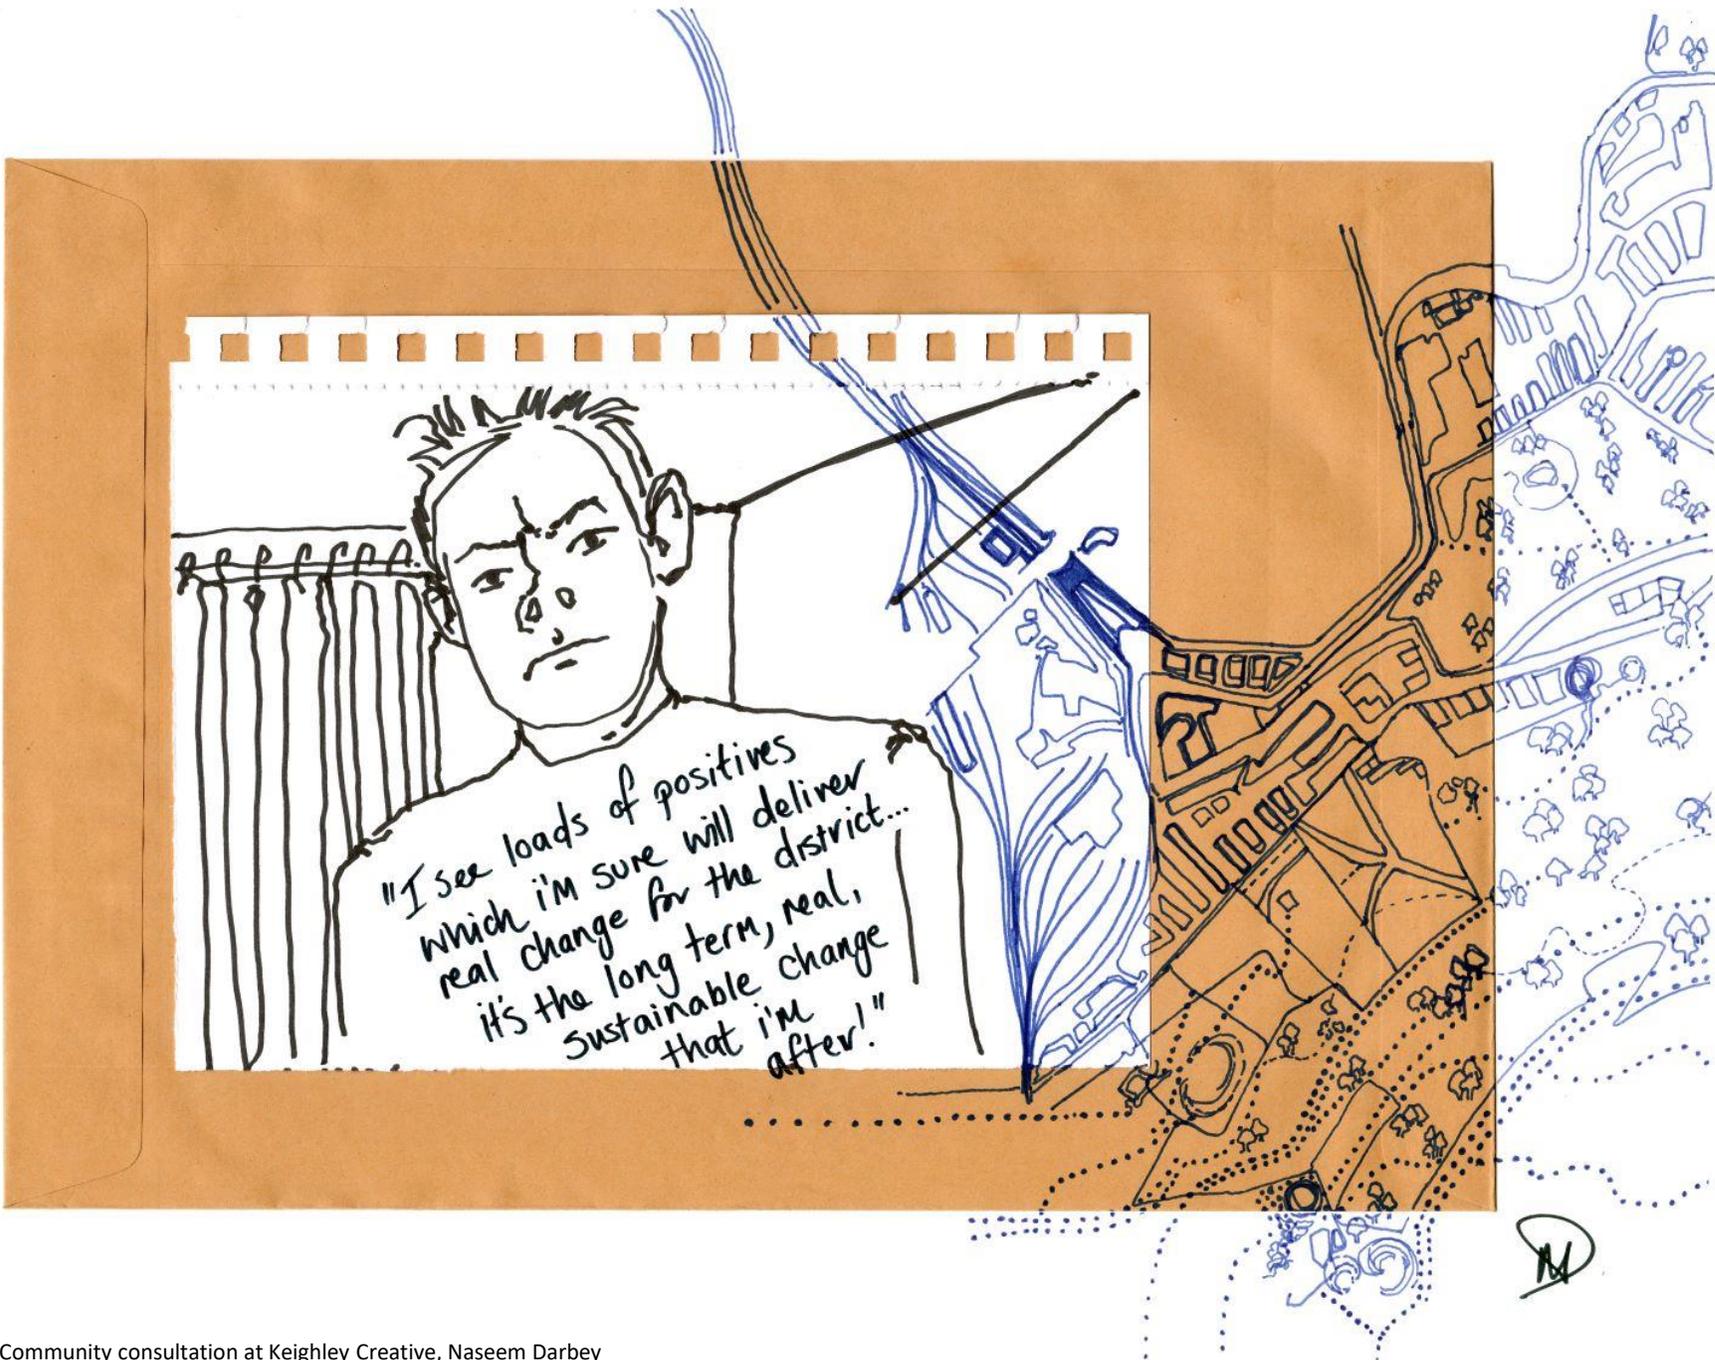

Image: Community consultation at Keighley Creative, Naseem Darbey

Saliha

Culture is what's passed on

Image: Saliha R, Karol Wyszynski CIOP project

Nathaniel

Culture creates community around an idea

Culture is everyone's heritage

Culture is about learning about others and ourselves

Culture is coming together to work on a common goal

- Image and text: Nathaniel Chang, Karol Wyszynski CIOP project

Eli

Older venues are really exciting to go to for a music gig, to see bands but if you have a physical disability its much harder to get to these venues. They are often in upstairs rooms. But we do love them

More to be done to promote what's going on to young people with Learning disabilities of what we can go to in Bradford

- Image Eli Smith 'the Bradford Art Party' Chemaine Cooke and James Heselwood CIOP project

"What I love about it and what I have always loved and why I've ended up coming back here is the landscape, the area and the accessibility of the landscape to people. It is a natural landscape coming into an industrial townscape, and I really love that about it!"

We need
Great vity
More than
ever!

"The relationship between the manufacturing present (in Keighley) rather than the focus on the past. The interdependency between the creative community and the manufacturing businesses that exist in Keighley should be explored."

"All sorts of skills we really should be looking after...."

"We need to be connected to each other and the arts on our door-step."

"Pursuing it locally rather than having to go somewhere else (London)"

Image: Community consultation at Keighley Creative, Naseem Darbey

Tess

Culture is about shining a light into industrial heartlands

Culture is beauty is found in the detail that most will never notice

Image and text: Tess L, Karol Wyszynski CIOP project

Laura

Culture is noticing and admiring difference

Image: Laura A, Karol Wyszynski CIOP project

Young People / Artworks / Kirsty Taylor

Pregnant at 17! What led to this point drinking, drugs, murder and hurt.

Looking for love and I found the worst. Grew up round green fields, horses and cows.

Private school, happiness and laughter, things change fast.

Wyke manor, skipping school with Kula, Shayne, James and Katie.

Getting drunk on white star, md and cheap booze.

Broken bones, poor attendance, school was the worst.

Fights with the parents, piercings and tattoos.

Tong fighting Martyrs, riots in the rain.

I grew up on Ilford station, skiving school.

