
For consideration at the meeting of the Executive on 6 December 2016
1 Introduction: financial context

1.1 Bradford Council has had to find more than £250m in savings and increased income over the past six years due to imposed funding cuts from central government, rising demand for services and increasing costs.

1.2 Between now and 2020 we are forced to find another £82m of savings and extra income to balance the books; this is on top of pre-agreed savings of £24m and further increases in Council Tax. This is against the backdrop of the cuts already implemented since the government began its austerity policy in 2010.

1.3 Bradford Council’s net budget in 2020 will be around half what it was in 2010 in real terms, accounting for inflation and the growing demand for services.

1.4 Having already managed £250m in savings and additional income since 2010, we have faced extremely difficult decisions in our challenge to close Bradford’s £82m funding gap over the next four years. Any organisation no matter how efficient or innovative would face a major challenge in managing a 50% cut to its spending power. Local residents, staff and partner organisations will inevitably feel the impact as the government’s policy to cut local authority funding significantly reduces services.

1.5 We must not let the cuts dim our ambitions for the Bradford District. In the proposals we have set out our detailed choices for the next two years and our broader plan for the subsequent period to 2020 to close the significant funding gap while achieving the best possible outcomes.

1.6 The graph below illustrates the gap we are faced with if we fail to act:

---

2 The impact of the austerity policy on Bradford District

2.1 Bradford has shouldered a disproportionate share of the Government’s austerity policy. Funding decisions which favour less deprived areas are resulting in a postcode lottery around the country. In last year’s budget proposals we cited the government’s own figures which showed Bradford’s spending power had reduced by twice the national average, while Wokingham, the country’s least deprived authority, had actually seen an increase.

2.2 Recent research published by the IFS on 28 November 2016 also suggests there have been very different levels of cuts in different part of the country between 2009/10 and 2016/17. According
to the IFS, Bradford Council has had to cut its spending on services by 33%, whereas Surrey and Hampshire, for example, have each made cuts of just 1%. The IFS figures have been adjusted to remove spending in new areas or changing responsibilities and as a result exclude cuts to funding streams such as Public Health grant, which masks the full picture.

2.3 As government policy places an increasing emphasis on council tax and business rates income for funding local services, there is a risk that areas like Bradford with fewer high-value properties and relatively lower business rates face an ever growing challenge to close the gap with wealthier areas.

2.4 In his autumn statement on 23 November 2016, the Chancellor confirmed the government has withdrawn its pledge to achieve a surplus in the economy by 2020. He also said that new investment, not just cuts, is necessary to unlock economic growth. We welcome the new approach to invest in infrastructure. This Executive will continue to push for a fair allocation for the Bradford District of infrastructure investments and we are willing to work constructively with the government and neighbouring authorities to achieve it.

2.5 Bradford is not unique in facing spending cuts. Statistics suggest that since 2010 the UK’s local government workforce has been cut by around 25%. The central government workforce has increased by almost 4% in the same period (ONS June 2016). Many parts of the country have lost libraries, theatres, museums, leisure centres, children’s centres and community centres; and seen reductions in many other services. In Bradford District we have successfully maintained important services and worked hard to minimise the impact on residents, visitors and partner organisations. But the decisions are increasingly difficult.

3 We are focused on outcomes

3.1 We must maintain a pinpoint focus on our priorities while our funding reductions continue. From the outset in this budgeting process, we have refused to simply sit back and preside over departmental and service reductions. Instead, we have worked with officers to identify the district’s absolute priorities and the activities which have the greatest impact for local people. Instead of simply reducing existing services, officers have been tasked with looking afresh at our activities right across the board and ensuring every penny spent has the greatest possible effect on the key priorities we have outlined in our Council Plan:
- Better skills, more good jobs and a growing economy
- Decent homes that people can afford to live in
- A great start and good schools for all our children
- Better health, better lives
- Safe, clean and active communities
- A well-run council.

3.2 The reality of the budgeting process means that, as with previous years, we have had to take decisions we would not otherwise wish to take; we have been faced time and again with competing choices each with a compelling cause.

3.3 However, we want to assure local people that we will continue to fight for a fairer deal for this district and not simply accept ongoing cuts. We are making every effort to ensure our voice is heard nationally and we will continue to make rigorous representations for the proper investment our district needs to help unlock its huge potential and ensure local people get a fair share of any future national economic growth.
4 Inclusive growth

4.1 The current government has, encouragingly, spoken about inclusive growth. We remain hopeful that the government’s policies will match the rhetoric and that they will work constructively with us to ensure people in Bradford District don’t miss out on future opportunities. We will continue to make the case for major infrastructure investments in our district.

4.2 We are committed to helping ensure that individual rights are protected and respected regardless of age, disability, sex, gender, race, religion or sexual orientation. That commitment underpins everything we do and in putting forward each of the proposals we have considered the potential impact on all protected characteristics. The equality impact assessments are included in the published budget documents.

4.3 As well as our commitment to safeguarding individual rights, we are also calling on local people, partner organisations, community groups and businesses to take on greater responsibilities and work with us in achieving our mutual goals for the district.

4.4 We will work with staff and trade unions as we rise to the challenges. We value our staff and wholeheartedly believe that their skills and work ethic must be a fundamental part of the solution as we move forward and evolve into a smaller but still hugely influential organisation in the future. We are grateful to our employees – 80% of whom are residents in the district – for their impressive work amid the challenging circumstances of austerity and we will continue to do everything we can to mitigate the inevitable impact.

5 Our proposals

5.1 We are determined to focus on what our district can achieve. In spite of the severity of the government cuts, we are making a commitment for the next two years to:
- Protect the youth service – we are the youngest city in the country
- Keep all four of our museums open
- Keep all seven of our children’s centre clusters open
- Ensure continuing libraries provision

5.2 However we will not be able to retain all of the above services in their current form all the way to 2020 given the gap arising from more government cuts and rising demand and costs. We will have no option but to look at how these services and others outside our statutory role can be remodelled in order to ensure continuing provision for local people.

5.3 This means that beyond the detailed proposals we have set out for the next two years, nothing can be taken for granted. There is the very real risk that services will have to cease if we are unable to find new ways of retaining them at a reduced cost, such as through alternative models of delivery or greater community or volunteer involvement.

5.4 Our proposed savings for the next two years include:
- Taking £8m a year out of Adult social care as part of a transformation of the service
- Closing all public toilets except the facilities next to the mirror pool at City Park for children’s changing
- Transferring all 7 community halls via asset transfer to communities, failing that they will close
- Withdrawing funding for Jamie’s Ministry of Food
- Withdrawing from the direct management and maintenance of sports pitches and bowling greens
- Reducing clean teams and mechanical sweepers
- Deleting the post of Deputy Lord Mayor
- Cutting 20% of the events and festivals budget
- Introducing limited street lighting hours for non principal roads
- Further reducing the libraries budget with increasing reliance on volunteers
- Cutting 416 jobs on top of more than 2,000 jobs we’ve had to cut over the last five years
- Reduce economic development funding, but target it for greatest impact

6 Council tax

6.1 We feel we have little choice but to raise council tax by 1.99% and implement the social care levy by the government’s stated maximum of 2% for each of the next two years. In 2017/18 this 3.99% increase amounts to an additional cost of £2.66 a month for a Band A council tax payer and £7.97 a month for a Band H payer. In 2018/19, it amounts to an additional monthly increase of £2.76 in Band A and £8.28 in Band H.

6.2 If we did not raise council tax in this way, even more services would be lost as we would be forced to find another estimated £27 million over four years.

6.3 Our council tax is currently the lowest in West Yorkshire. Nevertheless we don’t take the decision lightly and we recognise the additional burden on local people at a time of economic hardship.

6.4 The government’s policy for addressing the funding gap in local services is for people to pay more council tax with an expectation that councils will implement the social care precept. The effect of the government’s approach is that nationally people are paying more council tax while seeing local services continue to reduce, especially in less wealthy areas with fewer high value properties, as the council tax income falls well short of filling the shortfall.

7 Social care

7.1 There is a national funding crisis around adult social care. Local authorities from across the political spectrum, health professionals, charities and many others raised concerns when the chancellor did not mention social care in his autumn statement. We have argued that having a proper plan for social care will improve people’s lives and ease pressures on the NHS.

7.2 There is a growing national consensus that the social care precept falls considerably short of solving the social care funding crisis as demand rises with a growing elderly population. In the next two years, the social care precept will bring in an additional £6.6m, which is unlikely to meet the increased cost of the national living wage.

