

Report of the Assistant Director (Planning, Transportation & Highways) to the meeting of Regulatory and Appeals Committee to be held on 6th February 2020

AB

Subject:

An outline application for residential development of land, requesting consideration of access at The Willows, Hainsworth Road, Silsden.

Summary statement:

The application site is part of an area of land formerly allocated as Safeguarded Land, policy UR5 and proposal area K/UR5.36, in the RUDP. However, the principal policy, Policy UR5 was not saved as part of the RUDP and the site is therefore no longer allocated.

The principle of housing has been considered against the former Safeguarded Land allocation; the impact on the Leeds-Liverpool Canal Conservation Area and highway constraints. On balance, it is considered that the proposed residential development would be appropriate at this site, without substantively harming the conservation area or prejudicing highway safety. In addition, the proposal would increase housing, including affordable housing, within the District.

The application is recommended for approval subject to the completion of a Section 106 agreement and conditions included within the report.

Julian Jackson
Assistant Director (Planning,
Transportation & Highways)

Report Contact: John Eyles

Portfolio:
Change Programme, Housing, Planning and Transport

Overview & Scrutiny Area:
Regeneration and Economy

1. SUMMARY

The application is recommended for approval subject to the completion of a Section 106 and conditions included within the Technical Report, Appendix 1.

2. BACKGROUND

The application is reported to Committee, following 23 objections being received.

3. OTHER CONSIDERATIONS

All considerations material to the determination of this planning application are set out in Appendix 1.

4. FINANCIAL & RESOURCE APPRAISAL

The presentation of the proposal is subject to normal budgetary constraints.

5. RISK MANAGEMENT AND GOVERNANCE ISSUES

No implications.

6. LEGAL APPRAISAL

The determination of the application is within the Council's powers as Local Planning Authority.

7. OTHER IMPLICATIONS

7.1 EQUALITY & DIVERSITY

Section 149 of the Equality Act 2010 states that the Council must, in the exercise of its functions "have due regard to the need to eliminate conduct that is prohibited by the Act, advancing equality of opportunity between people who share a protected characteristics and people who do not share it, and fostering good relations between people who share a protected characteristic and people who do not share it. For this purpose section 149 defines "relevant protected characteristics" as including a range of characteristics including disability, race and religion. In this particular case due regard has been paid to the section 149 duty but it is not considered there are any issues in this regard relevant to this application.

7.2 SUSTAINABILITY IMPLICATIONS

The application site is located c.700m from the town centre, with various facilities and services within the town centre. The site is within walking distance of the town centre and it is not considered there are any adverse implications on sustainability.

7.3 GREENHOUSE GAS EMISSIONS IMPACTS

New development invariably results in the release of greenhouse gases associated with construction operations and the activities of the future users of the site. Consideration should be given as to the likely traffic levels associated with development. Consideration should also be given as to whether the location of the proposed development is such that sustainable modes of travel would be best facilitated and future greenhouse gas emissions associated with the activities of building users minimised. Electric vehicle charging points would be provided to each house within the proposed development.

7.4 COMMUNITY SAFETY IMPLICATIONS

Core Strategy Policy DS5 states that development proposals should be designed to ensure a safe and secure environment and reduce the opportunities for

crime. In this instance, subject to appropriate access control, boundary treatments, being implemented, it is not considered that there are grounds to conclude that the proposed development would create an unsafe or insecure environment or increase opportunities for crime, in accordance with Core Strategy Policy DS5.

7.5 HUMAN RIGHTS ACT

Article 6 - right to a fair and public hearing. The Council must ensure that it has taken into account the views of all those who have an interest in, or whom may be affected by the proposal.

7.6 TRADE UNION

None

7.7 WARD IMPLICATIONS

None

7.8 AREA COMMITTEE ACTION PLAN IMPLICATIONS

None

7.9 IMPLICATIONS FOR CORPORATE PARENTING

None

7.10 ISSUES ARISING FROM PRIVACY IMPACT ASSESMENT

None

8. NOT FOR PUBLICATION DOCUMENTS

None

9. OPTIONS

The Committee can approve the application as per the recommendation contained in Appendix 1, or refuse the application.

If the Committee decides that the application should be refused, the reason(s) for refusal would have to be given, based upon development plan policies or other material planning considerations.

10. RECOMMENDATION

This application is recommended for approval subject to completion of the Section 106 and conditions contained within the report.