Tracksuits, hip hop, grime listening youth.

I grew up on egging Rolls Royces, getting chases.

Hackney to Bradford, moving places.

I grew up on MR'Ts, stir fry donner.

Young People / Artworks / Kirsty Taylor

BD8 was where we grew up.
Playing cops and robbers, hide and seek,
riding on the field at the top of the street.
Running inside because we needed a wee,
and then sneaking back out making sure we weren't seen.
Meeting the gang in the communal hot spot,
munching Gino's donor and chips and the laughter didn't stop.
Then off to the shop for some penny sweets and cookies,
talking about school tomorrow, but planning to play hookie.

I grew up on the busy roads with nowt to do.
I grew up on getting pierced and tattoos.
I grew up on Hello Kitty and Truth or dare.
I grew up on getting told to be yourself f*** everyone else.
I grew up on smoking weed and climbing trees.
I grew up on smiley faces and beans.

Young People / Artworks / Kirsty Taylor

I grew up on trampy streets, horses, quads, teen scene and getting spiked by lads.

I grew up on Kirby, tig, bull dogs charge. Students in school thinking they're hard.

I grew up on Argos catalogues and blackberry phones.

Sneaking out at night not doing what I'm told.

I grew up on sticking up for myself and fighting back.

Being good all year to fill my xmas sack.

I grew up seeing stuff I shouldn't, getting kicked out of school. Getting into trouble as I don't like the news.

I grew up on smiley faces and beans.

I grew up on not been allowed to go to teen scene.

I grew up on watching fights and crime.

I grew up on going to fairs and parks.

I grew up on climbing trees and bring me.

I grew up on not being my own friend.

I grew up on going to 5 alive and community vibing.

I grew up with my mum by my side with the tuna pasta on the side

THE ARTS
are
POWERFUL

INVEST IN YOUNG PEOPLE OF BRADFORD

Artworks

(the) Young people were a bit more positive about their own areas and this seemed to be a bigger part of their lives, speaking more positively about the community vibes on their estates, neighbours, parties, socialising with locals - they lent more towards this than going to the city itself

One group described my job (a poet) as 'high flying, not a standard job, powerful' which was interesting. They respected the job, but also couldn't see it as a regular job for someone from Bradford.

Natasza

Shops close, businesses leave, but the people stay and thrive ... in the smiles of the friend with a different life behind them that has lead them to the same place as you.

- Image and text: Natasza S, Karol Wyszynski CIOP project

Culture and Me in Bradford District

Katy Raines
Nov 2020

Intention

- To support previous consultation and other research work by gathering the views of existing arts attenders and participants across Bradford district
- To raise the profile of Culture is our Plan with the general public and capture indications of wider public perceptions and engagement with culture in the district

Methodology

- Simple light touch online survey developed – easy to complete and no personal data collected to ease distribution
- Distributed via various channels
- General public via Telegraph and Argus, BMDC and VCS email lists and Facebook, Twitter and Instagram
- Arts attenders via Cultural organisation email lists / social channels and Bradford 2025 Bid social and email
- Survey open for 30 days Oct 2020

Responses and Caveats

- 1700 people gives a robust sample of the district population (with a 95% confidence level and margin of error <2.5%)
- The sample is skewed towards people on arts and cultural mailing lists and therefore has
 - *A lower % of BAME respondent (12%) compared with the local population (31%)*
 - *A lower % of respondents aged under 25 (16%) compared with the local population (23%)*
- 13% of respondents identify as D/deaf or disabled, compared with 17% in the local population

Key Findings

1. Culture is **important** to residents in Bradford District – but culture means different things to different people
2. Bradford District residents are **engaged** in culture
3. Cultural activity is rich and diverse and goes beyond traditional definitions of 'Arts' and 'Culture'
4. Cultural activity is not necessarily happening in **cultural venues**
5. Bradford is **generous** (many volunteer in cultural activities)
6. BUT Culture in Bradford District has some **challenges**
7. There are some clear **signposts** for the future

