

Report of the Strategic Director, Place to the meeting of Regeneration and Environment Overview and Scrutiny Committee to be held on 26 March 2019

AM

Subject:

ENERGY EFFICIENCY IN THE PRIVATE RENTED SECTOR IN THE BRADFORD DISTRICT

Summary statement:

This report provides an update for members on energy efficiency in the private rented sector in the Bradford district including an update on the impact of legislative changes.

Steve Hartley
Strategic Director of Place

Portfolio:

**Regeneration, Housing, Planning &
Transport and Environment/Sport and
Culture**

Overview & Scrutiny Area:

Regeneration and Environment

1. SUMMARY

This report provides an update for members on energy efficiency in the private rented sector in the Bradford district including an update on the impact of legislative changes.

2. BACKGROUND

2.1 The Environment and Waste Overview and Scrutiny Committee considered a report on energy efficiency in the private rented sector on March 27th 2018. At that meeting members requested that a further update report be presented to the Committee after a further 12 months.

2.2 The importance of decent homes that people can afford to live in is one of the six key objectives within the Council Plan. Addressing poor housing conditions contributes not only to the housing objective within the Council Plan but also more widely as:-

- Good quality housing attracts companies and workers - leading to an economically prosperous district
- Children and young people are better able to benefit from education if they are well housed – leading to a district of excellence in learning
- Good quality housing promotes community safety – leading to a safer place in which to live, work and play
- High quality, affordable, warm homes promote health and wellbeing – leading to a healthy district

2.3 In 2015 the Council commissioned a Stock Modelling assessment of housing conditions in the district. Conducted by the Building Research Establishment, the findings indicate that:

- The importance of the private rented sector in the district has grown significantly from 11% of housing (22,200 dwellings) in 2007 to 18% of housing (39,382 dwellings) in 2015.
- 8,291 (21%) of dwellings in the private rented sector have a Category 1 hazard
- The estimated cost of mitigating all hazards in the private rented sector is £19.8m
- 11% (4,452) of private rented dwellings have an Energy Performance Certificate (EPC) rating below Band E
- Fuel poverty affects 15% in the owner occupied sector, 28% in the private rented sector and 18% in social rented (10% income definition)
- The highest concentration of all HHSRS hazards and fuel poverty are found in the wards of City, Manningham and Bowling and Barkerend.

A comparison with the results from the previous Stock Condition Survey undertaken in 2007 indicates that there has been a slight improvement in property conditions but that there are still significant issues with property condition in the private sector

and, in particular, the private rented sector.

The importance of addressing these poor conditions in order to create a good quality private rented sector for the District is recognised as a priority in the Council's "Housing and Homelessness Strategy for Bradford District - A Place to Call Home: 2014-2019".

- 2.4 The Energy Efficiency (Private Rented Property) Regulations 2015 (the Regulations) initially came into force from April 1st 2018. Under these Regulations there is a requirement for any properties rented out in the private rented sector to normally have a minimum energy performance rating of 'E' on an Energy Performance Certificate (EPC).

The regulations were originally intended to apply to new and renewals of tenancies with effect from 1st April 2018 and for all existing tenancies on 1st April 2020. However, on December 19th 2017 the Government launched a consultation on proposals to amend the Regulations. The closing date for contributions to the consultation was March 13th 2018. This consultation had the effect of disrupting any enforcement of the Regulations until the outcome was known.

- 2.5 On 5 November 2018, the government published its response to its consultation paper on amending The Energy Efficiency (Private Rented Property) (England and Wales) Regulations 2015 (the "MEES Regulations").

The proposed changes would require residential landlords to pay up to £3,500 (inclusive of VAT) per property to bring their properties up to an EPC rating of E for the grant of new tenancies to new and existing tenants. This maximum amount or "cap" would be inclusive of any third party funding obtained by residential landlords, including local authority grants, meaning that for those who receive such third party funding, the maximum amount they need to contribute themselves may be significantly less than £3,500.

The government has indicated that the amendments to the MEES Regulations will be enacted in 2019 and the proposed amendments will apply to existing residential tenancies from 1 April 2020.

- 2.6 Under the Regulations there are a number of offences which range from an offence of registering any false or misleading information on the Private Rented Sector Exemptions Register to renting out a property with an EPC rating below 'E' for varying periods of time.

The Regulations set out the maximum level of fines/penalties that can be levied for the various offences but leave it to the discretion of the enforcing authorities to determine the level of fines in each case. There is a maximum level of penalty which applies to each property. This is set at £5,000.

- 2.7 Officers often work with colleagues across West Yorkshire to agree a consistent approach across the sub region with regard to the enforcement approach to new

legislation. This is important due to the fact that property owners often operate across local authority boundaries. This approach will be used to develop and agree an approach to the enforcement of MEES.