11. APPENDICES

Appendix 1 Technical report.

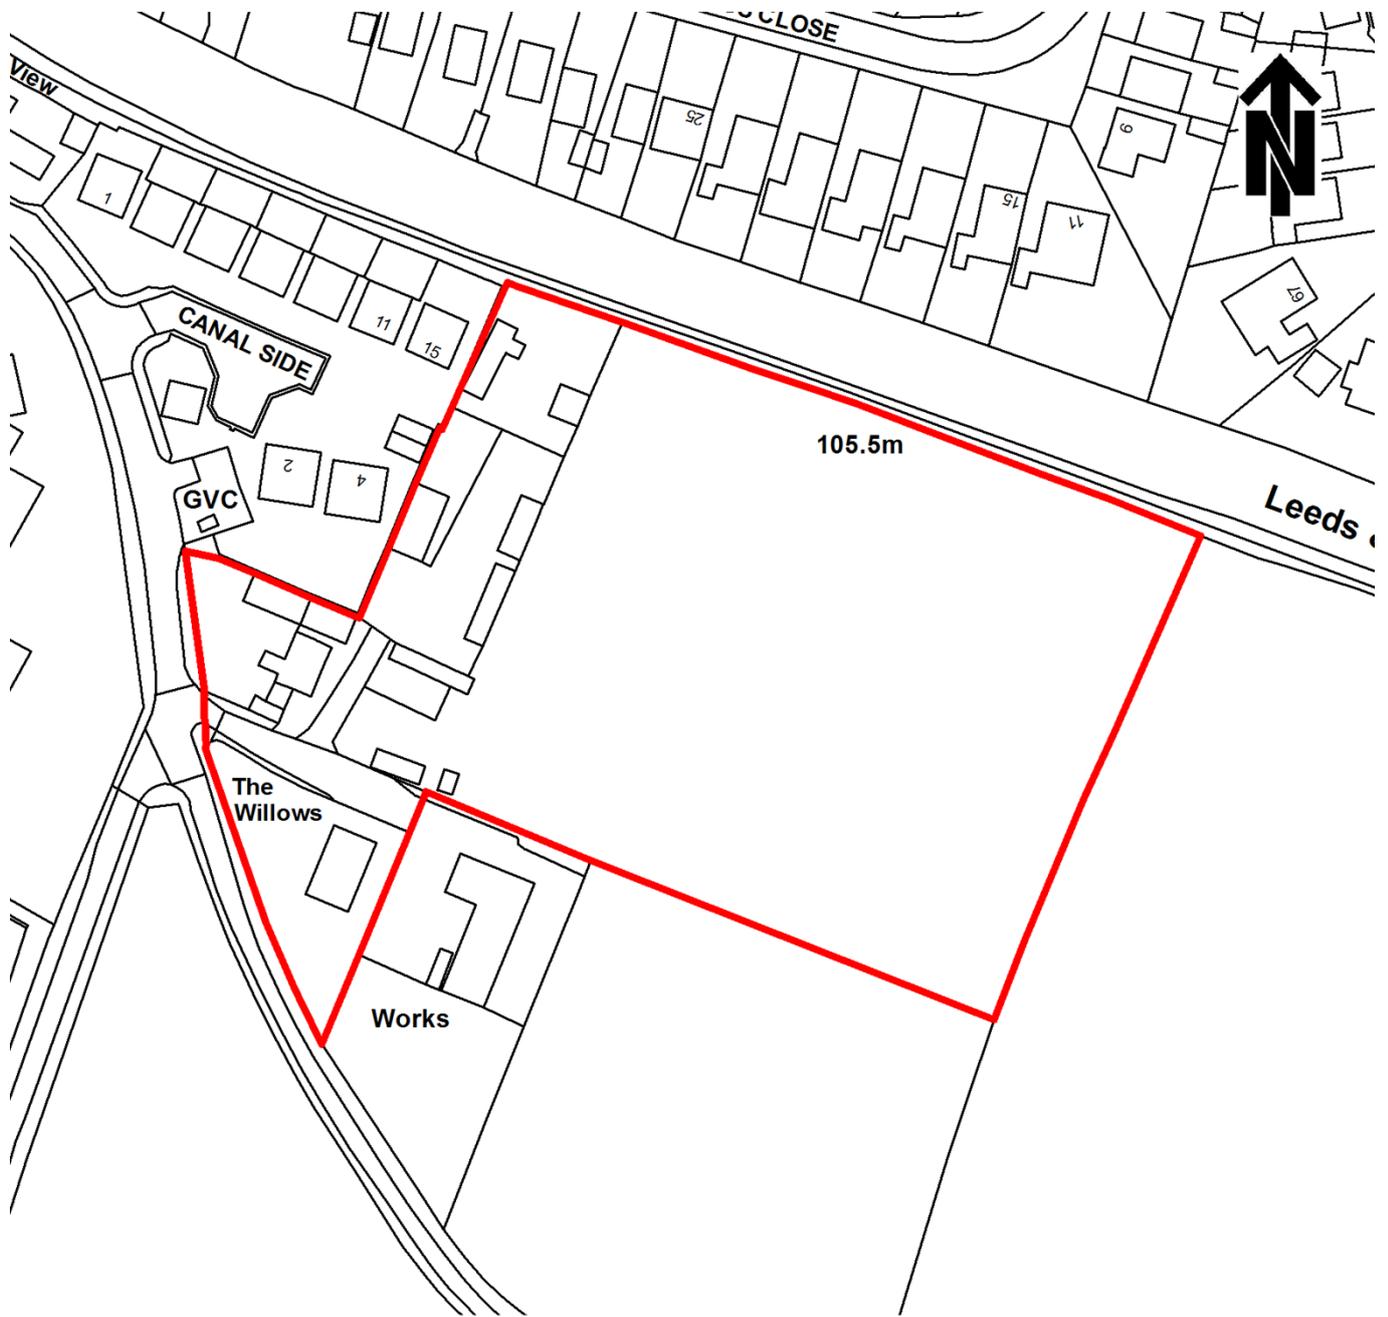

12. BACKGROUND DOCUMENTS

APPENDIX 1

Ward

Craven

Recommendation

That the Committee be minded to grant outline planning permission subject to conditions (as listed) and a Section 106 Agreement. The Assistant Director Planning, Transportation and Highways be authorised to issue the grant of planning permission upon the completion of the S106 Agreement.

Application No.

19/01661/MAO

Type of application

Outline application for residential development of land requesting consideration of access at The Willows, Hainsworth Road, Silsden.

Applicant

Mr Mick Smith

Agent

LARK Architects Ltd

Site Description

The application site is currently occupied by a bungalow, The Willows, and a number of associated outbuildings. The remainder of the site appears to be in use as grazing. The application site is relatively flat and bounded to the north by the towpath of the Leeds-Liverpool Canal, with agricultural land to the south and east. There are hedgerows and trees to the northern and southern boundaries of the site. The site is not within, but is adjacent to the boundary of the Leeds-Liverpool Canal Conservation Area.

Background

The application site was formerly allocated in the RUDP, as Safeguarded Land, identified as UR5.36 Hainsworth Road. As this policy was not saved as part of the Core Strategy, the allocation no longer exists.

Relevant Site History

None

RUDP

Allocation

None

Core Strategy

There are a number of Core Strategy Policies to be considered in the determination of the application.

SC9 Making Great Places

TR1 Travel Reduction and Modal Shift

TR2 Parking Policy

TR3 Public Transport, Cycling and Walking

HO1 Scale of Housing Required

HO3 Distribution of Housing Requirement

HO5 Density of Housing Schemes

HO9 Housing Quality
HO11 Affordable Housing
DS2 Working with the Landscape
DS3 Urban Character
DS4 Streets and Movement
DS5 Safe and Inclusive Place

The National Planning Policy Framework (NPPF).

Local planning authorities are required to approach decisions on proposed development in a positive and creative way. They should use the full range of planning tools available, including brownfield registers and permission in principle, and work proactively with applicants to secure developments that will improve the economic, social and environmental conditions of the area. Decision-makers at every level should seek to approve applications for sustainable development, where possible

Planning law requires that applications for planning permission be determined in accordance with the development plan, unless material considerations indicate otherwise.

Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land.

Planning policies and decisions should make more intensive use of existing land and buildings, especially where it would help to meet housing need.

