### District Dashboard - November 2016

# 01) District Demographics (provided for context)

The latest mid-year population estimates for the Bradford District as published by ONS. Historical estimates may be revised from previous publications to reflect the latest data published by ONS. The mid-year estimate for 2003 is reported as 2003/4, mid-year estimate for 2004 is reported as 2004/5 and so on.

Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District

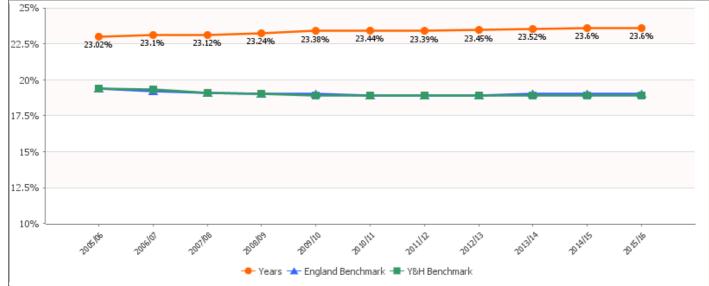

District Plan 2020 Target 1x) Context measure

Current Value 531,200 Data Source ONS Mid-Year Population Estimates - Powered by LG Inform Plus

The latest value relates to 30 june 2015 data which was released in June 2016. The population is now 531,200 which is an increase of 3000 or 0.6% since last year .This is largely due to natural change ie more births than deaths.

#### POP\_<16% Proportion of population aged under 16

The latest mid-year population estimates for the Bradford District as published by ONS for those aged under 16. Historical estimates may be revised from previous publications to reflect the latest data published by ONS. The mid-year estimate for 2003 is reported as 2003/4, mid-year estimate for 2004 is reported as 2004/5 and so on. Expressed as a percentage of the total population of the district.

Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District

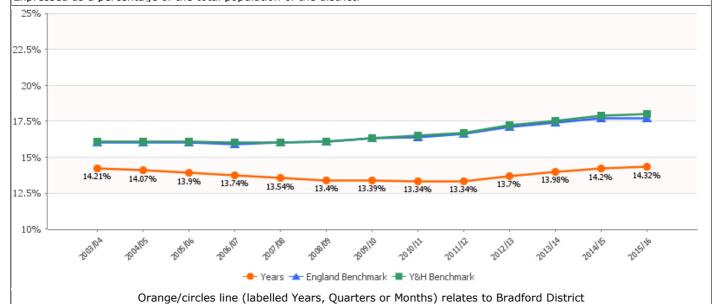

District Plan 2020 Target 1x) Context measure

Current Value 23.6% Data Source ONS Mid Year Population Estimates - Powered by LG Inform Plus

At 30 June 2015 23.6% of the district's population were aged under 16 (125,352 children). This is up by 702 children from 2014 and up by 10,891 children since 2006. This is third highest proportion of under 16s of any Local Authority in the United Kingdom (after Barking & Dagenham and Slough).

#### POP Over65% Proportion of population aged 65 or over

The latest mid-year population estimates for the Bradford District as published by ONS for those aged 65 or over. Historical estimates may be revised from previous publications to reflect the latest data published by ONS. The mid-year estimate for 2003 is reported as 2003/4, mid-year estimate for 2004 is reported as 2004/5 and so on. Expressed as a percentage of the total population of the district.

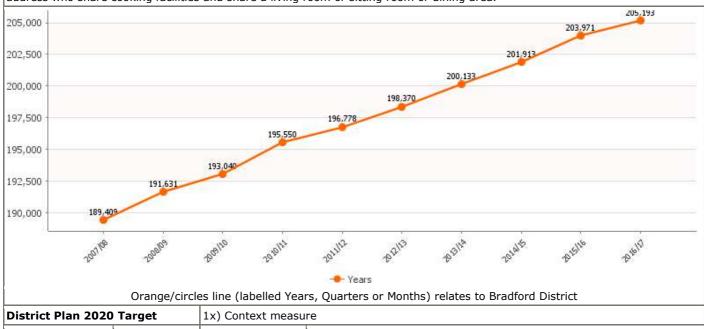

District Plan 2020 Target		1x) Context measure		
<b>Current Value</b>	14.32%	Data Source	ONS Mid Year Population Estimates - Powered by LG Inform Plus	

At 30 June 2015 14.3% of the district's population was aged 65 or over (76,000 people). This is up by 1,000 people from 2014 and up by 7,900 people since 2006.

#### POP\_HH Total number of households

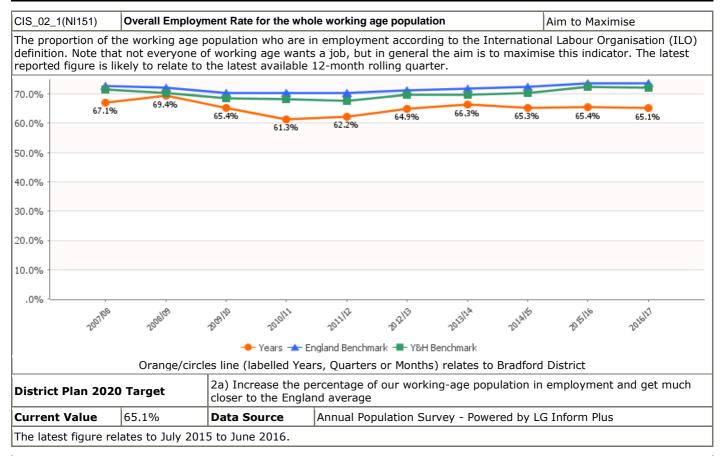

Total occupied household spaces at a snapshot taken in October. This is a proxy for the total number of households in the district. In reality there will be low number of hidden households, where more than one distinct household shares one household space.

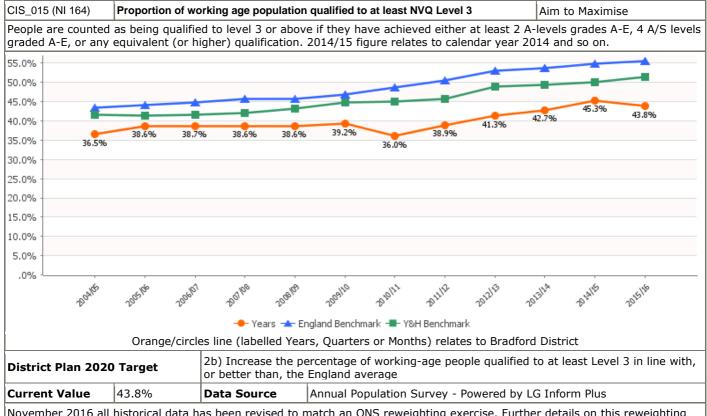

A household is defined by ONS as: • one person living alone; or • a group of people (not necessarily related) living at the same address who share cooking facilities and share a living room or sitting room or dining area.

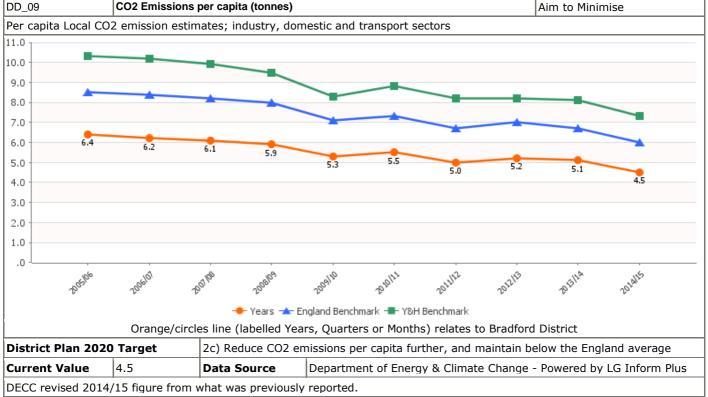

District Plan 2020 Target		1x) Context measure	
Current Value 205,193		Data Source	CBMDC Council Tax CTB1
There has been a further increase of 1,222 households in the last 12 months			