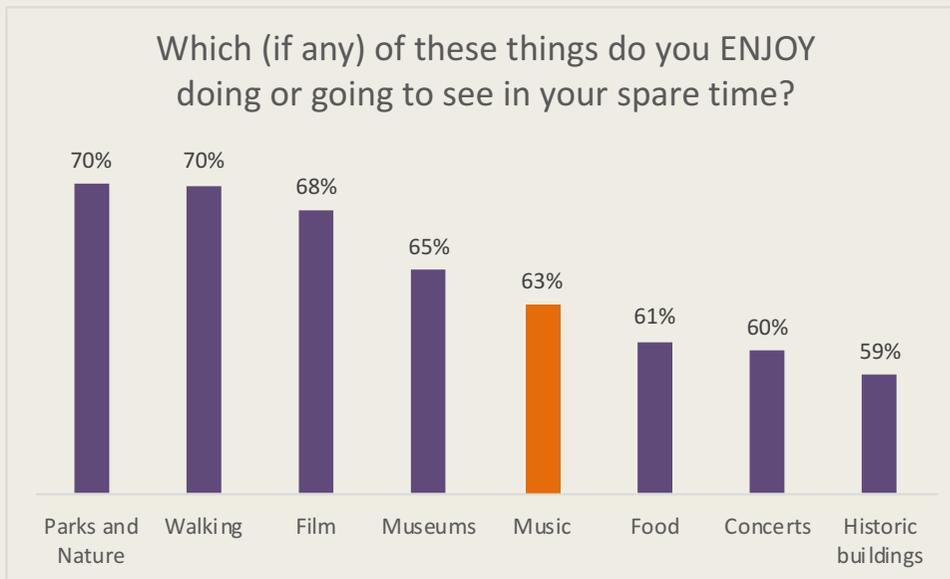

1. Culture is important

- High score on the importance of culture (8/10)
- Residents agree/agree strongly that culture
 - *makes Bradford District a better place to live (94%)*
 - *Improves their wellbeing (88%)*
 - *Should be accessible by all children (92%)*

2. Bradford residents are engaged in culture

- 65% of people said they like to do **as much cultural activity as they can**, and deliberately search for activities
- Only 12% say they **hardly ever** or **do not take part** in cultural activities
- **66% have volunteered** with a cultural project or organisation 55% of under 25s vs 73% of 65+
- **80%** are active culturally **WITHIN Bradford District**
- Most who engage with culture elsewhere do so in **Leeds** (75%)
 - *Under 25's also go to **London** (51%) and **Manchester** (47%) more than other age groups*

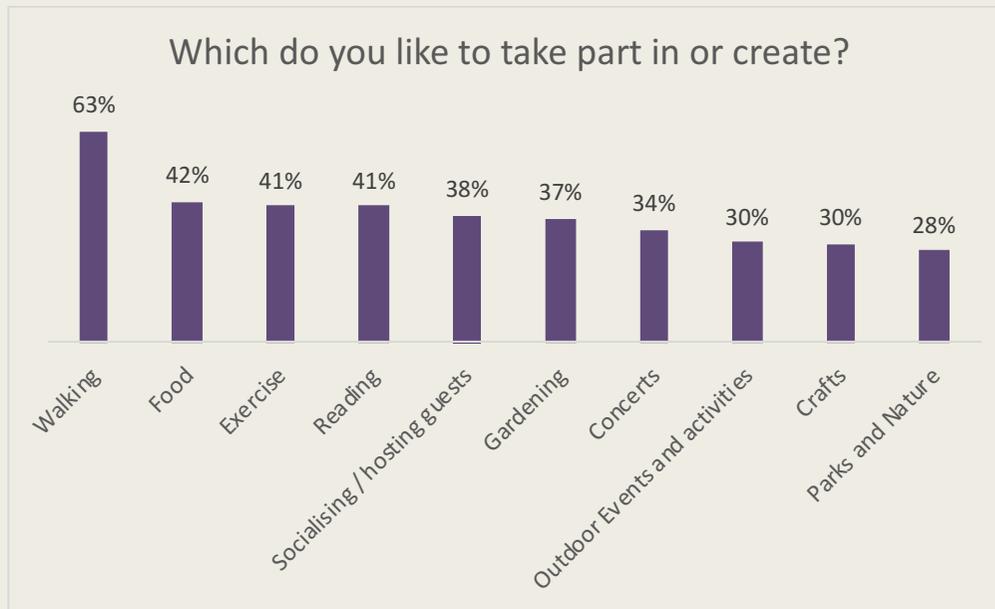

3. What Bradford residents most enjoy doing

Outdoors especially valued – this is echoed in other research about main reasons for visits to the district too