3. OTHER CONSIDERATIONS

- 3.1 Research from the Energy Saving Trust in 2013 found that tenants in private rented housing are the least likely to benefit from the uptake of energy efficient, money saving upgrades to their homes through the Energy Company Obligation (ECO) scheme and various other initiatives that have operated over the past 14 years. This has also been the experience locally where it has been difficult to get uptake from the private rented sector for various energy related initiatives, especially where a customer contribution is required. A reason for this may be because it is unclear who the main beneficiary of the work is, i.e. is it the tenant who benefits from lower bills or the landlord whose property is improved.
- 3.2 It can be difficult for private landlords to establish a business case to justify investing in stock at the lower end of the PRS market, as it tends to provide low yield rents and any energy efficiency improvements in the property are unlikely to attract a higher rent or significantly increase the potential sale value. This is likely to be an issue in some parts of the Bradford District where there are the most significant levels of fuel poverty.
- 3.3 The HST has recently developed a new information page on the Council's "Stay Connected" service. This is used to provide information and updates for landlords and tenants on a range of issues including new legal responsibilities and available initiatives.
- 3.4 Officers have worked on a regional basis to develop an Energy Repayment Loan (ERL) for owner occupiers to enable them to access energy efficiency schemes. This has been developed with and will be administered by the regional Homes and Loans service hosted at Sheffield City Council. This scheme can provide:
 - an interest free loan secured on the property of between £300 to £5,000 to be repaid over a period of up to 5 years
 - loans would not be expected to normally be given where the total loan to value would exceed 70% of the property's unimproved value

These loans will be delivered by the Empty Homes and Loans team within the Housing Operations service at Bradford.

A similar product aimed at landlords has been developed although funding has not yet been identified to deliver loans to this user group. The Executive would also need to determine that the Council's Comprehensive Housing Renewal Policy should be amended to include this additional form of assistance before it could be made available.

The delivery of any scheme targeted at rented properties would need to be implemented carefully to ensure that it could be effectively delivered alongside the Council's other housing enforcement responsibilities.

4. FINANCIAL & RESOURCE APPRAISAL

- 4.1 Additional resources will not be made available from central Government to implement the new and proposed statutory responsibilities. The Council can however retain any income generated from civil penalty notices that are paid provided that it is used to further the Local Authority's statutory functions in relation to their enforcement activities covering the private rented sector.

5. RISK MANAGEMENT AND GOVERNANCE ISSUES

No significant risks have been identified.

6. LEGAL APPRAISAL

- 6.1 There is some ambiguity relating to who the enforcing authority will be for domestic premises between the guidance issued by the Department for Business, Energy and Industrial Strategy (BEIS) and the Regulations themselves. Officers are seeking clarification on this.
- 6.2 Legal Services will provide advice on the format of notices and procedures required to implement the new statutory responsibilities.

7. OTHER IMPLICATIONS

7.1 EQUALITY & DIVERSITY

The improvement of housing conditions in the District will have a positive impact on those groups and individuals who suffer multiple disadvantages associated with poor quality and inadequate housing.

7.2 SUSTAINABILITY IMPLICATIONS

The interventions that the Housing Standards team take to improve the quality of the private rented stock will help to create a more sustainable housing stock for the district.

The Housing service will continue to work with neighbouring Local Authorities and other regional partners to gather information and develop initiatives to tackle local and regional problems.

7.3 GREENHOUSE GAS EMISSIONS IMPACTS

Any work done to a domestic property to remove excess cold as a hazard or to improve its energy efficiency is likely to have the effect of reducing the domestic carbon emissions of that property (in addition to reducing the household's heating bills). This will contribute to meeting the District's Greenhouse Gas Emissions targets.

7.4 COMMUNITY SAFETY IMPLICATIONS

One of the hazards assessed by officers using the Housing Health and Safety Rating system (HHSRS) relates to entry by intruders. Where the hazard of entry by intruders has been identified in a home measures to address that hazard will be included in any action taken.

7.5 HUMAN RIGHTS ACT

No implications under the Human Rights Act have been identified.

7.6 TRADE UNION

No Trade Union implications have been identified.

7.7 WARD IMPLICATIONS

Housing Standards work is largely reactive and covers the whole District.

7.8 IMPLICATIONS FOR CORPORATE PARENTING

Officers from HST work with officers from Children's Services and Health and Wellbeing to inspect properties used as accommodation for children in and leaving care as requested to ensure that they comply with the relevant housing standards.

7.9 ISSUES ARISING FROM PRIVACY IMPACT ASSESSMENT

The service will complete Privacy Impact Assessments prior to the introduction of any new enforcement powers and the amendment of the Private Sector Housing Enforcement Policy. Any issues identified through those assessments will be addressed prior to implementation.

8. NOT FOR PUBLICATION DOCUMENTS

None.

9. OPTIONS

9.1 Option 1 – that the Committee consider the report.

9.2 Option 2 – that the Committee note the report and request a further update on energy efficiency in the private rented sector in a further 12 months.

10. RECOMMENDATIONS

10.1 That the report be noted and a further update on energy efficiency in the private rented sector be presented in twelve months time.

11. APPENDICES

None

12. BACKGROUND DOCUMENTS

None