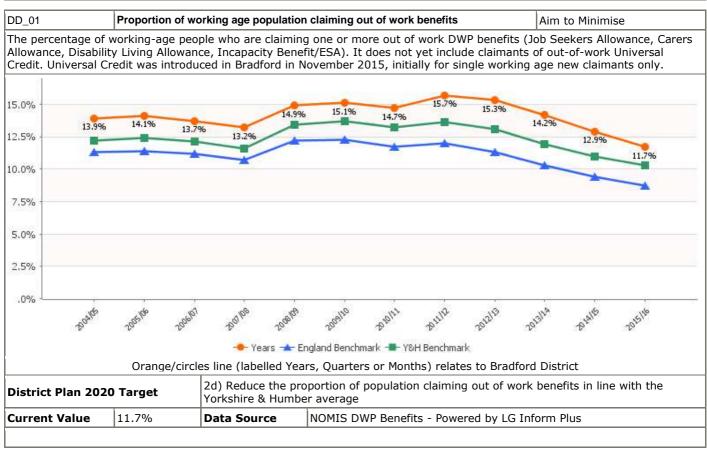

# 02) Better skills, more good jobs and a growing economy

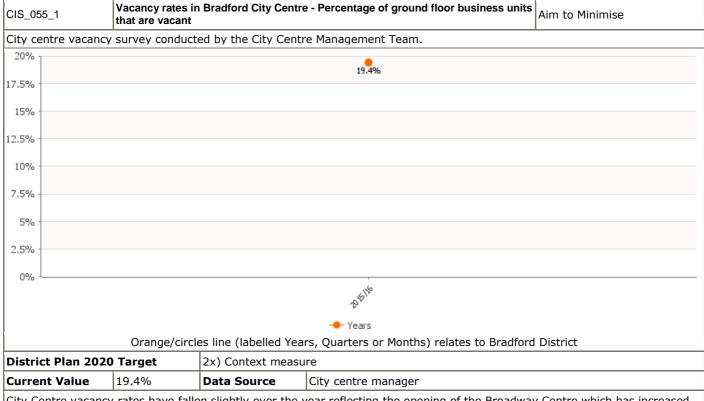

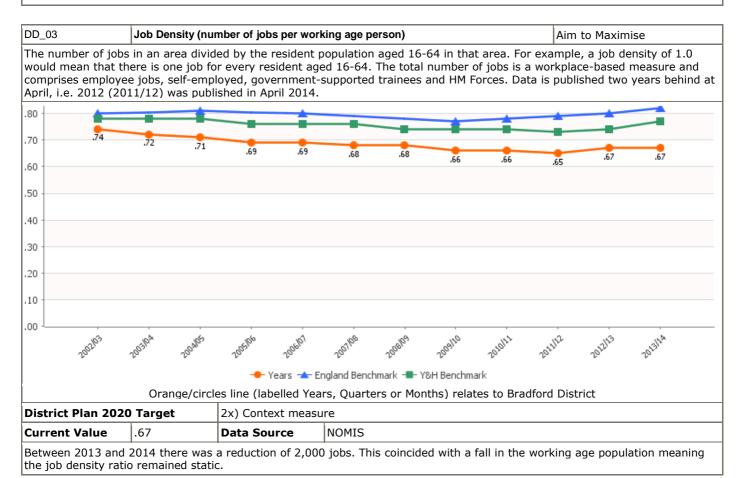

November 2016 all historical data has been revised to match an ONS reweighting exercise. Further details on this reweighting exercise can be found on https://www.nomisweb.co.uk/articles/966.aspx. A more detailed analysis on the latest data will be included in next month's District Dashboard.

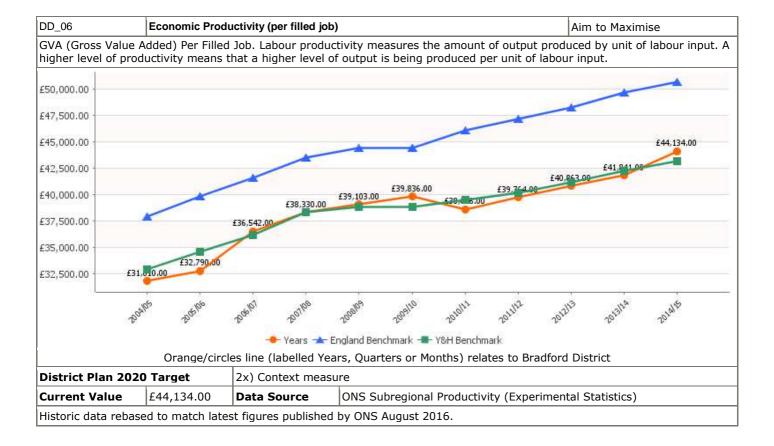

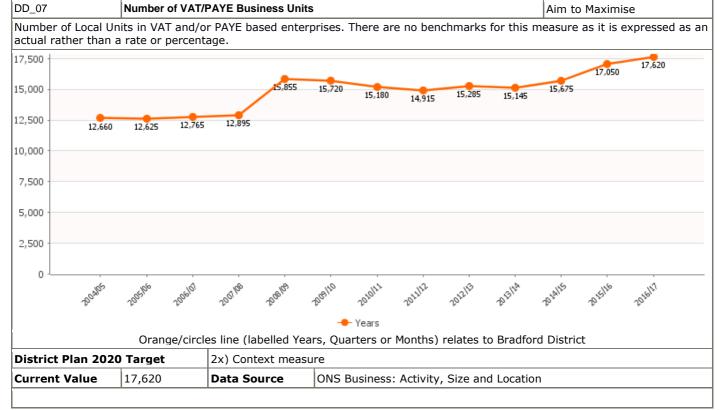

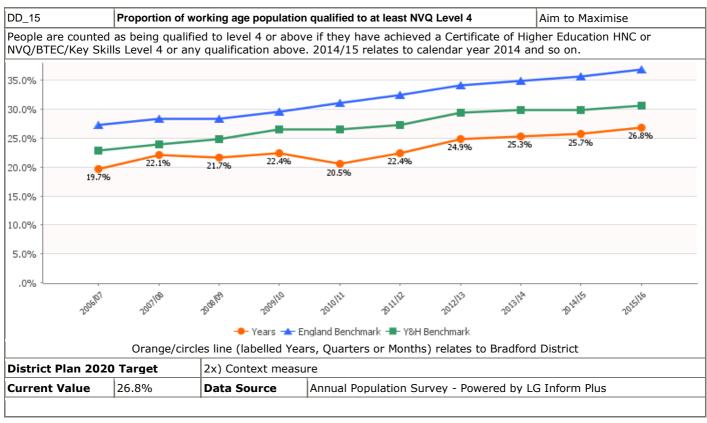

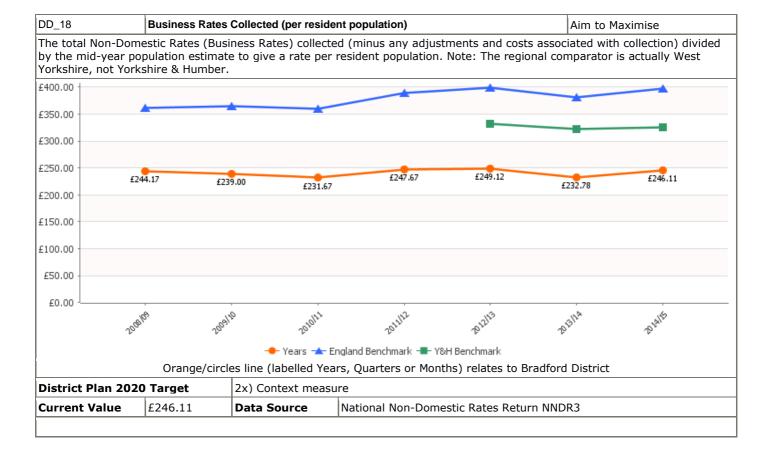

City Centre vacancy rates have fallen slightly over the year reflecting the opening of the Broadway Centre which has increased the number of retail units in the city centre but has also seen a number of units fall vacant in Darley street and the Kirkgate Centre.

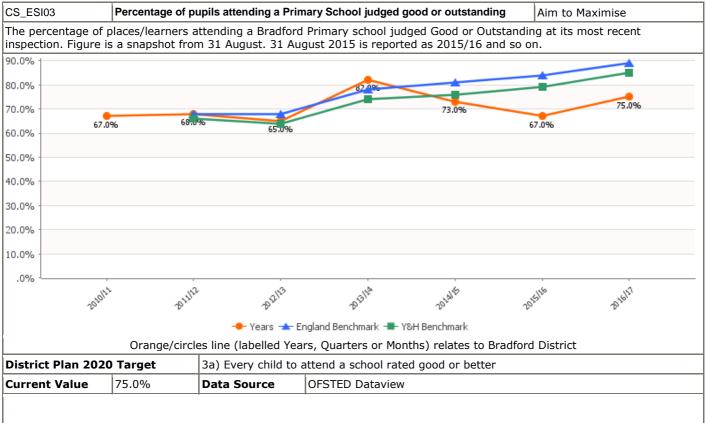

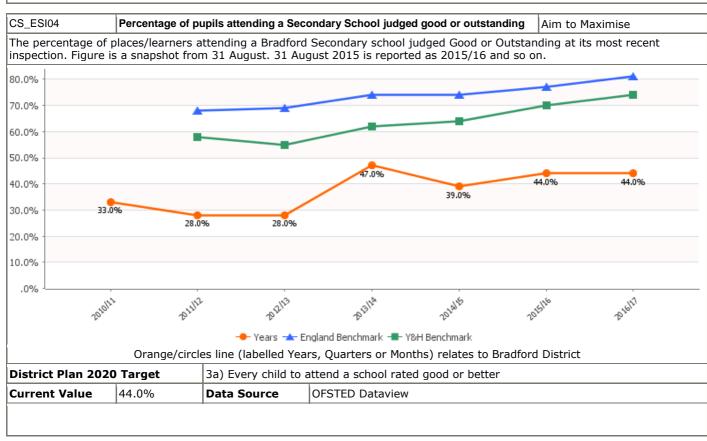

# 03) A great start and good schools for all our children

In 2016, the new more challenging national curriculum, which was introduced in 2014, was assessed by new tests and interim frameworks for teacher assessment. Results are no longer reported as levels: each pupil receives their test results as a scaled score and teacher assessments based on the standards in the interim framework. Because of the changes set out above, figures for 2016 are not comparable to those for earlier years. The expectations for pupils at the end of key stage 2 have been raised. Given the differences from previous years to the curriculum and assessments, levels are not comparable with scaled scores or teacher assessment outcomes. Data reported by academic year.