7.3 Nevertheless we are committed to rising to the challenge in spite of our shrinking resources. We are committed to ensuring that the most vulnerable people in our society get the best possible care. We are committed to ensuring that the local authority does not simply become a subdivision of the NHS. We must continue to ensure people get the universal services they rightly expect. We are proposing a radical adult services transformation plan which we accept is a major challenge and aims to save £8m every year to 2020.
7.4 The £8m annual saving is in addition to the pre-agreed 2017/18 savings of £10.2m in adult services which will also have to be delivered.

7.5 We will focus our investment on frontline social work. We will increase the level of preventative support for people, with a focus on supporting them in what they can do rather than what they can’t do. Earlier and better interventions help people to stay independent and in their own homes for longer and reduce the need for more intensive and costly interventions.

7.6 We want people to be empowered to live fulfilled and independent lives for as long as possible. Supporting people to stay independent also costs the state less money and saves valuable resources for our NHS partners.

7.7 We will offer people more choice and control in their own lives so they have a greater say in the support they receive. We will work closer than ever with health partners with the aim of integrating systems and sharing resources more effectively.

8 The impact on low income groups

8.1 We understand that increases in council tax and charges are an additional burden on local people, in particular those with the lowest incomes. We do not take these decisions lightly and we have considered this impact in making the proposals.

8.2 The best way of supporting people out of poverty is through employment and we recognise that the cuts may impact on our efforts to achieve this. However in mitigation we are continuing to invest in skills programmes aimed towards hard to reach groups which, although a non-statutory service, have a strong track record of helping people into work. We are also committed to working with schools, the voluntary sector, communities and businesses so we have a shared commitment to helping people on the education and employment ladder.

8.3 Depending on their circumstances people on low incomes will continue to have access to various services aimed at easing the burden. These include passport to leisure, housing benefit, discretionary housing payments, council tax reductions and our equity home loans scheme. The Council also continues to support the Bradford District Credit Union.

8.4 We will continue to look at all options for mitigating the impact of austerity cuts on our lowest earning residents.

9 The impact on the voluntary sector

9.1 We work in partnership with the voluntary and community sector (VCS) and we value that partnership which benefits local people. We want to continue working closely with the VCS in future as together we evolve to meet the restrictions of our funding. We want to work with the sector to support its transformation so that its value can be sustained.

9.2 Given our close links and many shared goals, the cut in funding from central government will inevitably also be felt by the VCS. We have considered this impact in making these proposals and we are committed to doing all we can to mitigate it. With shrinking resources and as part of our budgeting process which is focused on outcomes, we have had to review all the activities we fund to date and assess the scale of their impact and value for money.

9.3 We are committed to hearing the views of the VCS on these proposals during the consultation process, including in dedicated events, and we will continue to work closely with the VCS to achieve the best outcomes for the district.
10  Looking to the future: the cuts must not dim our ambitions for the Bradford District

10.1  We want to be honest about the challenges the district faces but we don’t want people to be overwhelmed. We want to work with government, with the NHS, with the voluntary sector, businesses and residents to make sure we build a better Bradford District together.

10.2  The government has said it wants to be inclusive. We wanted the autumn statement to give a strong indication that it was going to match those words with action. We still have hope that the government’s commitment to fund infrastructure will come to pass. Our district, with 530,000 people, needs to be off the branch line and on the Northern Powerhouse Rail line. Bradford must not be left behind.

10.3  On education the government is cutting the £7m Education Services Grant and increasingly resources are going direct to academies and free schools. However education remains our top priority. We have 102,000 children in school. Wherever our children are being educated, whether it be in a maintained school, academy or free school, we want to make sure they get the best education. We want to work with government to get the best for our young people. For the North to see an increase in productivity, the children of Bradford District need to be successful; they are the workforce of the future.

10.4  Bradford is a big, powerful city. We are bigger than Liverpool, Newcastle and Bristol. We have the youngest population in the UK. Nearly 25% of our population are under the age of 16. We have strong global links with 85% of our businesses trading internationally. That puts us in a strong position for a post Brexit world and we must capitalise on that strength.

10.5  To reach our potential the council cannot achieve this alone. The government cuts are drastically reducing the size of local government. So we are calling on our communities, public sector partners, businesses, the voluntary sector, faith groups, schools and residents to join with us in creating a better Bradford District. We will not let our challenges dim our ambitions. Such great ambitions can only be realised by us all working together.

11  Have your say: we will listen to your views

11.1  We want local people and organisations to have their say on these proposals. We are committed to considering all feedback we receive throughout the consultation period. We welcome all views on the proposals and the equality impacts. We have a track record of listening.

11.2  The consultation period started when the proposals were published last week and it will run until 12 February 2017.

11.3  Where possible people are encouraged to submit their views via the online questionnaire on the dedicated budget consultation pages on our website where the proposals are outlined in full. Click on the banner on the homepage or go to www.bradford.gov.uk/budget

11.4  Alternatively people are welcome to submit their views to the freepost address: Freepost RTLC-KEGA-JGRX, Bradford Council, Budget Consultation, Britannia House, Hall Ings, Bradford, BD1 1HX.

11.5  We will also be publicising the consultation on our social media and digital channels.

11.6  We will be holding a series of meetings with Communities of Interest to discuss the proposals and allow for feedback and ensure the voices of specific groups are heard.
APPENDIX C - DETAILED BUDGET CHANGES PROPOSED FOR 2017/18 - 2018/19 & SUBJECT TO CONSULTATION

</tbody>
</table>

The Substance Misuse service provides a number of recovery-focused services in the prevention, reduction and treatment of drug and alcohol misuse and its associated harms for individuals, families and communities. The service is currently provided for 4500 individuals in various locations across the district.

The budget for substance misuse services will be reduced through a combination of redesign and re-commissioning of services and services ceasing.

- The Substance Misuse Recovery Service is the new integrated drug and alcohol service currently out to tender, through which individuals receive a continuum of preventive measures, treatment interventions and recovery options. The review of the service will achieve savings in 2017-18 of £1.088m and £1.076m in 2018-19.

- The Substance Misuse Dual Diagnosis Service provides a specialist Dual Diagnosis from premises in both Bradford and Keighley, delivered by a team of specialist health care professionals. Over 4 years, patients will be gradually transferred to, and managed by, mainstream NHS Mental Health services and/or substance misuse services. This service will reduce in 2018-19 resulting in a saving of £487,000.

- The Supervised Medication Programme is delivered by 130 pharmacies across the district. The programme ensures that individuals in drug treatment are supervised in consumption of substitution medication within pharmacies and a reduction in demand for this service will lead to an annual saving of £56,000 in 2017-18 and £6,000 in 2018-19.

- Inpatient Detoxification services are provided by a number of contracted organisations on an approved provider basis outside of the district and provide detoxification in a residential setting. There is little evidence of continued abstinence following discharge, and detoxification can be delivered within the community under the new recovery service and therefore by 2018-19 this service will reduce resulting in an annual saving of £35,000.

- The Needle Exchange programme offers an open-access service to any drug injector because every person engaged in this activity is at risk of contracting a life-
threatening blood-borne virus, particularly HIV, Hepatitis B and Hepatitis C. The service is being reviewed to identify cost effectiveness and ensure geographical coverage of service. It is anticipated that a new delivery model and this redesign will lead to an annual saving of £25,000 in 2017-18 and £30,000 in 2018-19.

Equality impact on the Equality Duty protected characteristics & low income groups

Impact assessments have identified that this range of proposals could have impacts on a wide range of service users across the range of protected characteristics.

Mitigation

Any new contracts will continue to have the same equality requirements of the Provider under the Equality Act 2010 as the current tender. The new service specification being commissioned requires that the service is provided through various types of provision and that the service is integrated throughout providing continuity for service users. Services will be more community based with access points in multiple sites in non-substance misuse specific services making it easier for all sections of society to access them.

The Sexual Health service provides open access to Bradford residents to all forms of Contraception, Sexually Transmitted Infection testing and treatment, information and support, allowing easy access to services by giving them the choice of either an appointment or access to drop-in clinics across the district.

The budget for the service will be reduced through a combination of redesign and review of services, and other services ceasing.

‘Prism’ is a service in which a Health Development Worker works with young people, delivering information, advice, support and referral (where appropriate) through 1-1, ‘Drop In’ and Group Interventions. The proposal is that this service will cease from 31 March 2017 resulting in an annual budget reduction of £55,500.

Step2 is a service which supports the delivery of a Sex and Relationship Education (SRE) programme in schools. The SRE programme is delivered in 9 upper schools within the district and is co delivered by a teacher, Step2 or School Nurse in the class room and discusses sexual exploitation, sexuality, and abusive relationships, as well as a range of other topics giving young people information around local services and where they can access support. The proposal is that this service will cease from 31 March 2017 resulting in an annual budget reduction of £15,000.