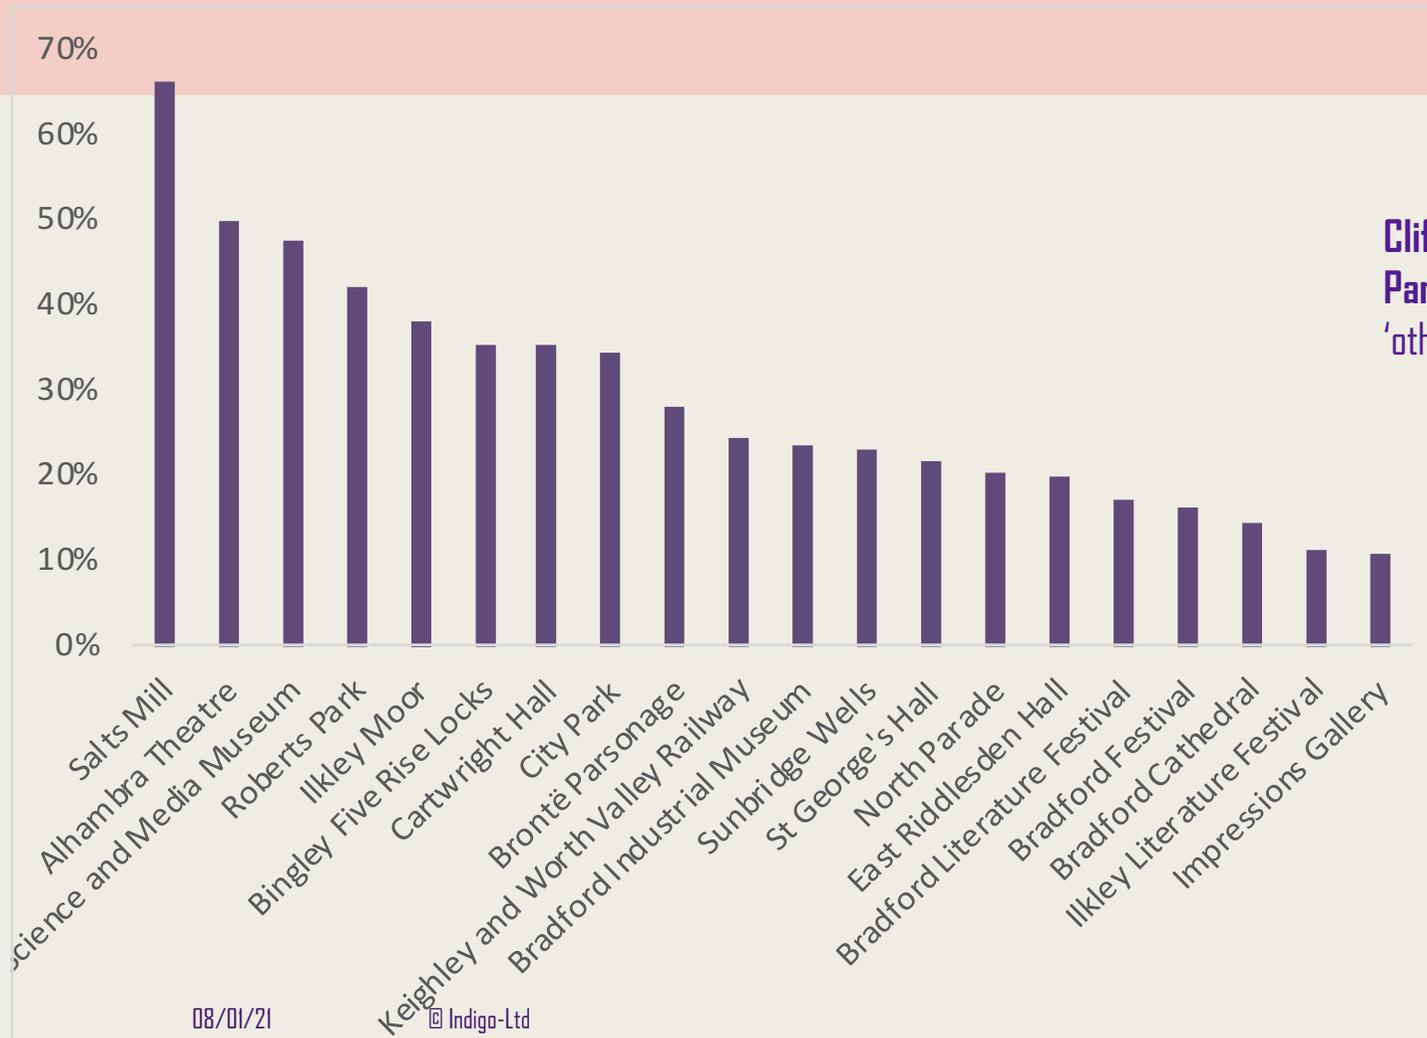

Music popular across all ages – favorites for Bradford include 80's pop and Qawaali!