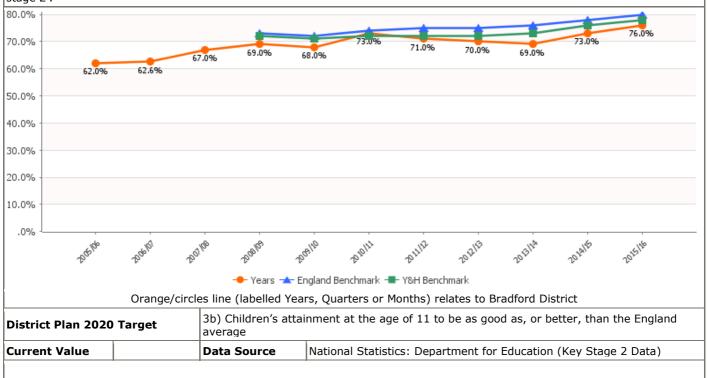

These data are provisional, based on <u>SFR 39/2016</u> published by DfE on 1st September 2016. Final KS2 data will be published in December 2016.

CIS_010 (NI 73)	Percentage of pupils gaining level 4 in Reading, Writing and Maths combined (Key Stage 2)	Aim to Maximise
-----------------	---	-----------------

THIS MEASURE HAS BEEN ARCHIVED in 2016, replaced with 'The percentage of pupils who reach the expected national standard in combined reading, writing and mathematics' - the new national measure at Key Stage 2.

National Curriculum standards have been designed so that most pupils will progress by approximately one level every two years. Pupils are expected to achieve level 4 by the end of Key Stage 2. In 2012 English was calculated from reading test results and writing teacher assessment rather than from reading and writing tests as in previous years. Therefore the figures reported here from 2011/12 onwards are not comparable with the previous years results. From 2016 this measure will be replaced by a new measure of 'the percentage of pupils achieving the 'expected standard' in reading, writing and mathematics at the end of key stage 2'.

CS\_ESI09 Key Stage 4 - Attainment 8 Aim to Maximise

A new secondary school accountability system has been implemented in 2016. The headline accountability measures for schools from 2016 are: Attainment 8, Progress 8, Attainment in English and Maths (A\*-C), and English Baccalaureate (EBacc) entry and achievement.

Attainment 8 measures the average achievement of pupils in up to 8 qualifications including English (double weighted if combined English qualification, or both language and literature are taken), maths (double weighted), three further qualifications that count in the Baccalaureat (EBacc) and three further qualifications that can be GCSE qualifications (including EBacc subjects) or any other non-GCSE qualifications on the DfE approved list. Data is reported as academic year.

These data are provisional, based on SFR 48/2016 published by DfE on 13th October 2016. Final KS2 data will be published in January 2017. A figure of 50 equates to students achieving an average of an old grade C across 8 attainment subjects. It is important to note that GCSEs are going through a period of reform which will make comparisons year on year very difficult until the changes are fully implemented .However comparisons between other authorities and nationally will still be possible.

### EISB\_31\_KS4\_Pro8 | Key Stage 4 - Progress 8

Aim to Maximise

A new secondary school accountability system has been implemented in 2016. The headline accountability measures for schools from 2016 are: Attainment 8, Progress 8, Attainment in English and Maths (A\*-C), and English Baccalaureate (EBacc) entry and achievement.

Progress 8 aims to capture the progress a pupil makes from the end of key stage 2 to the end of key stage 4. It compares pupils' achievement – their Attainment 8 score – with the average Attainment 8 score of all pupils nationally who had a similar starting point (or 'prior attainment'), calculated using assessment results from the end of primary school. Progress 8 is a relative measure, therefore the national average Progress 8 score for mainstream schools is always zero; the national figure reported here is for state funded schools only. Reported as academic year.

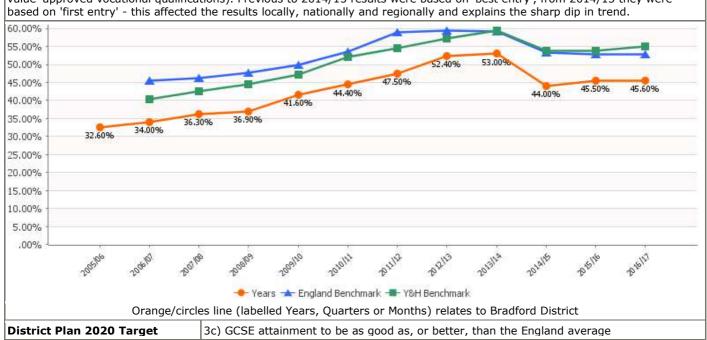

These data are provisional, based on SFR 48/2016 published by DfE on 13th October 2016. Final KS2 data will be published in January 2017.

	Percentage of pupils gaining 5 A*- C grades at GCSE or equivalent including English and Maths (key stage 4)	Aim to Maximise	
THIS MEACHER HAS BEEN ADOUTVED : 2016			

THIS MEASURE HAS BEEN ARCHIVED in 2016, replaced with Attainment8 and Progress8, the new national GCSE measurement system.

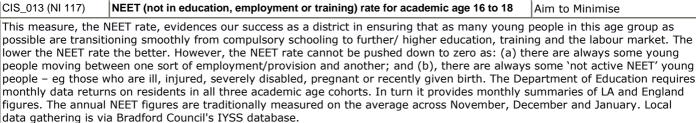

The results for the academic year are reported as the following year i.e. academic year 2011/12 is reported in 12/13 and so on. Data is published one year behind. From 2016 this measure will be replaced by Attainment 8 (measure the achievement of pupils across 8 qualifications, including English and maths, sciences, humanities and languages plus other GCSEs and 'high value' approved vocational qualifications). Previous to 2014/15 results were based on 'best entry', from 2014/15 they were based on 'first entry' - this affected the results locally, nationally and regionally and explains the sharp dip in trend.

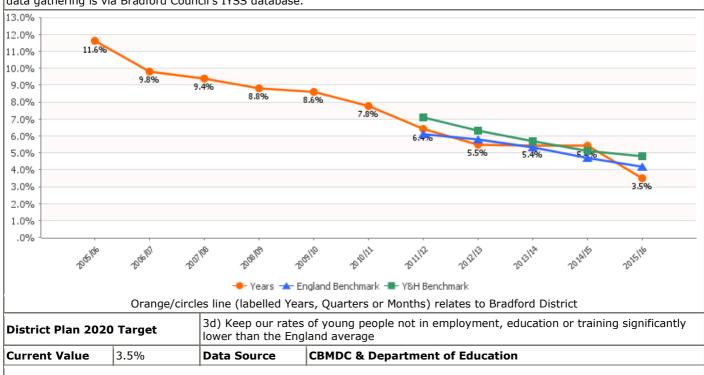

Current Value 45.60% Data Source National Statistics: Department for Education (Key Stage 4 Data)

The latest figure reported here is for academic year 2015/16. It is likely to be the final year in which this measure is published.

The latest figure reported here is for academic year 2015/16. It is likely to be the final year in which this measure is published; it has been replaced with Progress 8 and Attainment 8. These data are provisional, based on <a href="SFR 48/2016">SFR 48/2016</a> published by DfE on 13th October 2016. Final KS2 data will be published in January 2017.

NEET (not in education, employment or training) rate for academic age 16 to 18

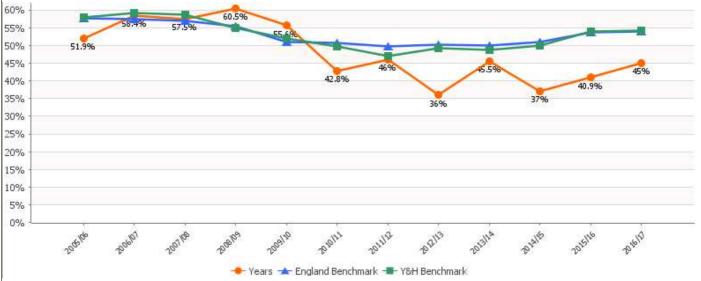

#### PHOF1.01i Children in poverty Aim to Minimise Percentage of all dependent children under 20 in relative poverty (living in households where income is less than 60 per cent of median household income before housing costs). The reported figure for 2010/11 relates to a shapshot at 31 August 2010, 2011/12 a snapshot at 31 August 2011 and so on. 32.5% 31.36% 30% 28,99% 27.5% 25% 26.08% 22.5% 23,63% 23.6% 20% 17.5% 15% 12.5% 10% 7.5% 5% 2.5% 0% 202113 201011 2006/07 🔷 Years 🗻 England Benchmark 🖶 Y&H Benchmark Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District 3e) Reduce child poverty levels in line with Yorkshire & Humber levels, and in all parts of **District Plan 2020 Target** the district **Current Value** 28.6% **Data Source** Public Health Outcomes Framework

A more detailed analysis on the latest Bradford data will be included in next month's District Dashboard. In the meantime the national analysis published alongside the figures states '[the increase] does not necessarily imply that the incomes of these families have declined. The low-income threshold, which is 60 per cent of the median income, rose from £218 in 2013, to £253 in 2014. The majority of the increase can be explained by this change in the threshold.'