Emergency Hormonal Contraception (EHC) is made available in Pharmacies, free-of-charge,
to those aged 25 and under. Pharmacists also provide condoms and chlamydia screening giving advice on contraception and sexual health and signposting to Sexual and Reproductive Health Service (SRHS) for further support. The proposal is that this service will cease from 31 March 2018 resulting in an annual budget reduction of £25,000.

**Equality impact on the Equality Duty protected characteristics & low income groups**

Some of the services are designed specifically for parts of the population who share a protected characteristic. Therefore services are provided disproportionately to those parts of the population and the impact will reflect this.

The financial implications of this reduction in budget will be applied across the whole of the contract and therefore will impact upon all potential users of the services.

**Mitigation**

The SRHS that is commissioned is part of a wider Sexual Health economy with GPs providing oral contraception and STI testing which is commissioned by NHSE from GP practices as part of their core service offer.

Bradford residents would still be able to access SHRS (oral contraceptives and STI screening) within their community through their GP practice and Long Acting Reversible Contraceptives (coils and implants) and STI testing and treatment, through the SHRS that would stay situated centrally within the city centre making it accessible to all.

The tobacco service provides and commissions services to reduce smoking prevalence across the district and prevent the uptake of smoking by young people. The budget for the service will be reduced through a combination of the redesign and review of services which will see some currently commissioned services ceasing and a reduction in the number of people accessing services.

Dental Practices across Bradford District are currently commissioned to provide a practice-based stop smoking service. As part of the redesign of stop smoking services, dental practices will not continue to be commissioned to provide this service and therefore will cease in April 2017 resulting in an annual budget reduction of £2,000.

Stop smoking medication is available on prescription to smokers, through the Bradford district stop smoking service. This will be limited to geographical areas identified as having higher smoking prevalence and priority groups e.g. pregnant smokers, patients with a long term condition etc. This redesign will lead to an annual saving of £44,000.
The Midwifery-based stop smoking service provides a specialist stop smoking midwife to provide and coordinate training, implement and monitor interventions to reduce smoking and promote smoke free homes throughout pregnancy. This service will cease in January 2019 resulting in a budget reduction in 2018/19 of £15,200.

Equality impact on the Equality Duty protected characteristics & low income groups

Equality assessment carried out indicated that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share protected characteristics

The services commissioned are for children, young people and their families with a focus on accident prevention, and support for vulnerable parents and children age 0-5 years. The proposal is to phase out the services detailed below over two years, with a view to some activities being mainstreamed into the wider transformation plan for children and young people and families in the District.

- **Homestart**
  Homestart is a national charity with independent schemes in local communities which recruit and train volunteers to help families with young children by visiting them in their homes. The proposed plan is to end the current grant agreement with Homestart in 2016/17. The service would therefore cease resulting in an annual saving of £155,000.

- **Injury Minimisation Programme (IMPs)**
  The Programme is aimed at all year 6 children in all Primary schools and aims to reduce injuries and empower young people to take personal responsibility for managing their own risk. It is proposed that the service will cease in 2016-17, giving the required 6 months notice from April 2017 (therefore terminating at the end of September 2017), resulting in an annual saving of £70,000, (£35,000 in each of the two years).

- **Worksafe**
  This Voluntary and Community Sector (VCS) service provides training, advice and information about a range of safety issues to selected primary schools and to children with special needs. It is proposed that this continues for one year and stops in year 2018/19. This service will cease resulting in an annual saving of £20,000.
Equality impact on the Equality Duty protected characteristics & low income groups

Impact assessments have identified that this range of proposals could have impacts on a wide range of service users across the range of protected characteristics particularly age, disability, race and low income families. There will be impact on key public health outcomes which are likely to widen inequalities in some of our vulnerable groups as these services are delivered across the areas that have already been identified as a strategic priority within the District’s Health Inequalities Action Plan.

Mitigation

Some activities may be mainstreamed into the wider transformation plan for children and young people and families in the District going forward but there will be some that will not be mitigated against.

In order to manage any negative affects we will use a phased approach so that we can identify any potential risks in the first year.

Some risk may be mitigated with funding from other areas within the District through Better Start and Big lottery in Keighley so the negative consequences are not as high as would be expected if the service was completely decommissioned.

</table>

The Health Improvement Team currently provides grants to 24 VCS organisations which deliver a range of interventions including activities such as ‘cook & eat’ programmes, physical activity sessions for inactive adults and children, food growing activities and breastfeeding support.

These grant agreements come to an end on 31 March 2017 and it is proposed that they will not be extended which will result in an annual saving of £1m.

Equality impact on the Equality Duty protected characteristics & low income groups

Services are currently commissioned from a variety of BME organisations and groups based in low income areas to ensure positive outcomes for all parts of the community. The race equality impact is judged to be high, because of the high BME take up of VCS services.

Mitigation

The Health Improvement Team will support providers/organisations and service users proactively with advice and sign-posting as opportunities are identified.

The Warm Homes Healthy People (WHHP) is a short-term, winter activity based programme which supports those most in need of Winter Warmth services in Bradford and Airedale area.

Services offered include food parcels and hampers; cook and eat sessions; big lunches; provision of practical needs such as coats; hats; duvets and emergency heating appliances; small fuel poverty remedies (radiator foils, draft excluders etc), energy efficiency assessments; fuel debt relief; top-ups for prepaid fuel meters and community activity such as snow clearance, befriending schemes etc.

The proposal is to reduce this service, resulting in an annual saving of £65,000.

(Note: This proposal is ‘exclusive’ of £30,000 currently received from City and District Clinical Commissioning Groups (CCG’s) via the local resilience fund).
Equality impact on the Equality Duty protected characteristics & low income groups

Currently the proposal offers support to a range of vulnerable householders, many of whom share particular protected characteristics. Removing the programme’s main funding reduces the breadth of service offered and may disadvantage some people.

Mitigation

The current budget includes £30,000 received from City and District’s CCG’s Resilience fund. This may continue to be available beyond the time when funding via Health and Well-being ends. Should the CCG contribution continue it would not be able to support a WHHP programme the size it is now; tighter more specific client targeting would be required.

In 2016/17 support to develop a new approach to funding was granted to the partners, this has allowed the creation of a crowd funding website which plans to raise £25k this year. It is planned to build on this in 2017/18 with the hope that core services such as fuel poverty and food poverty work streams can be maintained.

Additionally there are existing partners such as Ground Works/ Family Action and others who fundraise for services independently and join in the programme each winter. It is hoped this can be continued.

The funding is a budget adjustment, transferring funding to Bradford Clinical Commissioning Group’s (CCG’s); the funding is then paid to provider Bradford District Care Foundation Trust (BDCFT) as part of existing contracts held between CCGs and BDCFT. The funding was, prior to 2016-17, part of a contract between Public Health and BDCFT. Specific services are not described as part of this funding agreement and known only to CCGs. It is proposed that services are redesigned as part of an accountable care system/organisation development involving health, social care and other providers, resulting in an annual budget reduction of £499,000.

The Public Health staff team comprises of the Public Health management team, analysts and commissioning/business unit staff who are responsible for supporting and directing strategic needs assessment for the district and commissioning services directly to meet identified need in responsible areas. In addition, the department employs operational staff to deliver some public health services, specifically sexual health, stop smoking and health improvement (physical activity, anti-obesity).

It is proposed that the Public Health staff team is reduced in line with Public Health redirecting its investment profile towards reducing demand and maintaining health and well-being.

Swimming pools, sports centres, swimming development, sports development and outdoor adventure activities form the basis of this service. A number of changes are proposed. In the first instance the service will investigate through an options appraisal all methods of future operational service delivery and this will include the potential for a ‘not for profit’ trust model to be established as part of the potential savings required in 2018-19.

Equality impact on the Equality Duty protected characteristics & low income groups

Equality assessment carried out indicated that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share protected characteristics

The latest statistics from Projecting Older People Population Information (POPPI) and Projecting Adult Needs and Service Information (PANSI) projects a 2% yearly increase in the number of service users up to 2030.

The challenge is to change the culture in Adult Social Care and with the NHS to move from a dependency model to one that promotes independence and resilience (a strength based model, with a focus on what people can do, and positive risk-management so people can live their lives to the full).

The Sustainability and Transformation Plan includes development of an Accountable Care System. The aim of this will be to use our investment to improve the health and wellbeing of people in the Bradford District. We will do this by targeting our collective resources to maximise independence and resilience, regardless of age, disability or condition and protecting and safeguarding the most vulnerable in our communities.
The challenge in Adult Social Care is to deliver services to growing numbers of both young and older people, whilst at the same time discharging our statutory duties.