Planning policies and decisions should ensure that developments: a) will function well and add to the overall quality of the area, not just for the short term but over the lifetime of the development; b) are visually attractive as a result of good architecture, layout and appropriate and effective landscaping; c) are sympathetic to local character and history, including the surrounding built environment and landscape setting, while not preventing or discouraging appropriate innovation or change (such as increased densities); d) establish or maintain a strong sense of place, using the arrangement of streets, spaces, building types and materials to create attractive, welcoming and distinctive places to live, work and visit; e) optimise the potential of the site to accommodate and sustain an appropriate amount and mix of development (including green and other public space) and support local facilities and transport networks; and f) create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Publicity and Representations

The application was advertised through site notices and in the local press. There have been 23 objections to the application.

Summary of Representations Received

Loss of greenfield site.
Overdevelopment of the site.
Highway capacity
Increased traffic
Highway too narrow
Impact on pedestrian safety
Cyclist safety
Impact on wildlife

Loss of hedgerow
Impact on residential amenity
Effect on conservation area
Lack of school places/GP places

Consultations

The Canal and River Trust

Issues relevant to the Canal and River Trust (CRT) - impact on structural integrity of the canal; impact on the character and appearance of the canal corridor; impact on the biodiversity of canal corridor; potential for flood risk; additional usage of towpath.

It is requested by the CRT that any permission should be subject to requirements to safeguard the structural integrity of the canal; retention of hedgerow & trees; a management plan to safeguard habitats; and improvements to the towpath.

West Yorkshire Archaeology Advisory Service

The proposed development is located in an area of previously undeveloped land to the east of Silsden and south of the Leeds-Liverpool Canal. It lies in an area of archaeological potential dating from the prehistoric era to the early post-medieval period. The recent discovery of an early Bronze Age barrow and later Iron Age boundaries during a housing development 600m to the south-west off Belton Road shows that even in areas with no previously known archaeological potential significant remains may be present.

The development sites south to south-west facing aspect at a height of 100m above sea level would have made it potentially attractive to past communities from the prehistoric to early medieval periods.

The previously undeveloped portion of the site should have its archaeological potential fully evaluated prior to determination of the application.

The WYAAS recommends that the developer be required to provide the Planning Authority with an evaluation, based on appropriate analytical methods, of the full archaeological implications of the proposed development. We would further recommend that a planning decision be deferred, on the grounds that the planning authority requires further information in order to reach an informed decision, until the results of the evaluation have been received and assessed by WYAAS.

However, the above works can be secured by the attachment of a suitable condition in accordance with the NPPF para. 199 and within the Department of the Environment's Circular 11/95.

Environmental Health (Pollution)

This is a minor development for the purpose of the West Yorkshire Low Emission Strategy (adopted December 2016) and the West Yorkshire Low Emission Planning Guidance.

Under the provisions of the LES planning guidance minor developments are required to provide Type 1 emission mitigation as follows:

Type 1 Mitigation

- Provision of electric vehicles charging facilities at the rates set out in the West Yorkshire Low Emission Planning Guidance.
- Adherence to the *London Best Practice / IAQM Guidance on the Control of Dust and Emissions from Construction and Demolition* during all demolition, site preparation and construction activities at the site.

In addition some applications are required to submit an exposure assessment where the development has the potential to increase human exposure to poor air quality.

Public Rights of Way

There are no recorded public rights of way within or adjacent to the application site.

Silsden Town Council

No further development should take place until such time as the infrastructure has been improved; the junction of Belton Rd with Keighley Road requires upgrading with a roundabout at least and a holistic overview is required given the number of planning applications which show development to exit/enter on to Keighley Rd. Other infrastructure, including concerns of the capacity of the electric sub-station and sewers which are running at capacity. This council believe that the lane is too narrow and the proposed widening cannot take place due to the protected hedgerows which should not be altered in any way. Should this outline be approved this Council requests that all reserved matters are subject to a full consultation.

Conservation

The Heritage Assessment summarises that the proposed development would have an effect on the setting of the conservation area and that it would be minor in nature. I would concur with this summary. There is conflict with Core Strategy Policy EN3, which seeks to ensure that all development conserves or enhances the significance of designated heritage assets and their setting. I consider that the proposal is likely to result in harm to the setting of the Leeds & Liverpool Canal Conservation Area, however, I consider that this harm will be less than substantial and therefore this should be weighed up against the public benefits of the proposal, as set out in para. 196 of the NPPF.