4. What they like to do themselves

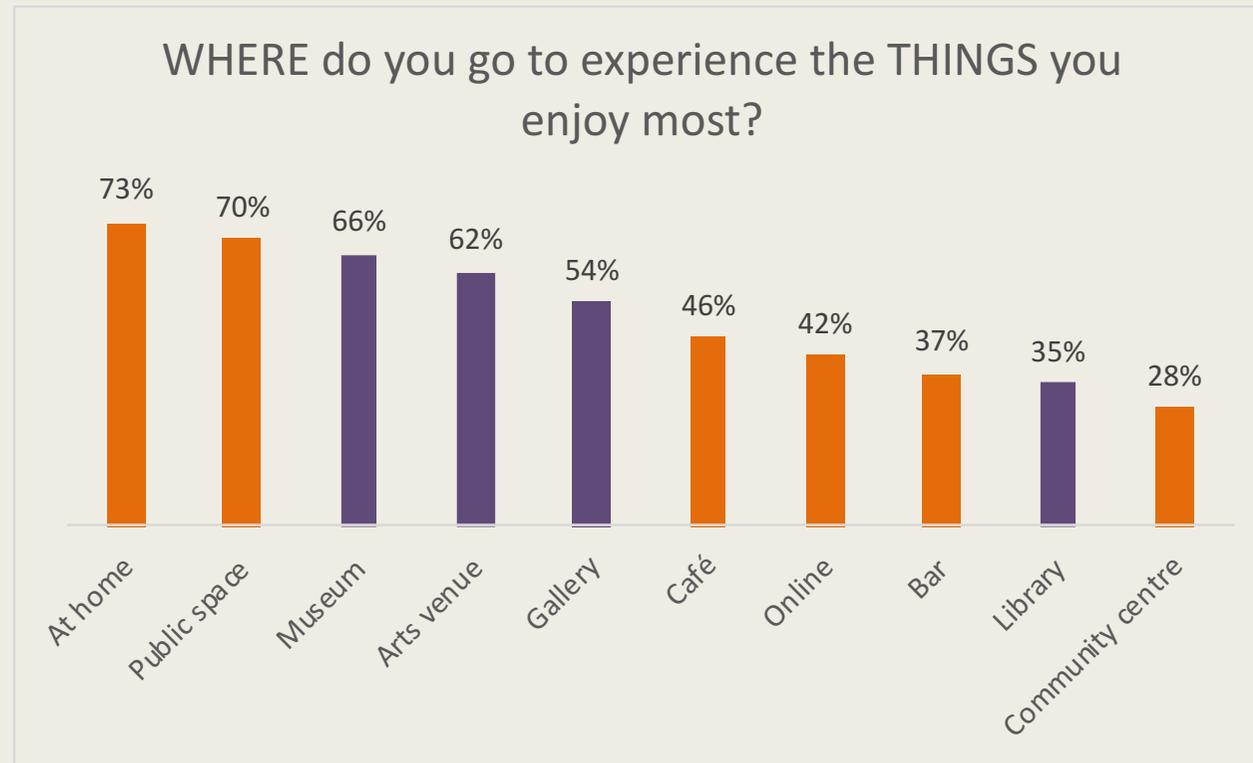

Food, hospitality and socializing are important aspects of Bradford culture

5. What they show to friends and family

Cliffe Castle Museum and Park also came up a lot in the 'other' category

6. Cultural activity – where it's happening in Bradford – top 10

Cultural activity is happening in many places that are **outside** conventional cultural venues

7. BUT There are some challenges...

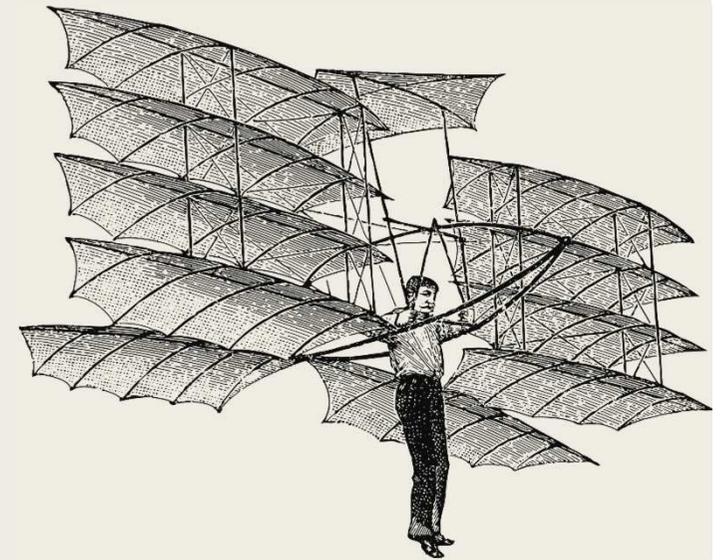

- Only half (51%) of respondents agree that culture in Bradford 'represents me and my life'
 - *Much lower for **under 19s** (36%)*
- Less than half (45%) agree that they are **satisfied with the range of cultural activities** in the district and 42% near to where they live
 - *Much lower for **under 19s** (27% for Bradford and 21% for 'near where I live')*