We will where possible support people to be safe and independent at home and so reduce the need for some people to go into residential/nursing Care. We will do this by working with our NHS and community and voluntary services partners to promote independence through strength based assessments, a greater focus on prevention/early intervention and using enabling technologies. This approach will be underpinned by an integrated workforce development plan which will focus on the Home First Model:

1. Reducing the number of people coming into care through an enhanced preventative focused (early intervention) approach, which will aim to minimise the need for long term support by addressing underlying needs at the earliest stage possible, and reduce the need for some people to go into hospital or a care facility.

2. Changing the culture across the care system: moving to a strength (asset) based model that will require an open dialogue with the people, their families and carers to draw on these resources to maximise independence; and ensuring that people get the right level and type of support i.e. not too little and not too much.

3. Speeding up integration with Health to ensure we can establish a whole systems approach across the Health and Social Care sector and secure efficiencies and economies e.g. Integration of complex care teams with partners within NHS and Voluntary and Community sector, so that service users receive the right care at the time in the right place, and so that support from Health and Social Care is seamless. Ensure all service users are reviewed on a regular basis in line with the guidance set out in the Care Act, so that the appropriate package of care is delivered subject to the individual’s needs.

4. Moving away from expensive traditional forms of support through targeted care and enhanced reviews of care needs. This could include options such as extra care or improved home care services and only using residential or nursing care when people really need it.

5. Redesigning our approach to enablement to reduce costs and maintain independence of people e.g. more investment in home care. We will do our utmost to support people to regain skills and confidence to stay independent including use of technology.

6. Reviewing the financial needs of people to ensure that they are provided with the appropriate level of funding to meet their care need. When we assess people we will ensure that they get the right support from either health or social care funders.

7. Continuing the implementation of personalisation including the use of ISF’s (Individual Servicer Fund). ISFs are a third party agreement that will ensure that people can have choice and control without the worries of looking after the money.

Our approach builds on our local experience and research undertaken by national bodies which has demonstrated that significant amounts can be saved through effective demand management across the support system. The key underlying principle will be to ensure we deliver services in the short term, while using this time to develop the provider market to take on service delivery in the medium and long term.

These proposals are designed to enable the costs of the services to be contained within the
proposed available resources, despite the predicted rise in demand of approximately 2% annually, and inflationary increases in costs affecting Adult Services. This proposal reflects our conclusion that we need to make changes to the way we deliver services in order to avoid annually £8m of costs that would otherwise be incurred. This level of saving is required even after the use of additional income from the Better Care Fund, and from the Social Care precept equivalent to 2% of Council Tax. This is a challenging, yet achievable goal.

**Equality impact on the Equality Duty protected characteristics & low income groups**

Older people and people with Mental Health & Learning Disabilities will predominantly be affected by this proposal but the focus will be on personalised services for people so the impact on protected characteristics will be mitigated at individual level.

As part of the Strategy to reduce residential and nursing places it is intended that more extra care schemes are developed, which will help to improve people’s lives and reduce expenditure across all groups.

As the proposal is developed, the detail of impacts will be further assessed to ensure any potential implications on protected characteristics are minimised.

**Mitigation**

Our approach will seek to focus on people’s strengths and enabling people to manage properly understood, proportionate and positive risks in living their lives.

We will undertake individual assessments and carry out extensive engagement with service users, carers and advocates to ensure seamless transitions for any service users affected. This will enable us to meet our duty under the Care Act 2014 and mitigate against any disproportionate negative impact on any person with a protective characteristic.

By offering other options for people in terms of housing and care support, people will have the opportunity to access appropriate services that meet their assessed needs and be in a position to maintain their independence and to continue to have a positive contribution and be inclusive in their local community. This will ensure where possible people with particular characteristics are not disproportionately affected. We will further review the potential impact on protected characteristics as part of the development of the delivery programme.

This activity area includes the work of the fourteen teams who work in front line Child Protection in the District, the specialist services management team, and the interpreting budget for children in the care system. The proposal is to undertake a review in year 1 to
align the Child Protection teams with a revised approach to delivering early help to children and families that includes a range of services to be delivered at a locality level. Currently there are fourteen team leaders in the child protection teams. The proposal is that the number of teams is reduced by four to ten, potentially resulting in a reduction in the number of team managers. This process will be started in year 1 but full savings will not be realised until year 2 due to the requirements for review and consultation.

In addition the proposal is to review the overall staffing & non staffing budgets and identify further saving in years 1 and 2 of 2% in each year.

Within the scope of this activity is early help for children and families commissioned from the VCS, Youth Offending Team, crime prevention and the family centres, families first and other early help services offered through children’s centres, and for disabled children and young people.

The targeted early help portfolio includes a range of statutory, early intervention and prevention services. These seek to help vulnerable families to help themselves, become more resilient and take action early in the life of a problem for children of all ages. Funding comes from a number of sources including the council, Youth Justice Board and Troubled Families Programme.

This proposal is to undertake a review of the management structure resulting in the reduction of 1 Team Manager, and a review of the external commissioning budget to achieve a reduction of 15% in year 2. In addition there will an overall review of the service to achieve a 1% budget reduction.

**Equality impact on the Equality Duty protected characteristics & low income groups**

This service works with a higher percentage of children and families from disadvantaged households and any reduction in service may result in a disproportionate affect on low income groups needing this support.

**Mitigation**

The review will ensure that resource is most effectively targeted at areas of need, with careful mapping of service needs and outcomes. This process will be done alongside the VCS to ensure that impact is mitigated where possible. Where possible, resources will be reduced in back office and management functions.

Within the scope of this activity is the Children’s Complex Health and Disabilities team staffing, placement support, inclusion intensive support, Children and Adolescent Mental Health Service (CAMHS), under 18 drugs and alcohol, short breaks, family intervention, trusted adult, shared care and contract carers.

The Children with Disabilities Service is made up of two elements.
- 3 Residential Units; Clockhouse, Wedgewood and Valley View
- 3 Statutory Social Work Teams.

This proposal is to build on the review already underway with CAMHS to ensure a service that meets the needs of children moving forward and is delivered within a reduced budget saving £250,000. In addition the proposal is to review the overall staffing & non staffing budget and save £34,000 in Year 2.

Equality impact on the Equality Duty protected characteristics & low income groups

This service works with disabled children who have are a group with a protected characteristic. Reduction in this service impacts on this specific group of young people.
Mitigation

A review of the CAMHS service with a financial appraisal will ensure that through achieving better value for money, direct service reductions are minimised. The review will ensure that resource is most effectively targeted at areas of need, with careful mapping of service needs and outcomes. Where possible resources will be reduced in back office and management functions. This change impacts on disabled children, but reductions are in place across the full service and have not targeted this group disproportionately.

NB - the proposal below relates to reductions in grant funding and not Council Base Budgets.

The services within scope of this budget relate to services in Education, Employment and Skills including school improvement, Behaviour Support, Diversity and Cohesion, Educational Psychologists, School Governance, SEN core services for statutory duties and Trade Union time.

Funding is provided through Dedicated Schools Grant (DSG), Education Support Grant (ESG) and High Needs Funding.

A significant proportion of the funding for these services is provided through the Dedicated School Grant (DSG) including high proportions of funding for the School Improvement team (including Governors and the data team) £1.3m, Behaviour and Attendance £426,400, Fischer Family Trust school licenses £33,500, Trade Union Facility time £415,800, EEMA £94,000.

From 2017 part of the DSG element will be removed from the Council and passed directly to schools with what remains to be removed in March 2018.

The total amount of DSG funding used to pay for the current services is £2.4m. This is therefore the sum which is at risk for the current services provided. Future decisions by the Bradford Schools Forum, as well as the Government’s prescriptions about how funding can and will be used, will affect the scale of this risk.

While the resources will stay in the wider education system – and therefore be available to support the Council’s wider ambitions for children - the shift from Council to schools will impact on the services the Council provides and the staff who provide them. High Needs Funding may be affected by proposed changes to the National Funding Formula for schools.

Plans are being formulated whereby a more targeted service will be provided for areas such as school improvement. However the majority of available funding will be utilised to tackle the education safeguarding agenda.

Equality impact on the Equality Duty protected characteristics & low income groups

The equality assessment carried out indicates that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share
protected characteristics.

Essential statutory services will be maintained by the LA. Part of the proposal is the recognition of the significant expertise that exists in schools. This expertise will increasingly be available to those schools through school-to-school support. In many cases the available capacity, expertise and level of resource available in schools can lead to heightened services for pupils and training for staff.

Mitigation

Resources will transfer into the schools system and the Council will work together with school leaders to ensure that schools are able to access the support that they need to drive improvement.

See EIA 4C1 & 4C2

</tbody>
</table>

NB - the proposal below relates to reductions in grant funding and not Council Base Budgets.