Aim to Maximise

Proportion of the population (16-24) who are in employment according to the International Labour Organisation (ILO) definition. Note that the Confidence Interval for this indicator for Bradford is in the region of +/-9% - this may explain the erratic nature of the reported figures for Bradford. The latest reported figure is likely to be the latest available 12-month rolling figure.

Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District

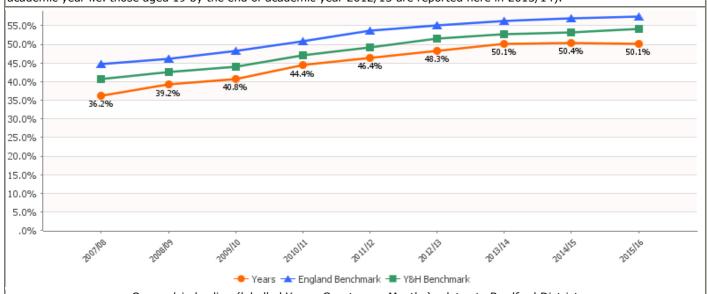

District Plan 2020 Target 3x		3x) Context measure		
Current Value 45%		Data Source	Annual Population Survey NOMIS	
The latest reported figure is for July 2015 to June 2016				

Percentage achieving a Level 3 qualification by the age of 19

CIS\_014 (NI 80)

Aim to Maximise

The percentage of young people studying in each local authority at age 16 who attain Level 3 (2 or more A Levels or equivalent qualifications) by the age of 19 (reported by those aged 19 by the end of the previous academic year i.e. those aged 19 by the end of academic year 2012/13 are reported here in 2013/14).

Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District

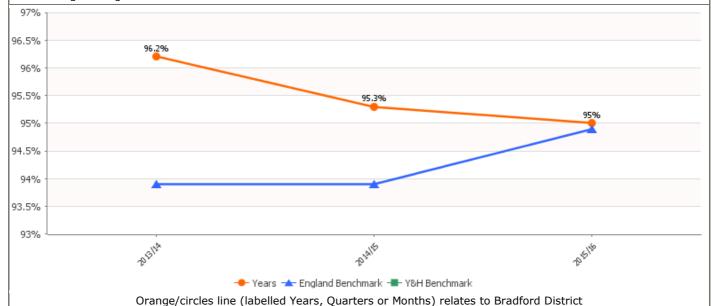

District Plan 2020 Target		3x) Context measure		
Current	Value	50.1%	Data Source	National Statistics: Department for Education (16-19 attainment) Table 25a

Although at Level 2 and Level 2 with English and Maths Bradford improved and closed the gap on the national figure, for the second year in succession attainment of Level 3 fell marginally. As the national figure increased slightly the gap is 0.5pp higher than in 2014 and 131st of 152 LAs nationally (130th in 2014). The Review of post-16 that has been conducted this year has led to an action plan for both rapid and longer term improvements in attainment. Please note that historical figures have been rebased to match the latest nationally published data.

Aim to Maximise

This measure, the rate of participation in learning, evidences our success as a district in implementing the raising of the participation age. Since the autumn of 2013 each young person in England between academic age 16 and his/her 18th birthday has a duty to be in a learning situation; and each local authority has a duty to facilitate, ensure and evidence this. The Department of Education requires monthly data returns on residents in both the academic age 16 cohort and the full academic age 17 cohort (including those already aged 18). In turn it provides full summaries of LA and England figures three times a year: December, March and June. We use the December figures for our annual outturn. Up to and including academic year 2015/16 we have focussed on young people of academic age 16 and the meeting the duty rate; this is the rate for participation plus the rate for working towards (participation) - the latter consists of NEET young people with a future start date in learning. Local data gathering is via Bradford Council's IYSS database.

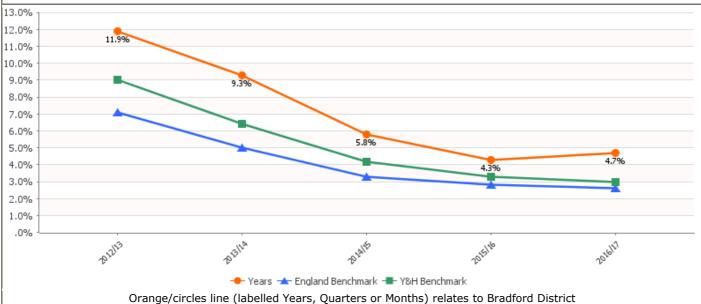

District Plan 2020 Target		3x) Context measure	
Current Value 95% Data Source		Data Source	CBMDC & Department for Education

Raising of the participation age figures for December 2015 for residents of Bradford district showed that the vast majority of academic age 16 and 17 young people were meeting the duty to participate in learning: 95% at 16, 88.6% at 17.

#### DD\_02 Claimant Rate (18-24 year olds)

Aim to Minimise

This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit who are out of work and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed. The latest value reported is likely to correspond to the most recent month.

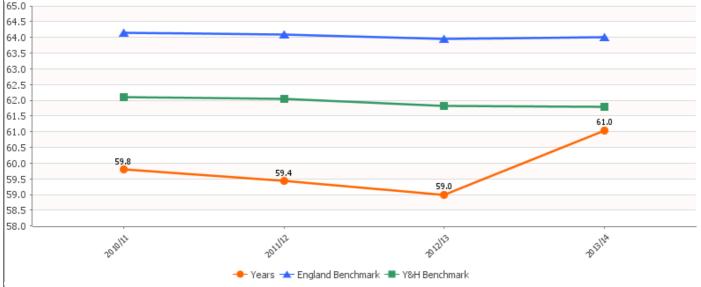

District Plan 2020 Target 3		3x) Context measure	
Current Value 4.7%		Data Source	NOMIS (Claimant Count and Proportions)
enter new status update			

## 04) Better health, better lives

#### PHOF0.1ia Healthy life expectancy at birth (Female)

Aim to Maximise

Healthy life expectancy at birth: the average number of years a person would expect to live in good health based on contemporary mortality rates and prevalence of self-reported good health. Note that the values actually relate to data aggregated over a three year period, so 2010-12 is reported here as 2011/12, 2011-13 as 2012/13 and so on.

Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District

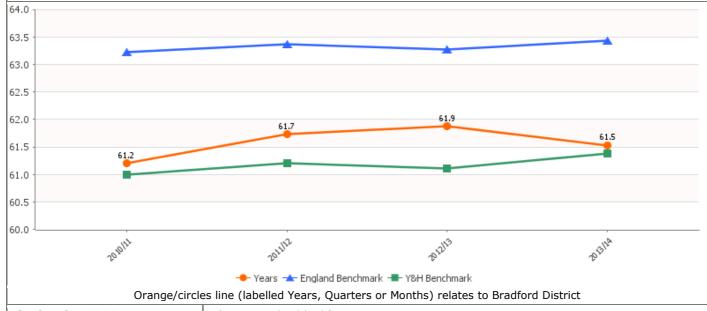

District Plan 2020 Target		4a) Increase healthy life expectancy	
Current Value	61.0	Data Source	Public Health Outcomes Framework

The latest figures (for the period 2012-2014) show an improvement in healthy life expectancy for females in Bradford and District. This improvement is not statistically significant.

#### PHOF0.1ib Healthy life expectancy at birth (Male)

Aim to Maximise

Healthy life expectancy at birth: the average number of years a person would expect to live in good health based on contemporary mortality rates and prevalence of self-reported good health. Note that the values actually relate to data aggregated over a three year period, so 2010-12 is reported here as 2011/12, 2011-13 as 2012/13 and so on.

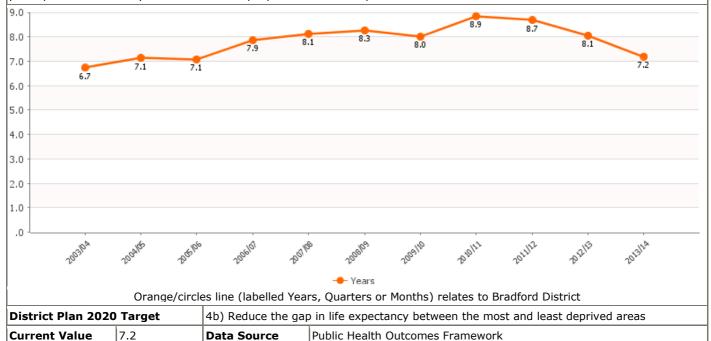

District Plan 2020 Target 4a) Increase healthy life expectancy

Current Value 61.5 Data Source Public Health Outcomes Framework

The latest figures (for the period 2012-2014) show a small reduction in healthy life expectancy for males in Bradford and District. This change is not statistically significant.

PHOF0.2iiia Difference in life expectancy at birth between the most and least deprived parts of the District (Females)  Aim to Minimise	
---	--

Based on local deprivation deciles: the range in years of life expectancy based on whether you were born in the most deprived or least deprived part of the district. So for example, if girls born in the least deprived parts of the district in 2011/12 were expected to live to 84 years old, girls born in the most deprived parts of the district would be expected to live on average 75 years (8.7 years less). (Technical Name: Slope index of inequality in life expectancy at birth within English local authorities, based on local deprivation deciles within each area). There are no directly comparable benchmarks for this indicator at regional and national level due to the way it is calculated. Note that the values actually relate to data aggregated over a three year period, so 2010-12 is reported here as 2011/12, 2011-13 as 2012/13 and so on.