7. BUT There are some challenges...

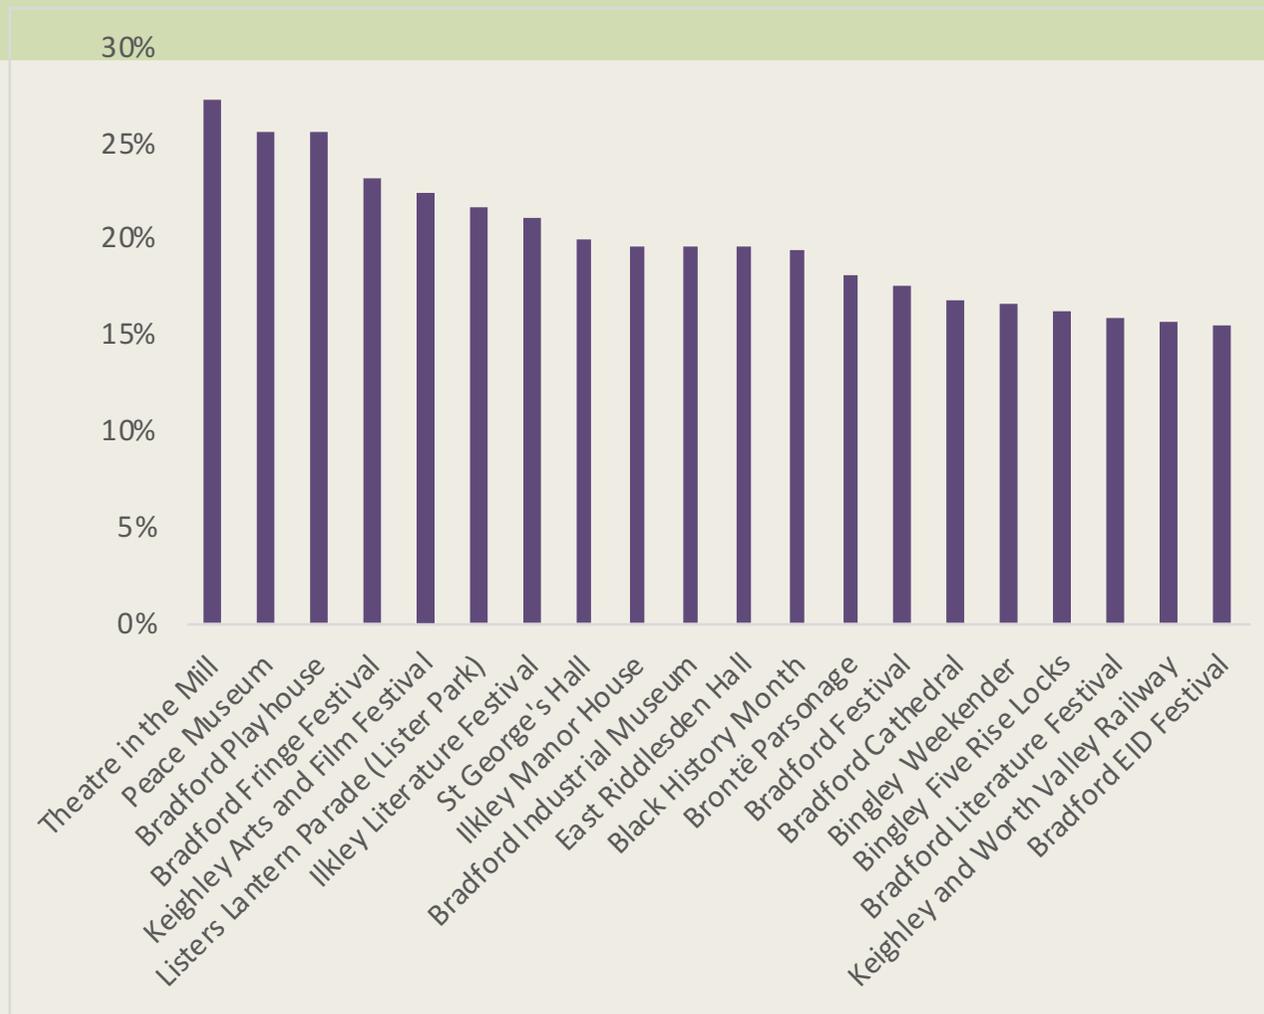

- This is especially true for people living in the poorest parts of the district
- This supports work carried out in developing The Leap, the Creative People and Places Programme for Bradford, which shows that the people in the poorest parts of the district have the least provision and least engagement with 'subsidised' Arts and Culture
- Only 12% say they **hardly ever** or **do not take part** in cultural activities
 - *BUT this increases to 23% of <25 year olds*
 - *and 33% of 15-19 year olds.*

5. The future

- What people would most like to try
- What people would like to see more of
- How they'd like Bradford described
- Key Opportunities

Things people would 'like to try'

The most important things people would like to see MORE of in the district

ANSWER CHOICES		RESPONSES	
Activities that brings different communities together	BAME ↑	58%	852
Use of our heritage buildings		53%	780
Opportunities to develop the talent in the district		41%	599
Outdoor events	< 25s ↑	41%	598
Activities for young people	< 25s ↑	39%	570
Cultural facilities and buildings		32%	462
Festivals	< 25s ↑	30%	443
More artists living and working here		30%	440
Cultural activity online		7%	109
Activities for specific communities	BAME ↑	6%	93
Total Respondents: 1,462			

Q17 Which ONE word would you like people to use to describe CULTURE in Bradford District in 10 years time?

Key Opportunities / Conclusions

- Residents have an appetite for culture, but it needs to
 - *have more **relevance** to their lived experience*
 - *be more available near to where they live*
- There is a strong desire to see activities that bring **different communities together**, and this is highest amongst BAME communities
- **Young people** are a key target group as
 - *The most ethnically diverse*
 - *Over-represented in the population*
 - *Committed (over ½ volunteer!)*

Under 25s – the future?