The services within scope of this budget reduction relate to early years services in Education, Employment and Skills. Outcomes for children have been improving for early years in recent years with the highest results so far being achieved in 2016. Funding is provided through Dedicated Schools Grant (DSG), Education Support Grant (ESG) and High Needs Funding.

A significant proportion of the funding for these services is provided through the DSG including a large proportion of funding for the Play Team (£220,000), Family Information Service (£234,000), Pre School Language Development (£44,600), Early Years team (£155,400).

The DSG element of early years is removed from the Council in part in March 2017 and the remaining in March 2018. This without any other funding cuts amounts to a budget decrease of £654,000 by March 2018.

The Council will have to work with others to review all its early years’ provision. Plans are being formulated to develop a coherent and targeted suite of early years’ services including early help, family centres and early years’ services including Children’s Centres.

Equality impact on the Equality Duty protected characteristics & low income groups

The equality assessment carried out indicates that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share protected characteristics. However, as the plans are being formulated to develop a coherent
and targeted suite of early years and early help services, the equality impacts will be reviewed and the impact assessment updated.

Mitigation

The Council will work together with other public sector leaders to ensure that the District retains a wide ranging early years offer, with the Council’s own resources primarily targeted at those in greatest need.

See EIA 4C1 & 4C2

NB - This proposal is split between the outcomes for Better Health, Better Lives and Great Start, Good Schools for accounting purposes but merged to describe the proposal

The services within the Scope of this Budget Reduction proposal relate to Public Health Services commissioned for children aged 0-19 and their families, and cover:

- **Health Visiting (HV)**: a universal service for all children age 0-5 years, including the targeted Family Nurse Partnership (FNP) service for young mothers (under 20 years of age) in more deprived areas;
- **School Nursing (SN)**: a universal service for 5-19 year olds;
- **Oral Health (OH)**: a programme to improve children’s oral health across the district;

The proposal is to reduce the overall Public Health budget for 0-19 years from £14.4m to £12.2m by 2018-19. The reduction will be phased over two years and identified through service based efficiency savings.

**Health Visiting and School Nursing Services:**
The service will be subject to 5% savings during 2017-18 and 10% during 2018-19 which will be realised by a review of current service delivery and staffing structures, primarily identifying savings through management and back office savings, and vacancy control.

**Oral Health:**
The Programme will be subject to a £50,000 (7%) reduction in 2017-18 and £100,000 (17%) in 2018-19 which the provider will be required to find through management and back office savings, stopping all training (including midwifery) and campaigns, and the Healthy Teeth Award and Health Promotion Practice Award.

**Equality impact on the Equality Duty protected characteristics & low income groups**

Any reduction in Public Health investment carries with it a risk that the children and young people will experience deterioration in health and wellbeing within the district.

The reduction in service will impact on quality and access as all training and resources will be withdrawn and providers will not access up to date training which could impact on partnership working both externally and internally, which in return will result in lack of awareness amongst their clients groups which are mainly the protected groups such as mothers/parents, babies and early year’s children services.

**Mitigation**

Using a phased approach will help to plan and prepare any risks which can then be managed through the transformation process for a more integrated model for children and young people and the service will continue to provide statutory services.

A review of tourism and visitor economy services is currently taking place and will reduce the number and/or size of Visitor Information Centres across the district. The service will move to a more digital basis promoting the district to target audiences, with the potential for VIC information points as a co-located provision in buildings which are available and financially sustainable.

Equality impact on the Equality Duty protected characteristics & low income groups

The potential closure of VICS could have a disproportionate impact on older customers unable to access information electronically.

Mitigation

Alternative options are being explored including seasonal visitor information centres in destinations such as Saltaire, Haworth and Ilkley with support from local groups.

There will be a review of the programme and an investment approach in future years in order to develop a more sustainable and balanced events programme between community, regional and national events, increased income streams and greater emphasis on partnership events across the key providers in the City, benefiting the wider economy that supports the event and visitor economy.

This budget also supports grants to voluntary arts and culture bodies and the City of Film work. Direct funding to this initiative will be removed through a more commercial approach to the work and there will be a review of the funding to external arts and cultural organisations. We will seek to ensure that we minimise the impact of the District’s ability to leverage external arts and culture funding.
Equality impact on the Equality Duty protected characteristics & low income groups

Equality assessment carried out indicated that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share protected characteristics

The Ministry of Food (MOF) teaches people how to cook and eat and to improve their long-term health and wellbeing and is a practical hands-on community based cooking programme that teaches people of all ages how to cook from scratch.

The service will no longer be able to offer cookery groups for parents with children, students and young adults, young families, disabled people, VCS organisations, community groups, and the general public. In addition, the service will no longer be able to offer an outreach service across the district which includes cookery demonstrations, presentations and general information around health and well-being by teaching cooking skills.

Equality impact on the Equality Duty protected characteristics & low income groups

Whilst the Ministry of Food is a discretionary service provided by the Council, its closure will by definition have a disproportionate effect upon those people who share a protected characteristic. Those attracted to the services provided by the Ministry of Food tend to be those from disadvantaged communities where behaviour change is required to reduce obesity through education and teaching cooking skills.

Mitigation

The Health Improvement Team will support providers/organisations proactively with advice and sign-posting as opportunities are identified.

<td>15%</td>
</tr>
</tbody>
</table>

The proposed savings will be made by reducing the Connexions Contract by £150,000 per annum in 2017-18 and 2018-19.

This and other savings proposals set out below will see an overall reduction of £2.3 million on 2016-17 budget (including reserve funding) in Education Employment and Skills. Furthermore, there will be a £1.2million reduction in projected income for Skills for Work during the period by 2018 as the Work and Work Choice Programme ends from April 2017 that will have to be factored into the savings required.

Key elements of the proposals are:
- To restructure Skills for Work and reduce staff in line with a reduction in income with the finishing of the government’s Work and Work Choice programmes from April 2017.
- To reduce the Connexions Contract by £150,000 per annum in 2017-18 and 2018-19.
- At the end of the current Connexion Contract in August 2019 re-design the activity and bring the service in-house at a reduced cost.
- Explore the feasibility of establishing a regional young person tracking data centre with other West Yorkshire local authorities to make savings.
- To make Skills House funded from base budget from April 2020
- Cease funding the Employment Opportunity Fund (EOF) from April 2017.

Equality impact on the Equality Duty protected characteristics & low income groups

This proposal in regard to the Connexions Service contract will have a negative impact on people who share a protected characteristic. This service directly supports young people who are NEET, the cohort being comprised of young people with complex and multiple needs related to the protected characteristics and long-term low-income unemployed adults.

Mitigation

To mitigate the potential disproportionate impact of the Connexions Service proposal, there will be a re-design of the Connexions type activity to provide a minimum statutory service with a greater reliance on the Bradford Pathways approach that will be underpinned with more effective information, advice and guidance framework. Greater linkages and working with other front line staff working with young people will also be explored. It is not feasible to fully mitigate the impact of the proposals given proposed funding levels.

<tbody>
<tr>
<td>£750,000</td>
<td>£750,000</td>
<td>£1,500,000</td>
<td>6%</td>
<td></td>
</tr>
</tbody>
</table>

This proposal relates to the £24m contribution from Bradford paid to West Yorkshire Metro for transport operations. The contribution is raised as a levy, based on population size, across all 5 West Yorkshire Councils. Bradford’s contribution includes a £1.4m Transport Fund for investment in transport infrastructure projects.

West Yorkshire Local Authority colleagues have requested that the WYCA consider a minimum 3% reduction (£750,000 for Bradford) in the 2016/17 levy and then a further percentage reduction per year to achieve a £750,000 saving each year.

Equality impact on the Equality Duty protected characteristics & low income groups

This proposal could have an adversely disproportionate impact on both the young (under 18’s) and elderly sectors of the community as the funding which is being reduced is specifically used to fund schemes/programmes which are delivered for these groups.

Mitigation

The negative impacts would need to be considered within the wider West Yorkshire context.
in consultation with WYCA with whom the ultimate decisions on which aspects of their budgets to reduce would rest.

Some aspects of expenditure of the Transport Levy are protected by national regulation and hence are likely to remain largely unaffected by any reductions as a consequence of this proposal. It is therefore anticipated that those elements of expenditure which are discretionary are likely to bear the majority of any agreed levy reduction.

This proposal is based around the current West Yorkshire Combined Authority programme to establish a West Yorkshire UTMC (Urban Traffic Management & Control) service combining all traffic signal staff from all West Yorkshire districts with a presence from bus operators, emergency services & WYCA in a central location.