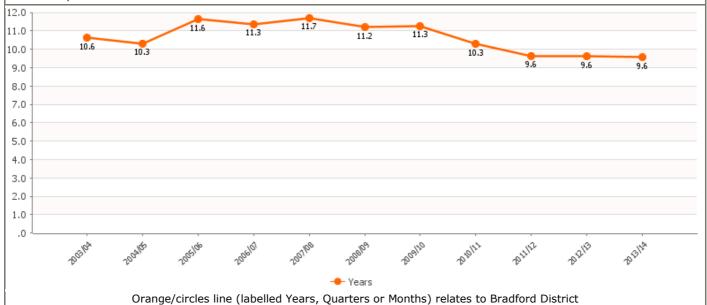

The latest figures (for the period 2012-2014) show that there is less of a difference in life expectancy at birth for females in the most and least deprived parts of the District. This represents an encouraging recent downward trend, and the gap is at its narrowest since 2004 – 2006. A degree of caution must be exercised when interpreting the figures, however, as the difference between the highest and lowest rates is not statistically significant.

PHOF0.2iiib	Difference in life expectancy at birth between the most and least deprived parts of the District (Males)	Aim to Minimise
-------------	--	-----------------

Based on local deprivation deciles: the range in years of life expectancy based on whether you were born in the most deprived or least deprived part of the district. So for example, if boys born in the least deprived parts of the district in 2011/12 were expected to live to 80 years old, boys born in the most deprived parts of the district would be expected to live on average 70 years (9.6 years less). (Technical Name: Slope index of inequality in life expectancy at birth within English local authorities, based on local deprivation deciles within each area).

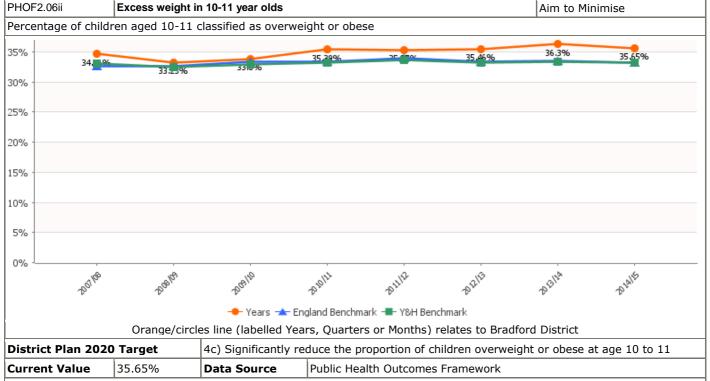

Note that the values actually relate to data aggregated over a three year period, so 2010-12 is reported here as 2011/12, 2011-13 as 2012/13 and so on.

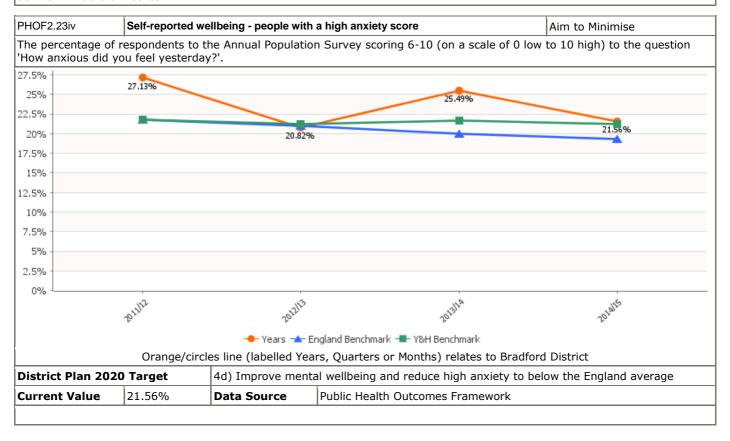

District Plan 2020 Target 4b) Reduce the gap in life expectancy between the most and least deprived areas

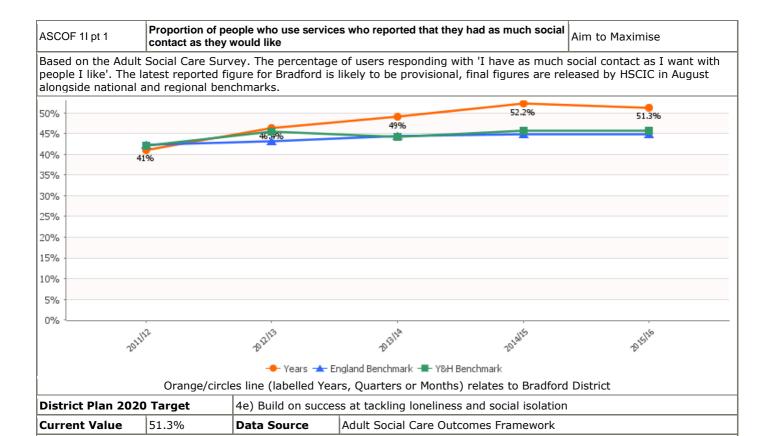

Current Value 9.6 Data Source Public Health Outcomes Framework

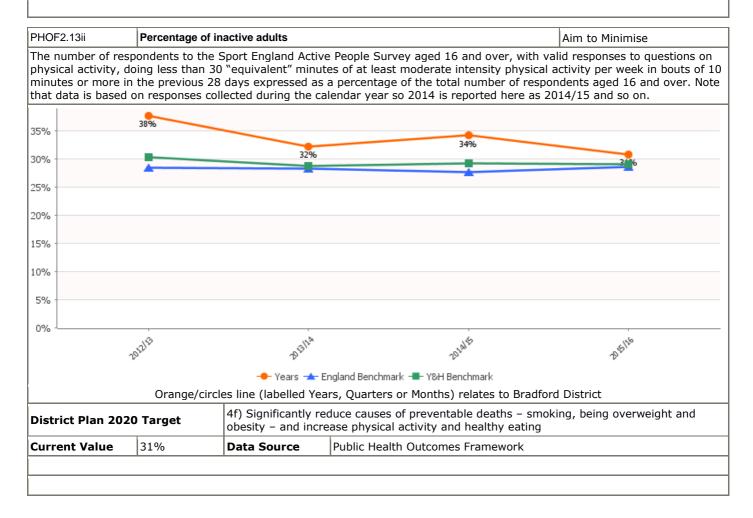

The latest figures (for the period 2012-2014) show that there is less of a difference in life expectancy at birth for males in the most and least deprived parts of the District. This represents an encouraging recent downward trend, and the gap is narrower than at any time since figures have been available (beginning 2002 – 2004). A degree of caution must be exercised when interpreting the figures, however, as the difference between the highest and lowest rates is not statistically significant.

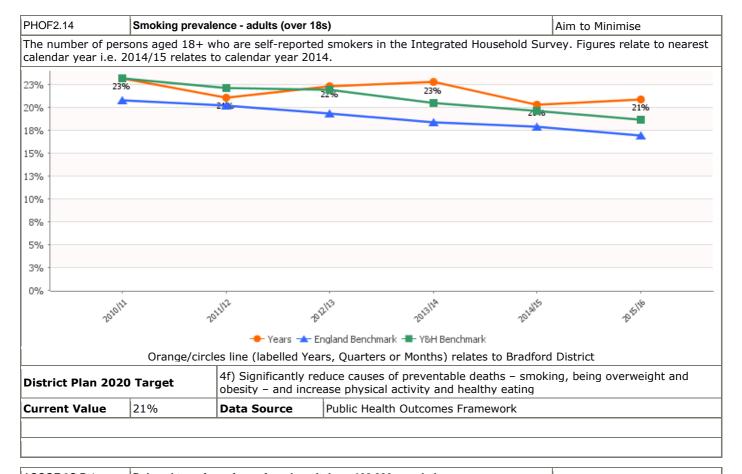

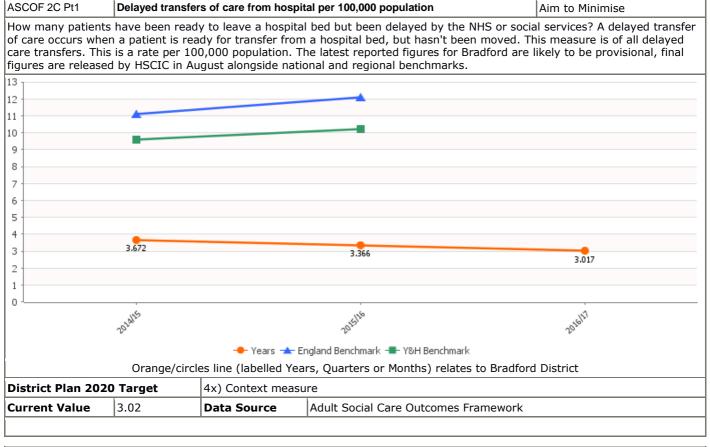

In year 6, 25.2% of children in the most deprived quintile were obese, compared with 8.5% in the least deprived quintile. In Year 6 the highest levels of obesity are in Keighley Central, Windhill and Wrose, Thornton and Allerton, Heaton and Little Horton which all have rates greater than 25%. Particular wards of concern are Heaton and Little Horton as these wards also have the highest levels of obesity and overweight combined. Rates in these wards are all greater than 42% compared to the average of 35.7% in Bradford District.