- What ARE they engaging with now?
 - *Food, TV, Comedy, Photography, Sport, Singing, Painting, Design, Fashion, Gaming, Calligraphy*

- What do they WANT TO TRY?
 - *Festivals, Events, Music and Diverse culture scored highly e.g. Bingley Weekender, Black History Month, Bradford Festival, Bradford Madir, Bradford Pride, Drunken Film Festival, Illuminate, Keighley Arts and Film Festival, Lister Lantern Parade, Nightrain, North Parade, WDW Festival, Widescreen Weekend, Yorkshire Games Festival, Yorkshire Adabee Forum*

Report of the Chair of the Regeneration & Environment Overview and Scrutiny Committee to be held on Tuesday 19 January 2021

Q

Subject:

**Regeneration and Environment Overview and Scrutiny Committee – Work
Programme 2020-21**

Summary statement:

**This report includes the Regeneration and Environment Overview and Scrutiny
Committee work programme for 2020/21.**

Cllr Kamran Hussain
Chair – Regeneration & Environment
Overview and Scrutiny Committee

Report Contact: Mustansir Butt
Overview and Scrutiny Lead
Phone: (01274) 432574
Email: mustansir.butt@bradford.gov.uk

Portfolio:

**Health People and Places, Regeneration,
Planning and Transport, Environment and
Waste.**

Overview & Scrutiny Area:

Regeneration & Environment

1. SUMMARY

- 1.1 This report includes the Regeneration and Environment Overview and Scrutiny Committee work programme for 2020/21, which is attached as appendix 1 to this report.

2. BACKGROUND

- 2.1 Each Overview and Scrutiny Committee is required by the Constitution of the Council to prepare a work programme (Part 3E – Overview and Scrutiny Procedure Rules, Para 1.1).

3. OTHER CONSIDERATIONS

- 3.1 The Regeneration and Environment Overview and Scrutiny Committee has the responsibility for “the strategies, plans, policies, functions and services directly relevant to the corporate priorities about creating a more prosperous district and about improving waste management, neighbourhood services and the environment.” (Council Constitution, Part 2, 6.5.1 and 6.6.1).
- 3.2 Best practice published by the Centre for Public Scrutiny suggests that “work programming should be a continuous process”. It is important to review work programmes, so that important or urgent issues that arise during the year are able to be scrutinised. Furthermore, at a time of limited resources, it should also be possible to remove areas of work which have become less relevant or timely. For this reason, it is proposed that the Committee’s work programme be regularly reviewed by members of the committee throughout the municipal year.
- 3.3 The remit of this Committee also includes the strategies, plans, functions and services directly relevant to the corporate priorities about reducing carbon emissions, transport and highways, creating a greener and more sustainable environment and positively affecting climate change.
- 3.4 The work programme as agreed by the Committee, will form the basis for the Committee’s work during the year, but will be amended as issues arise during the year.

4. FINANCIAL & RESOURCE APPRAISAL

- 4.1 None.

5. RISK MANAGEMENT AND GOVERNANCE ISSUES

- 5.1 Risk Management will be considered by this Committee, for all areas within the Work Programme.

6. LEGAL APPRAISAL

None.

7. OTHER IMPLICATIONS

7.1 EQUALITY & DIVERSITY

Community Cohesion and Equalities related issues are part of the work remit for this Committee.

7.2 SUSTAINABILITY IMPLICATIONS

This is a key work area for the Committee.

7.3 GREENHOUSE GAS EMISSIONS IMPACTS

This is a key work area for the Committee.

7.4 COMMUNITY SAFETY IMPLICATIONS

A key area of work for the Committee will be to consider the area of those killed or seriously injured on roads.

7.5 HUMAN RIGHTS ACT

None.

7.6 TRADE UNION

None.

7.7 WARD IMPLICATIONS

Work of this Overview and Scrutiny Committee has ward implications, but this depends on that nature of the topic.

7.8 IMPLICATIONS FOR CORPORATE PARENTING

None.

7.9 ISSUES ARISING FROM PRIVACY ASSESSMENT

None.

8. NOT FOR PUBLICATION DOCUMENTS

None.

9. OPTIONS

- 4.1 The Committee may choose to add to or amend the topics included in the 2020-21 work programme for the committee.
- 4.2 Members may wish to consider any detailed scrutiny reviews that it may wish to conduct.

10. RECOMMENDATIONS

- 9.1 That members consider and comment on the areas of work included in the work programme.
- 9.2 That members consider any detailed scrutiny reviews that they may wish to conduct.

11. APPENDICES

Appendix One – 2020-21 Work Programme for the Regeneration and Environment Overview and Scrutiny Committee.

Appendix Two – Unscheduled Topics.

12. BACKGROUND DOCUMENTS

Council Constitution.