It should be noted that as this project is not within the direct control of the Council. Delays in implementation may adversely impact the delivery of savings within the proposed timeframe.
Ref - 4R5 Regeneration Services - Increase charges within Planning, Transportation and Highways Services

Total 2016-17 Net Budget for Service Area after pre-agreed savings & removal of transitional funding £0.6m

<table>
<thead>
<tr>
<th></th>
<th>2017-18</th>
<th>2018-19</th>
<th>Total</th>
<th>% of current base</th>
</tr>
</thead>
<tbody>
<tr>
<td>£30,000</td>
<td>£30,000</td>
<td>£60,000</td>
<td>11%</td>
<td></td>
</tr>
</tbody>
</table>

The scope of this proposal is to increase discretionary charges within the Planning, Transportation & Highways Services together with introducing new charges for aspects of the services functions which bring it in line with neighbouring authorities. Specific proposals within Transportation & Highways include:

- Increasing charges associated with Section 38 and Section 278 Agreements including raising the minimum amount of charge payable including to £2,000 per agreement with a standard charge of 9% of the bond amount for technical inspection and validation.
- Introducing a new annual charge for café licence applications, inspections and approvals of £500 per permit.
- Introducing a minimum charge for events on the highway to cover staff costs associated with their planning and co-ordination except where such events are street parties.
- Introducing a charge to permit the temporary installation of developer signs on street lighting columns inclusive of their manufacture and removal at the end of a prescribed period.

Proposals within Planning include:

- Increasing pre-application advice service charges above the standard rate of inflation.
- Introducing a charge for dealing with high hedge complaints.
- Introduction of a charge for the street naming and numbering services with appropriate exception for street names associated with injured/killed military service personnel.

Equality impact on the Equality Duty protected characteristics & low income groups

The introduction of fees and charges in relation to dealing with high hedge complaints may lead to disproportionate impacts on the low paid sectors of the community and senior citizens. Currently, receipt and investigation of complaints in relation to high hedges are processed by the Council on a free of charge basis.
Introduction of a minimum charge for co-ordination and marshalling of events on the highway could adversely affect those community interest groups/areas of protected characteristics who wish to arrange an event on the highway. The impact of this proposal may lead to a number of events no longer taking place along traditional routes given the costs associated with the administration and approval of traffic management.

**Mitigation**

Discounts for various types of organisations in relation to charges for events on the highway could be introduced to help minimise the impact of this aspect of the proposal. It should be noted that this proposal will not affect the holding of a street party which will remain free of charge as per national guidance.

The mechanism for charging for dealing with high hedge complaints may similarly introduce a discount for members of the community over a certain age making a complaint.

See EIA 4R5

---

**Ref - 4R6**  
Regeneration Services - Options related to discretionary budgets for highway maintenance works including minor drainage improvements, pavement repairs and footpath and snicket maintenance.

**Total 2016-17 Net Budget for Service Area after pre-agreed savings & removal of transitional funding £0.7m**

<table>
<thead>
<tr>
<th>Year</th>
<th>2017-18</th>
<th>2018-19</th>
<th>Total</th>
<th>% of current base</th>
</tr>
</thead>
<tbody>
<tr>
<td>£128,000</td>
<td>(£6,400)</td>
<td>£121,600</td>
<td></td>
<td>18%</td>
</tr>
</tbody>
</table>

The above savings profile assumes adoption of the level of service defined below whereby a direct budget reduction of £128,000 would be implemented in the 2017-18 financial year.

The Council currently allocates an annual budget of £50,000 per parliamentary constituency to allow minor scale maintenance works such as drainage repairs and improvements, pavement and pedestrian area maintenance, footpath maintenance and urban snicket maintenance.

The proposal would see a reduction of the current service level provision meaning each parliamentary constituency would receive circa £25,000 for minor maintenance repairs. Under this proposal works would continue to be prioritised on drainage maintenance, unclassified road maintenance, issues with a “life and death” consequence with very minimal levels of funding for footpath work per constituency and no funding to undertake snicket maintenance.

** Equality impact on the Equality Duty protected characteristics & low income groups**

Whilst the cost of the works delivered through the local area maintenance budgets may be relatively small, the impact of non-action could have a disproportionate impact on the lives of the districts citizens. Some footpaths and snickets are currently impassable due to lack of maintenance which is a consequence of the current reduced budget allocation.
Mitigation

As the scope of the impact arising from this proposal could be wide ranging and dependent
upon the nature of any specific maintenance requirements, it is not possible to propose
measures to fully mitigate or eliminate the disproportionate impacts.

However, the nature of the prioritisation framework (which is still to be developed), which
would be used to assess the priority for action of any requests, could incorporate appropriate
consideration of the characteristic of the person needing action (e.g. include age and/or
disability criteria).

See EIA 4R6

Ref - 4R7  Regeneration Services - Reduction in Highways Services operational
budgets associated with operational accommodation, transport gateway and subway
maintenance.

Total 2016-17 Net Budget for Service Area after pre-agreed savings & removal of
transitional funding  £0.2m

<td>£64,000</td>
<td>£31,600</td>
<td>£95,600</td>
<td>43%</td>
<td></td>
</tr>
</tbody>
</table>

Transport Gateway and Subway Maintenance
This proposal would reduce maintenance activities on gateway corridors to Bradford city
centre together with maintenance of current subways and underpasses in the city centre.
The Council currently allocates an annual budget of £127,000 to fund minor scale
maintenance works.

HDU Depot Reduction
This proposal is to reduce the operational bases used by both the Highways Delivery Unit
(DLO), Traffic & Road Safety (North) and Highway Maintenance (North) teams through
relocation of existing staff, plant and materials from Stockbridge depot to other operational
bases to realise budget savings equivalent to the annual maintenance and running costs of
the Stockbridge facility charged to the service.

Equality impact on the Equality Duty protected characteristics & low income groups

Failure to undertake any maintenance of gateways and subways will very rapidly lead to
these assets deteriorating and potentially becoming impassable.

Winter maintenance operations would be significantly impacted by the reduction in DLO
operational bases meaning longer times being necessary to grit the routes in the district,
potentially meaning that areas in the north of the district may be untreated in periods of
inclement weather.

This could therefore impact on some of the protected characteristics.

Mitigation

Any loss of a subway/underpass facility could be offset through the introduction of a
Research has shown that these types of crossing are more attractive to pedestrian users than subways as they are generally perceived as reducing the fear of attack/crime for pedestrian users. However, such facilities on major corridors are problematic as they need to cross six lanes of traffic and therefore their design can lead to increased delays for general traffic and increased frustration for drivers.

The impact of the closure of the depot at Stocksbridge and the consequent impact on winter maintenance operations will need to be carefully considered within the context of winter gritting routes and treatment programmes. Consideration of more pro-active treatment regimes for areas in the north of the district will need to be developed in order to ensure that problems associated with reactive maintenance are mitigated.

See EIA 4R7

</tr>
</tbody>
</table>

The Council has a statutory duty under the Traffic Management Act 2004 to coordinate road works to ensure traffic moves efficiently around its network. In recognition of this duty the Council sought powers from the Secretary of State to introduce a Permit Scheme on key transport corridors in the District. This scheme provides income both from the applications for permits to carry out works on the highway and from the statutory powers to fine utility companies that breach the scheme.

The income from permit applications is used to cover the staff costs of operating the scheme. The Council must review its fee income every year to ensure that surpluses are not accruing and similarly that costs are not exceeding income. Where either of these conditions occur it must adjust its fee charges every third year to reflect operational realities (either increasing or decreasing charges accordingly).

**Equality impact on the Equality Duty protected characteristics & low income groups**

N/A

**Mitigation**

N/A
Ref - 4R9  Regeneration Services - Reduce Area Committee support by Highways and stop processing/charge for all requests for service delivery for non-casualty led projects.

Total 2016-17 Net Budget for Service Area after pre-agreed savings & removal of transitional funding £0.3m

<table>
<thead>
<tr>

<td>£124,000</td>
<td>40%</td>
</tr>
</tbody>
</table>

Introduce an alternative Governance structure for consideration of all highway related matters rather than the current Area Committee structure thereby reducing the officer numbers required to effectively service five committees. In addition, this proposal recommends that elements of non-casualty led works and requests for service delivery are either stopped or charged for at cost rates.

**Equality impact on the Equality Duty protected characteristics & low income groups**

Any replacement decision making body would need to appropriately consider the views and opinions of the protected characteristics and demonstrate appropriate consideration/due regard to the Equality Act duties. The exact form of this decision making body is yet to be determined and hence the impact of this proposal cannot fully be explored at this time.

The introduction of an administrative charge to cover the additional processing necessary for checking the validity of a disabled persons parking permit (DPPP) would produce a disproportionate negative impact on this protected characteristic.