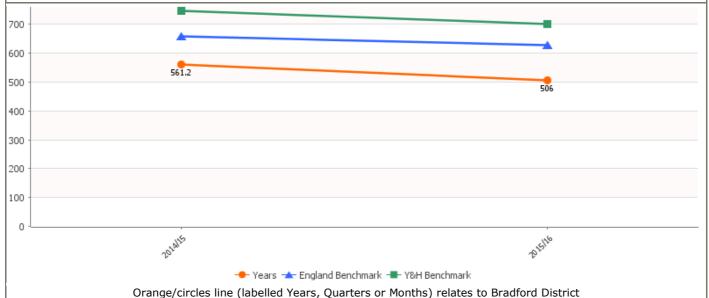

Aim to Minimise

Older adults (aged 65 or over) whose long term support needs were met by

DD\_ASCOF2Apt2

#### admission to residential and nursing care homes (per 100,000 people)

How many adults aged 65 and over had their long-term support needs met by admission to residential and nursing care homes, compared to the population in this age group. Note that the definition changed in 2014-15. Previous to 2014-15, the measure was defined as "Permanent admissions of older adults to residential and nursing care homes, per 100,000 population". Data previous to 2014-15 is not reported here as it is not directly comparable.

District Plan 2020 Target 4x) Context measure

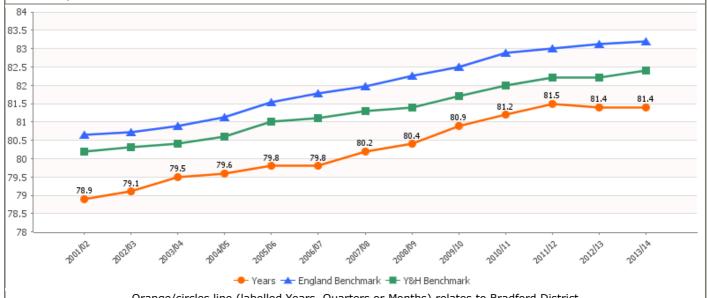

**Current Value Data Source** Health & Social Care Information Centre. Powered by LG Inform Plus.

Latest figures as published by NHS Digital (published October 2016). 2014-15 figures revised due to latest updated population estimates being available.

#### PHOF0.1iia Life Expectancy at birth (Female)

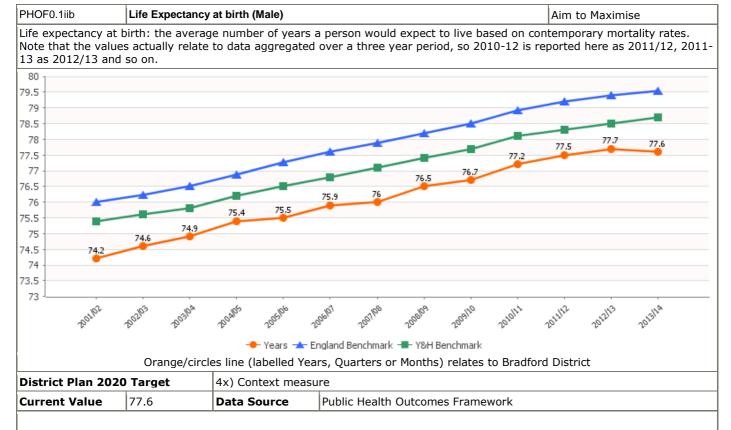

Aim to Maximise

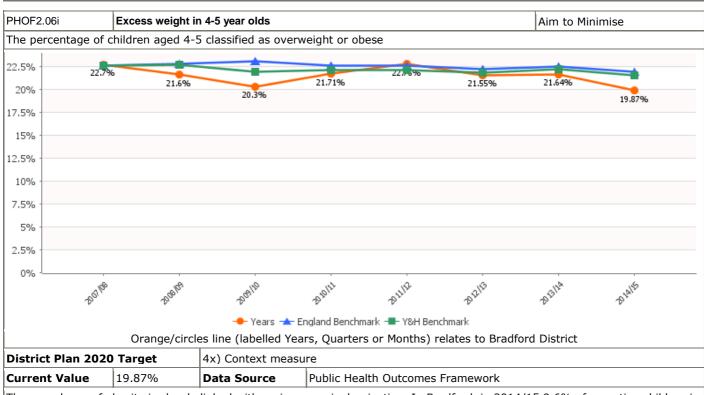

Life expectancy at birth: the average number of years a person would expect to live based on contemporary mortality rates. Note that the values actually relate to data aggregated over a three year period, so 2010-12 is reported here as 2011/12, 2011-13 as 2012/13 and so on.

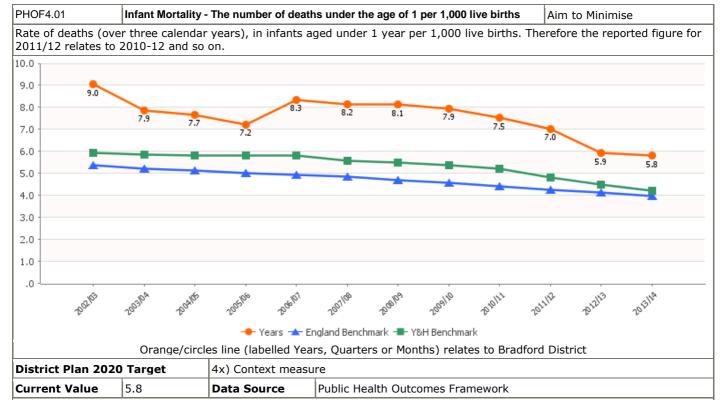

Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District

District Plan 2020 Target		4x) Context measure	
<b>Current Value</b>	81.4	Data Source	Public Health Outcomes Framework

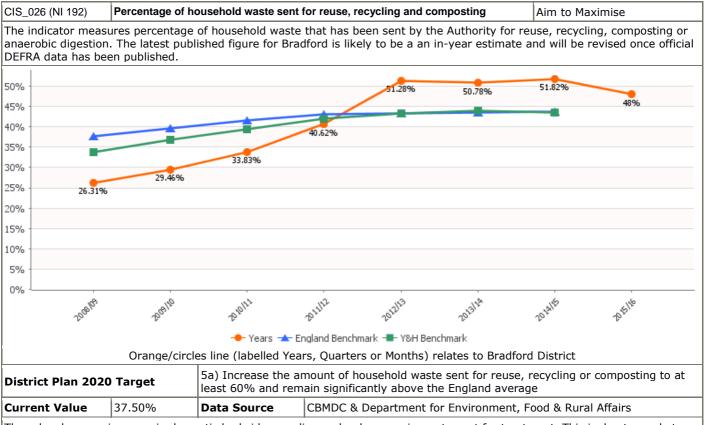

The prevalence of obesity is closely linked with socioeconomic deprivation. In Bradford, in 2014/15 9.6% of reception children in the most deprived quintile were obese, compared with 3.7% in the least deprived quintile. In Reception the highest levels of obesity are in Bradford Moor, Idle and Thackley, Tong, Toller, Keighley Central, Bowling and Barkerend, Clayton and Fairweather Green and Royds which all have rates greater than 10%.

The figure of 5.8 relates to the period of three calendar years 2012, 2013 and 2014. Some historic figures have been revised by ONS.

# 05) Safe, clean and active communities

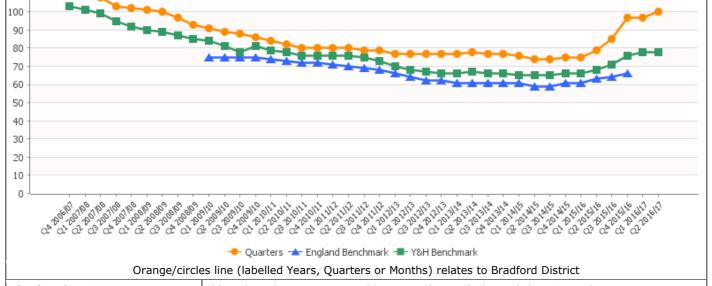

There has been an increase in domestic kerbside recycling and a decrease in waste sent for treatment. This is due to market values for recycled waste falling. Qtr 4 figure is an estimate until the figures are finalised but the estimate should be close to the actual

### DD\_10 Crime rate per 1,000 population (excluding fraud offences) Aim to Minimise

110

Total police recorded crimes per 1,000 population based the previous rolling 12 months. The increase in the crime rate at Apr 15 is largely due to stricter adherence to the National Crime Recording Standard, which means that all reported crime is now recorded, unless there is compelling evidence to the contrary.

