** YAS have been participating in a pilot which has involved new call categories. The initial pilot ran from 21st April 2016 until 19th October 2016 and the second phase began on 20th October 2016. Due to the changes in categories direct comparison between the different phases cannot be done because they don't necessarily represent the same activity. Currently no performance target has been set for the 2R and 2T categories.

** YAS have been participating in a pilot which has involved new call categories. The initial pilot ran from 21st April 2016 until 19th October 2016 and the second phase began on 20th October 2016. Due to the changes in categories direct comparison between the different phases cannot be done because they don't necessarily represent the same activity. Currently no performance target has been set for the 2R and 2T categories.

** YAS have been participating in a pilot which has involved new call categories. The initial pilot ran from 21st April 2016 until 19th October 2016 and the second phase began on 20th October 2016. Due to the changes in categories direct comparison between the different phases cannot be done because they don't necessarily represent the same activity. Currently no performance target has been set for the 2R and 2T categories.