Provision of some of the other proposed highway services (e.g. vehicular dropped crossings and keep clear markings) may similarly have a disproportionate impact on those sectors of the community where the ability to pay for services will be an issue (e.g. elderly residents or those residents on low income).

**Mitigation**

Decisions taken through the new body would need to ensure that appropriate consideration is given to the Equalities Act on all matters progressed. Therefore any decision recording process must ensure that an appropriate record of the regard given to Equalities matters on the decision matter is retained.

**Ref - 4R11  Regeneration Services - Introduction of limited lighting hours / switch off of street lighting on non-principal road network**

**Total 2016-17 Net Budget for Service Area after pre-agreed savings & removal of transitional funding £1.4m**

<table>
<thead>
<tr>
<th>Year</th>
<th>Amount</th>
<th>Total</th>
<th>% of current base</th>
</tr>
</thead>
<tbody>
<tr>
<td>2017-18</td>
<td>£50,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2018-19</td>
<td>£60,000</td>
<td>£110,000</td>
<td>8%</td>
</tr>
</tbody>
</table>

This proposal is to arrange for the introduction of limited lighting hours or switch off of street lighting on non-principal road network to save energy costs. Typical non-lit hours could be from 12am-5am (or longer on lesser populated/used areas of the non-principal network). Proposals for groups of streets to be included in any switch off zone would need to be developed in accordance with appropriate standards including assessment of road traffic collision data, criminal activity and infrastructure condition/type etc.

A small capital investment in appropriate lighting management equipment/software would initially be required for any sections of non-principal network selected for limited lighting hours but this initial cost would be rapidly recovered as energy costs are fully saved during non-lit hours.

**Equality impact on the Equality Duty protected characteristics & low income groups**

Introduction of this proposal in additional areas of the district will have a disproportionately negative impact on some protected characteristics.

Fear of crime amongst the elderly will increase where back streets and residential roads are unlit during the early hours of the morning and it is from this characteristic group that the greatest impact is anticipated.

Similarly fear of crime on unlit streets could adversely impact the protected characteristic groups of disability, race, religion/belief and sex who may all experience increased levels of concern about the proposal.

**Mitigation**

The Council has developed a set of criteria which are used to select streets where limited
lighting hours are introduced. These criteria assess road safety statistics, criminal activity records, infrastructure condition and involve consultation with the local community on any proposals being prepared.

Any streets which are considered appropriate to be included in the programme of limited lighting operation will be fully appraised using this model before a decision is taken on whether or not to implement the limited lighting hours infrastructure is taken. Those streets with high criminal activity and/or poor road safety records will not be included in the project beyond their initial assessment.

To avoid any undue distress to local residents only those streets which “pass” the desktop assessment will be consulted upon with the local community.

This proposal is to increase the trading surplus of School Catering & Cleaning by up to 10% through increased sales and price reviews while being mindful of the need to maintain value for money and retain the existing client base. Additionally, work is on-going to assess the option of these services being provided via various alternative delivery models.

Proposal is as below:
• £70,000 to be removed from the £320,000 City Park Sinking Fund, further reducing the maintenance fund for major works to £250,000.

• Reduce match funding of £72,500 for European Strategic Investment Fund programmes and projects.

• Remove support for the Bfunded community funding information website saving £8,000. Financial and officer support will cease in 2018 and a transfer to Third Sector partners is under negotiation.

Remaining work areas will be refocused to meet new priorities around Inclusive Growth and increasing our business rates income.

**Equality impact on the Equality Duty protected characteristics & low income groups**

Equality assessment carried out indicated that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share protected characteristics

This budget saving proposal is phased over two financial years commencing in 2018-19 to allow for discussions with schools involved in supporting the programme. The first change in 2017-18 would be to no longer accept new schools onto the programme with existing schools provision being phased out over the following years of this budget proposal.

**Equality impact on the Equality Duty protected characteristics & low income groups**

The nature of the Active School Travel programme is such that its cessation would effectively adversely affect the young children and adolescents which the programme targets through removal of the opportunities afforded under the programme to embed health lifestyle choices.

Similarly, as children with a sedentary lifestyle are predominantly found in areas of deprivation and low incomes, the cessation of this programme would likewise have an
impact on this protected characteristic.

**Mitigation**

Working with schools it may be possible to introduce aspects of the programme into the school curriculum, however given the demands on pupil contact time created by the national curriculum this may not be a significant mitigation proposition.

See EIA 4R20

The Road Safety Team operates on a district-wide basis. Staff and financial resources are allocated to education, training and publicity programmes based on priorities identified for greatest impact on casualty reduction. This reduction would result in a net reduction of staff resources available for this type of work.

This proposal would reduce the funding for the team, effectively reducing the exposure of road safety training and support to local children of both pre- and school age.

**Equality impact on the Equality Duty protected characteristics & low income groups**

This proposal will adversely affect the younger sections of society, or those from wards with a particular road safety problem (which tend to be predominantly low income inner city wards) who will not be able to access the same level of training and awareness activities as are currently provided by the Road Safety Team.

**Mitigation**

Nominal charges for provision of training programmes could be introduced, however these have historically been seen as barriers to ensuring take up of the training provided and therefore may have a counter effect to that anticipated.

Programmes of training interventions may need to be targeted to Key Wards in each year due to reduced resources. This would ensure that those wards with an identified road safety issue receive some training but may mean that some areas of the district similarly are not offered any training in future.

Alternative funding sources for the provision of this service could be explored within West Yorkshire to offset the reduction in funding.

To increase fee income for the Housing Operations service from agency fees by £44,000

The increase in fee income is achievable due to the current levels of demand and delivery of Disabled Facilities Grants (DFGs). The Housing service which administers DFG’s offers an agency service to procure and manage works on the clients’ behalf. In 2015-16 87% of clients chose to use the agency service and the number of referrals for DFG continues to increase year on year. In 2015-16 Housing received 603 new referrals for DFG compared to 357 in 2013-14 and 489 in 2014-15.

Parks, Recreation Grounds and Woodlands are to be offered as community asset transfer initiatives.

Tree work & Wood Management services will rationalise the management structure & reduce work to trees & woodlands.

In relation to sports pitches & bowling greens the Council will withdraw from the direct management and maintenance of sports pitches and bowling greens and explore the potential of increasing charges.

The Council will use the consultation period to discuss with the groups affected, the options available.

Bereavement Service - Raise prices 3% above inflation in financial year 2018-19.

Equality impact on the Equality Duty protected characteristics & low income groups

With regard to bereavement service proposals, any increase in charges, particularly at a rate above inflation, will by definition have a disproportionate effect upon those on low incomes for a service that cannot be viewed as discretionary.

Given that cremation charges are currently lower than burial charges, particularly should a new grave be required, any percentage price rise will generate a higher cash increase in the cost of burials than that of cremations. This could represent a disproportionate effect for those religious and faith communities that favour burial.

The implementation of a flat rate cash increase to both cremations and burials would however have increased the cremation charge to a level disproportionate to that of the burial charge in terms of comparator values of neighbouring Councils.

Mitigation

The most deprived/low income communities receive support for the cost of funerals from the Council through Adult Services.

The proposed above inflation increase in charges for funerals will result in local service users continuing to pay less than the average within West Yorkshire for all services.
It is intended to introduce a reduced rate for the walling of graves to coffin height which will mitigate the effect of the increases for those faith groups that adopt such a requirement.

Budget proposals have already been approved for the introduction of Alternate Weekly Collection (AWC) of residual waste, which will also see the introduction of fully co-mingled recycling via a Mechanical Recycling Facility which has been installed at Bowling Back Lane Household Waste and Recycling Centre. This will enable residents to re-cycle all types of plastics and therefore further reduce waste into the residual bin which will support residents with this change to AWC and encourage greater recycling. The year 2 savings (2018-19) will include the remaining full year effect of the year 1 planned reduction in rounds and a further reduction of 3 rounds with associated restructuring of Waste Services.

The Council is currently part way through a procurement process to award a contract for the disposal of its residual waste following the approval of the "Municipal Waste Minimisation & Management Strategy" by Executive in January 2015. The procurement of new waste treatment arrangements are due to be finalised by October 2017.

Equality impact on the Equality Duty protected characteristics & low income groups

The proposal is likely to have no or a low impact on everyone so it is considered that there is no disproportionate impact on any group who share protected characteristics. It is however recognised that a move to alternate weekly collection could result in the residual waste bin being heavier to move around.

Mitigation

It is recognised that the elderly and disabled could be impacted upon by a heavier bin where there are mobility or accessibility issues. The Council already provides assisted bin lifts for residents in such circumstances. If this service is required, residents can call the Council Contact Centre and a home visit will be arranged to see how the Council can help.