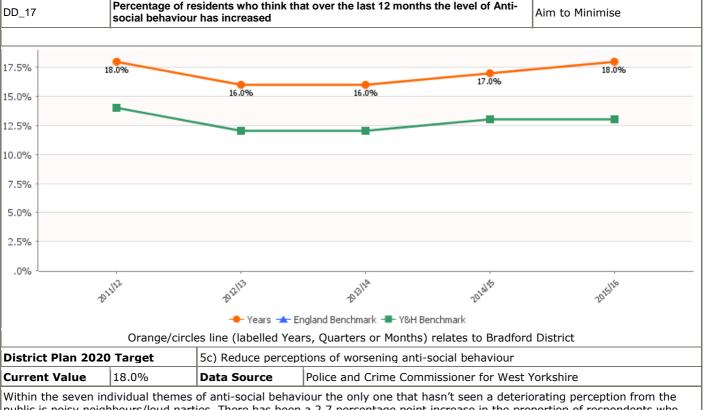

District Plan 2020 Target 5b) Reduce the crime rate and bring it in line with the Yorkshire & Humber average

Current Value 100 Data Source Local Police Recorded Crime Data - Home Office. Powered by LG Inform Plus.

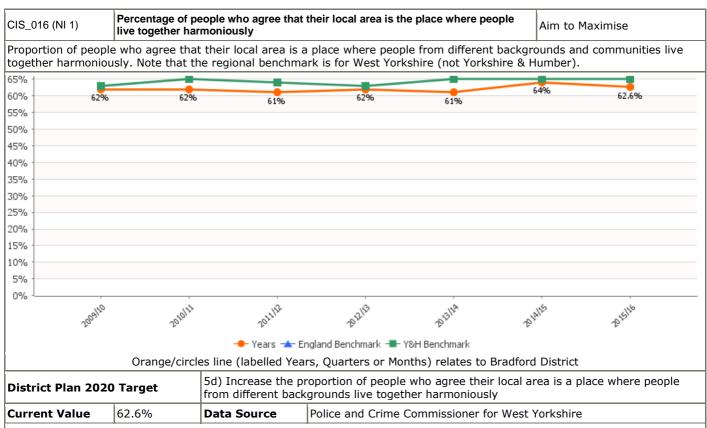

Police recorded crime data is not considered by the ONS to be a reliable measure of trends in crime - a large proportion of the rise is considered to be due to continued improvements in crime-recording practices and processes.

Recent analysis was undertaken at a West Yorkshire level of the increase in recorded crime and whether this increase translates into increased risk of victimisation rather than administrative (Crime Data Integrity) change. The analysis suggests that, of the

15.4% increase in total recorded crime in West Yorkshire for April – August 2016, 11.2% relates to CDI, 0.4% relates to proactivity (drugs and offender management) and 3.9% relates to an increase in risk. The offence types with increased risk are largely acquisitive crime (domestic burglary, vehicle crime, shoplifting and bicycle theft) but also lower rates/volume increases in violent crime, personal robbery, other sexual offences (not rape), criminal damage, possession of weapons and miscellaneous offences (indecent images). Analysis at district level is currently being undertaken

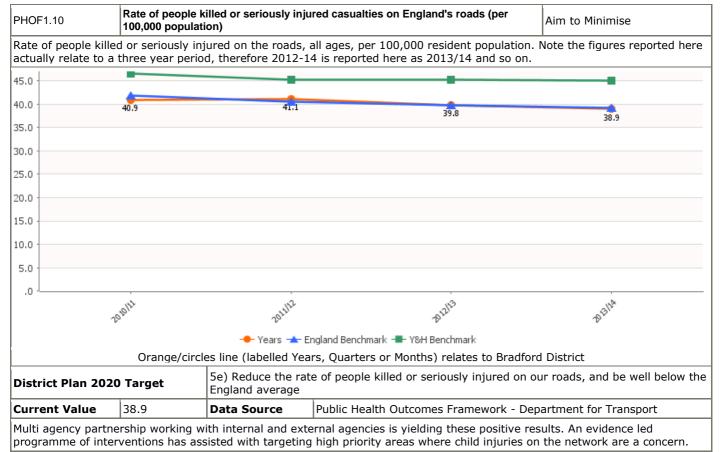

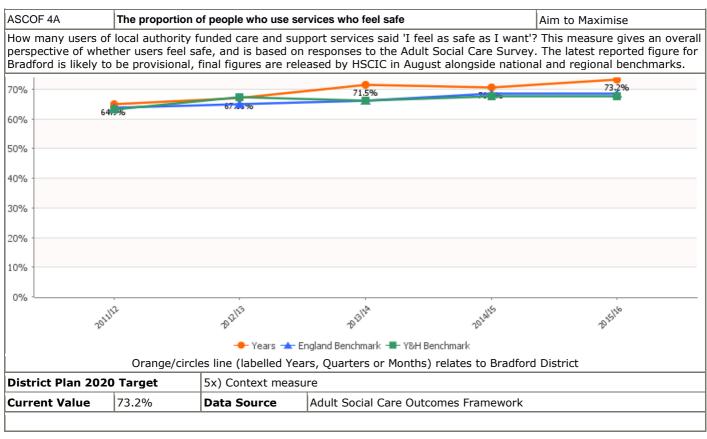

Within the seven individual themes of anti-social behaviour the only one that hasn't seen a deteriorating perception from the public is noisy neighbours/loud parties. There has been a 2.7 percentage point increase in the proportion of respondents who think there is a problem with traffic issues and a 2.6 percentage point increase in those who think there is a problem with rubbish and litter lying around.

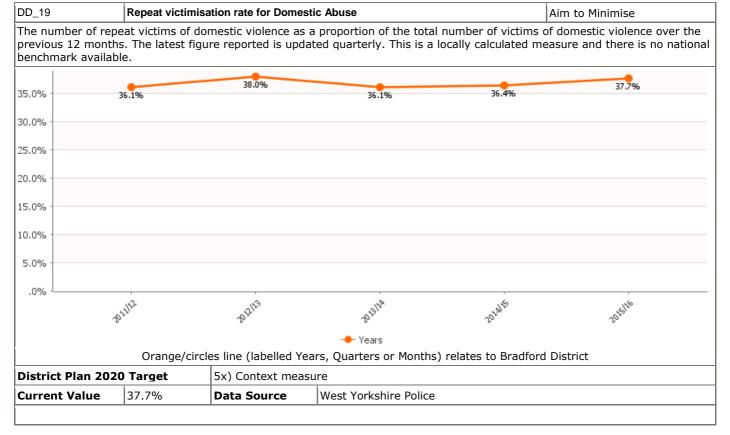

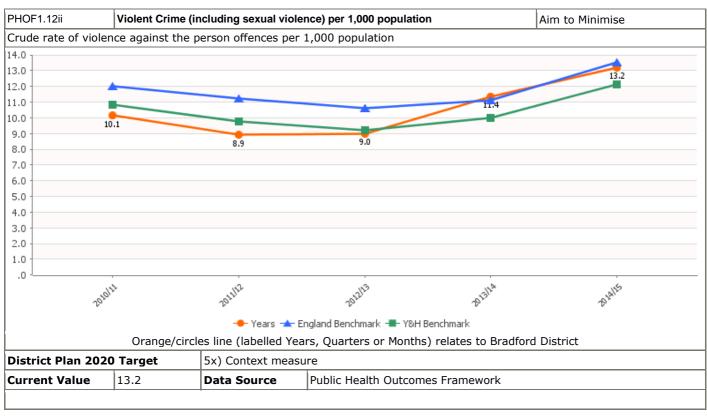

Performance on this indicator has fallen by 1.4 percentage points between 2014/15 and 2015/16, from 64% to 62.6%. Bradford East has the lowest proportion of survey respondents who believe people live together harmoniously (59.9%) whilst Shipley has the highest (69.8%). The performance for West Yorkshire as a whole has fallen by 0.5 percentage points from 65.1% to 64.6%.

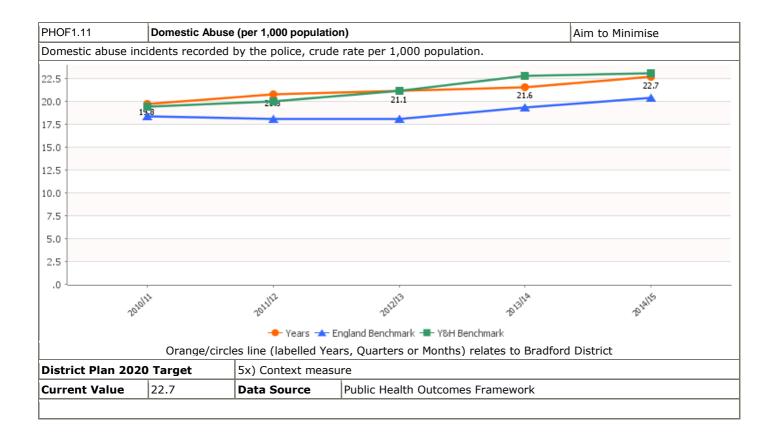

As a District with both high levels of inequality and deprivation and an ethnically and culturally diverse population, Bradford faces challenges to its aspirations to be a District where people from different communities get on well together and respect and celebrate their differences.