The Council operates a Trade Waste Collection Service to local businesses. It currently has approximately 3000 customers collecting 19,500 tonnes of residual waste and 800 tonnes of recycling. Process improvements have been identified which will release cashable savings from a revision of the existing charging policy and a move to cashless payment systems. In addition the service actively seeks out new business to generate additional revenue. Our customers are predominantly small to medium size businesses which in the future could be supported by the domestic waste collection service. This would then reduce trade waste service costs and make the service more competitive.

</tbody>
</table>

A continuation of the Customer Services Strategy seeking to redirect face to face contact towards self service and telephone services will see a continuing decline in contact resulting in staffing efficiencies.

Automated services will increase with fewer options for people to speak to a customer services advisor. More people will be expected to ‘self serve’ using on line services. Automation will be used to take requests for services where appropriate.

Equality impact on the Equality Duty protected characteristics & low income groups

The Council recognises that any move toward increasing dependency on digital/online access to Services or information may potentially have a detrimental impact on residents who do not have English as a first language or who don’t/can’t access IT. Making services available electronically could impact on those unable to access due to ability or lack of available technology. Those with a preference or requirement to deal with a person may feel anxious and vulnerable.
The majority of current face-to-face customer service and an increasing proportion of telephony work is with low wage/low income groups, including people with disabilities, and older people although there has been a significant increase in enquiries from customers from Eastern Europe who have language barriers.

Customer service teams carry out some home visits to customers who are unable to access Council services in other ways.

However, in the context of the number of enquiries handled by the Council each year, the relative numbers of people adversely impacted by the proposed change is small.

**Mitigation**

To mitigate the potentially disproportionate impact the Council remains committed to the Five Principles of Producing Better Information for Disabled People, and will also continue to make sure the Council website is accessible.

Greater self service access will provide the majority of citizens with a more efficient service; thereby freeing up the limited resources to focus on those who need the additional support. By minimising avoidable face-to-face and telephone contact with the council, officer time can be better directed to those customers who require it.

</table>

There are currently 25 Ward based clean teams and 17 mechanical sweepers. This proposal would see a reduction in the number of ward based clean teams and mechanical sweepers (precise number to be determined during consultation period) and the removal of funding for all public toilets (except City Park).

The service would continue to employ any new starters working to a standard 30 hour working week, mitigating the impact through increased use of technology.

Potential income from a City and Town Centre environmental enforcement contract may generate Fixed Penalty Notice income to offset the loss of the one street cleansing team.

**Equality impact on the Equality Duty protected characteristics & low income groups**

The proposal has the potential to have a low impact on predominantly inner city highly densely populated areas. The people who live in these areas are in the main white people on low incomes and communities from BME backgrounds.

In terms of closure of the toilets there is likely to be a disproportionate impact on older people, pregnant women, parents requiring access to baby changing facilities, young
children, transgender community, disabled people, particularly those with complex needs, and people who, because of their physical condition, may need to visit the toilet more regularly.

**Mitigation**

Increased waste awareness and anti litter/education campaigns in affected areas and the new robust enforcement model for targeting those people that drop litter, will mitigate the impact the street cleansing proposals.

In the case of public toilets work will take place to ascertain whether Parish/Town Councils, community or other voluntary groups could take over the running of those blocks proposed for closure. Consideration will also be given to whether local businesses, cafes, restaurants etc. would allow people to use their facilities.

</table>

The Council will stop providing a Pest Control Service. The provision of a pest control treatment service is not a statutory service and it is currently running at a loss. Due to the availability within the private sector for a similar product at a similar cost it is proposed to stop delivery of this service.

The Council’s prices for pest control treatments are similar to the private sector. Therefore the financial impact on residents would be minimal.

**Equality impact on the Equality Duty protected characteristics & low income groups**

This proposal could have an adverse impact on people on low incomes as it removes the facility to pay for treatments in instalments although the equality assessment carried out indicated that this proposal is likely to have no or a low impact on everyone, and so there is no disproportionate impact on any group who share protected characteristics

**Mitigation**

The most common request for treatment is to deal with rats and mice and there is at least one company in Bradford which is able to provide the service cheaper than the Council.

The proposal is comprised of two main components:

- Re-sizing of IT Services to reflect the broader organisational changes affecting the Council. The assumption is that there will be a significant reduction in the number of Council supported desktop/laptop devices over time. This will enable IT Services to reduce costs associated with device support, licenses and infrastructure.

- Fit for purpose IT application architecture - This component will involve switching technology solutions where better value can be achieved and rationalising the number of existing IT applications to simplify the technology in use.

In February 2016 Council agreed a saving of £541,000 in 2017-18 from a “review and restructure of Chief Executive's Office, Public Affairs and Communications (PAC) and Policy Programmes and Change (PPC).” Further cuts of £479,000 are proposed for 2018-19.

This proposal suggests a radical restructure of the Office of Chief Executive to improve the coherence and integration of core corporate functions, so they can support and improve the Council’s leadership of the District. The authority will need to continue to change in order to have the agility, skills and capacity to influence, negotiate, communicate and collaborate with communities and partners to deliver the district’s priorities.

The proposal foresees changes in the management of:

- the Council’s operational and investment estate;
- Delivery of the capital receipts programme
- Community Asset Transfers and Assets of Community Value
- One Public Estate Programme

This aims to make the best use of the Council's and public sector partners’ estate working with the Voluntary and Community Sector.

We will also seek investment in non-operational property to generate surplus income. The proposal targets £260,000 gross cost reductions and £250,000 additional surplus income.
Overall it is proposed to increase surplus income to £1 million p.a. by 2020.

Planned reductions in Facilities Management will take the current net budget down from £3.9m to £3.8m. A further reduction in future years is likely but would be dependent on the Council's estate shrinking further.

Sharper procurement and control of utilities to all Council buildings, managing carbon taxes and statutory annual carbon emissions reporting, and the current energy efficiency capital programme will all deliver savings.

The energy industry is forecasting 35% energy price inflation by 2020, due to increased non-commodity price increases, grid/network costs etc. It is anticipated that there will be a commensurate reduction in the size of the estate during this period, allowing offsetting savings.

This replacement proposal is to reduce spending on agency social workers and agency staff in Residential Homes. There will always be instances where staff turnover and unplanned change means that to be safe, the Service will need to employ agency staff at short notice. This project will deliver an overall reduction in the spending on agency staff of £1million. This will be achieved through a number of strands which will start with a review of caseload numbers in social work, which is already underway.

This project will achieve savings at the first point of contact for social care through a review of the current arrangements. A review will identify clearer pathways from the first contact through to assessment and staffing efficiencies will be achieved following this.

The project will review all access points to Children’s Services and look to integrate them into one single point of contact.

The proposal is to review the administrative structure within Children's Specialist Services to identify potential for some rationalisation of the supervision and management structure.

NB - The pre-agreed savings for Children’s services that are no longer achievable are not fully matched by compensatory savings. As a result additional funding has been included in the proposed future base budget.

Environment & Sport

This proposal sets out the adjustments to this year’s budget decision in respect of income generation from amendments to on- and off-street parking orders, taking into account schemes which have not been implemented or where income estimates will not be achieved due to changes in shopping habits in the city centre since the introduction of The Broadway.

This replacement proposal is to:

- Remove Christmas parking concessions from next year
- Little Germany
  - amend the tariffs in the Little Germany area of the city centre in line with charges in the rest of the city centre. Remove the half hour charge and increase to 70p per hour in accordance with the rest of the city centre.
  - Extend the charging hours to bring them in line with the opening hours of The Broadway. Extend charging hours until 8pm during the week
- Introduce charging hours on Saturdays between 8:00 - 20:00 and Sundays 11:00 - 17:00 with a rate of £1 for a maximum of a 4 hour stay.

- Other Car Parks
  - Introduce an evening charge at South Hawksworth Car Park in line with car parks in Bradford City Centre. Valid Monday to Sunday 18:00 - Midnight. £1 flat rate charge
  - Remove staff parking at Shipley and Bingley pools in line with staff parking schemes at the Council - staff could purchase contracts through salary sacrifice
  - Introduce evening and Sunday charges at main car parks in Bingley
  - Increase charges for waiver permits from £5 to £10 (or £15 if purchased on the day)

The Department has reviewed its plan to reduce its front line staffing spend by £2m in 2017-18, and this replacement proposal is to address the required saving through the following approach as part of its delivery of the overall demand management strategy:

- Further reduction in high cost packages
- Further reduction in Supported Living contracts/ packages
- Various reductions in travel and fees

A combination of the above savings will achieve a net budget reduction of £2m during 2017-18 and will promote positive risk taking, enablement and independence and will maximise the use of assistive technology which reduces the number of care hours required to support individuals.

See also proposal 4A1 in Appendix C for more detail on the proposed actions in 2017-18.