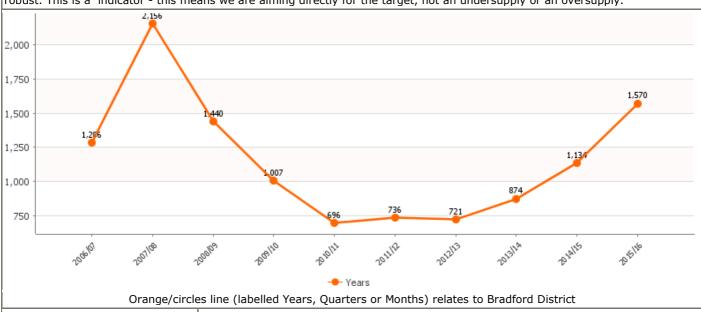

# 06) Decent homes that people can afford to live in

CIS\_05 (NI 154) Net number of additional homes provided

Aim to Maximise

The difference in the total housing stock over a 12 month period measured at the start of April. This change will be made up of new build, changes of use (to and from business usage), conversions (knocking through or sub-division of dwellings), demolitions, and other changes (such as caravan movements). This is not a measure of how much new build housing there has been over the last 12 months. Note that there was a change in data collection methodology in 2010 to make the figures more robust. This is a indicator - this means we are aiming directly for the target, not an undersupply or an oversupply.

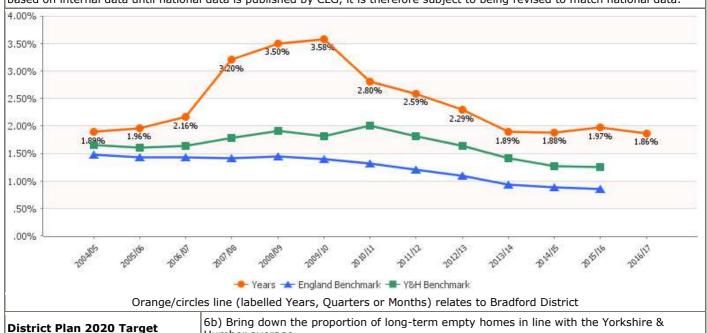

District Plan 2020 Target 6a) Create 8,000 more home

Current Value 1,570 Data Source Housing Flows Reconciliation

The number of additional homes provided appears to have continued going up 2015/16 after a significant dip caused by the economic downturn in 2008. This indicator does tend to lag behind factors like economic changes, because of the time it takes to deliver new housing. The figure for 2015/16 is a provisional figure that uses un-audited data – this means that it might change later in the year when the final figure for additional homes provided is reported to the Government.

DD_08	Proportion of long term empty homes in the District	Aim to Minimise

The proportion of housing classed as long-term empty using the New Homes Bonus definition (empty for longer than 6 months and substantially unfurnished) against the dwelling stock estimates published by CLG. Vacant stock is a snapshot taken in October each year and reported to CLG via the CTB1 return. Dwelling stock estimates in CLG's table 125 underestimate the dwelling stock in the Bradford district by approximately 2,000 properties due to CLG's methodology. However, table 125 has been used to provide as the denominator to provide consistency for the benchmark regionally and nationally. Note that the regional benchmark is West Yorkshire, not Yorkshire & Humber. The latest published figure for Bradford may be an estimate based on internal data until national data is published by CLG, it is therefore subject to being revised to match national data.

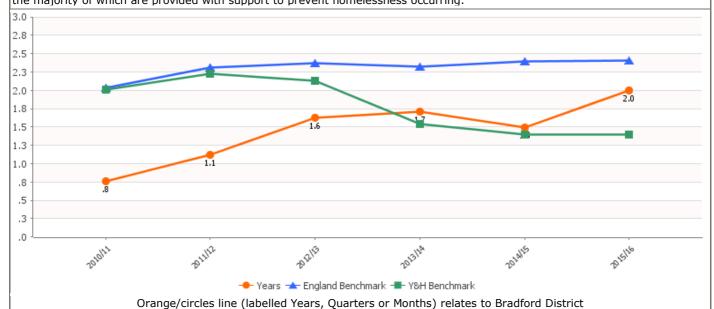

District Plan 2020 Target		6b) Bring down the proportion of long-term empty homes in line with the Yorkshire & Humber average		
Current Value	1.86%	Data Source	CLG Table 125 (Dwelling Stock Estimates by LA) & Table 615 (Vacant Dwellings by LA)	

The proportion of long-term empty homes has reduced from 1.97% in 2015/16 to 1.86% in 2016/17, although this is based on provisional figures (benchmarks not yet available). This is moving in the right direction, but it will be extremely challenging to reduce the proportion of empty homes in line with the Yorkshire and Humber average with the existing resources, because this would require around 1,600 more empty properties to be bought back into use by 2020 which is a significant increase on the current rate. The actual number of long-term empty homes has dropped by 210 in the last year (October 2015 to October 2016) – while a lot more properties will have come back in to use in this time, this will have been offset by other properties becoming treated as long-term empties. The council's empty homes team has helped to bring around 115 empty properties back in to use in the last year, which are often the more problematic ones which have been empty for a long time and which have been affecting their neighbourhoods. The empty homes team identifies the owners of empty properties and will take enforcement action where it is necessary (or possible) and also offers financial assistance where this will bring the property back in to use.

# DD\_21 Statutory homelessness - rate of homelessness acceptances per 1,000 households

Based on the number of households who are found to be eligible, unintentionally homeless and in priority need, for which the local authority accepts responsibility for securing accommodation under part VII of the Housing Act 1996 or part III of the Housing Act 1985. This is not a measure of how many households are seeking advice from the council regarding homelessness, the majority of which are provided with support to prevent homelessness occurring.

District Plan 2020 Target		6c) Bring down statutory homelessness to less than one household in every 1,000	
Current Value	2.0	Data Source	DCLG Statutory Homelessness Statistics - Powered by LG Inform Plus

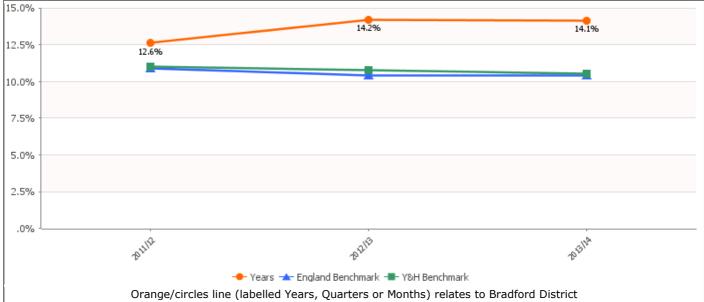

The rate of homelessness acceptances is steadily growing. There is no sign of the rate coming down in the foreseeable future and this may also be impacted on by factors like the roll-out of Universal Credit and other benefit changes. The expected continued growth in homelessness acceptances means that the target is probably unachievable.

#### PHOF1.17 Percentage of households in fuel poverty

Aim to Minimise

Aim to Minimise

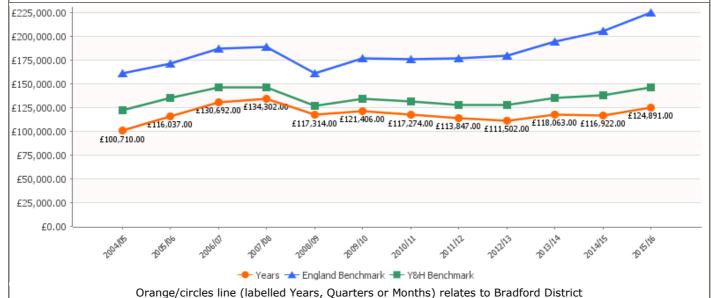

This is a proxy of poor quality housing, it effectively measures energy inefficient housing lived in by low income households. The percentage of households that experience fuel poverty based on the "Low income, high cost" methodology. Under the "Low Income, High Cost" measure, households are considered to be fuel poor where they have required fuel costs that are above average (the national median level) AND were they to spend that amount, they would be left with a residual income below the official fuel poverty line.

	Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District			
District Plan 2020 Target		6d) Reduce the percentage of households in fuel poverty		
<b>Current Value</b>	14.1%	Data Source	Public Health Outcomes Framework	
		·		

#### DD\_14 Average House Price (UK House Price Index)

The UK House Price Index is the Government's single official source on house prices. This replaces the previous Land Registry House Price Index (used prior to 2016). All historical data in this measure has been re-based in June 2016 to match the new 2016 methodology. It is not based on an mathematical mean. The House Price Index allows us to compare average house prices regionally and nationally but it cannot be used at sub-district geographies. Mathematical mean should be used sub-district but it is important to recognise that these cannot be compared with the House Price Index value for the district. 2014/15 figure relates to April 2015 and so on. This indicator does not have a polarity, an increase (or a decrease) will have both positive and negative effects - it is still included as we need to understand what house prices are doing so we can mitigate those effects effectively.

District Plan 2020 Target

6x) Context measure

Current Value

£124,891.00

Official UK House Price Index (Land Registry and ONS 2016

In June all house price data has been re-based to match the Governments new methodology for tracking house prices 'the UK House Price Index'. Previously the Land Registry House Price Index was used which reported much lower values for Bradford.

#### DD 16 Total housing stock Aim to Maximise The total number of self contained dwellings (houses, flats, apartments etc). This does not equate to households as a dwelling can be empty and therefore not include a household. The latest value is likely to be the most recent month. 21446/ 214500 214000 213792 213500 213000 212302 212500 212000 211500 211000 210717 210500 210193 210000 209495 209500 208838 209000 2011112 DRIE Years Orange/circles line (labelled Years, Quarters or Months) relates to Bradford District **District Plan 2020 Target** 6x) Context measure 214467 **CBMDC Council Tax Current Value Data Source**