Notwithstanding the above, I note that all matters are reserved and therefore information that has been provided about the layout of the site and design is therefore indicative only. There is an expectation that any development will utilise the highest standards of design and that a palette of natural materials will be used.

Should approval be granted, matters such as the layout and design of the dwellings, boundary treatments (particularly and crucially along the northern boundary of the site where it forms the edge of the towpath), scale and materials will be of paramount importance in terms of mitigating any negative impacts upon the setting of the conservation area and striving towards a development which makes a positive contribution to the character and appearance of the conservation area, in which it would form the immediate setting.

LLFA

The proposed surface water drainage strategy is acceptable to the LLFA, but the details would have to be acceptable to the highway authority. Anything larger than 900mm span is considered to be a structure and needs to be located outside the influence of the adopted highway. The drainage details can be submitted with the Reserved Matters application.

Trees Team

Concern is expressed on the indicative layout and consideration of impact on protected trees.

Biodiversity

The applicant has provided a good appraisal of the potential of the land to support foraging birds which are qualifying species or part of the qualifying assemblage of the SPA which is accepted. Following this appraisal, it is agreed that the likelihood of these birds being present on the land is highly unlikely.

The zone C impact is less convincing. It is considered that there would be insufficient space on the site, to overcome the impact of additional recreation to the qualifying habitats and species from the European sites. This additional impact from new dwellings was assessed under our own Habitats Regulation Assessment as an impact. A contribution is likely to be required for the mitigation of this impact.

Although no analysis of net gain has been provided, as long as all mitigation and enhancements which are suggested are put in place, as outlined in the Ecological Impact Assessment, it can be supported. These should be secured in suitably worded conditions to supply a Construction Environmental Management Plan and Ecological Management Plan, if planning permission is granted.

Highways

As originally submitted, the Council's Highways DC team commented that -

revisions have been made to the drawing(s) and a priority working scheme is shown on drawing 10981-003A. A Technical Note states that in this scheme, vehicles travelling north west are expected to slow on approach to the give way line, in anticipation of stopping, to allow priority to vehicles travelling southeast if necessary;

a new footway should be provided to the north of the site boundary and this should be included within the red line boundary of the application. The carriageway width at this location and the width of the proposed footway should be demonstrated on plan;

plot 1 should not take direct access off Hainsworth Road.

Further information has been submitted in the form of revised details for off-site highways works comprising a priority scheme and footway improvements. These details follow extensive discussion with Highways DC. Further comments from the Highways Officer will be reported orally to Members.

Policy

No comments received.

Summary of Main Issues

Principle of development

Highways

Heritage assets

Impact on canal

Other Issues

Appraisal

Principle of development

The application site is part of a larger site, formerly allocated as Safeguarded Land in the RUDP, policy UR5 and identified as UR5.36, Hainsworth Road. The development being dependent on the construction of the Silsden by-pass, between Keighley Road and Holden Lane.

However, policy UR5 was not saved as part of the adoption of the Core Strategy and the site is therefore unallocated. The previous requirement for a by-pass to be built before development at the site, as part of the former RUDP policy, also therefore no longer stands. This application, on unallocated land, is therefore assessed on its merits.

In acknowledging that the application site is green field, the NPPF states that where there are no relevant development plan policies, planning permission should be granted unless:

- the application of policies in the NPPF that protect areas or assets of particular importance provide a clear reason for refusing the development proposed; or
- any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole.

It is not considered that there any clear policy reasons to refuse the application, nor would there be any adverse impacts, that would outweigh the benefits of the proposed development, when measured against the NPPF.

As such, the principle of residential development is accepted.

Effect on heritage assets

In considering planning applications adjacent to a conservation area, there is a duty of the decision maker to consider any impacts on the setting. Paragraph 190 of the NPPF states: “Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this into account when considering the impact of a proposal on a heritage asset, to avoid or minimise any conflict between the heritage asset’s conservation and any aspect of the proposal.”

When considering impacts, the NPPF paragraph 196 states “Where a development proposal will lead to less than substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal including, where appropriate, securing its optimum viable use”.

The application site abuts the Leeds-Liverpool Canal Conservation Area, to its northern boundary. A Heritage Statement has been submitted to assess impact on this Conservation Area. It is concluded that the proposed development would harm the setting of the Leeds-Liverpool Canal Conservation Area. However, that harm is considered to be less than substantial and would be outweighed by the public benefit of additional housing, including affordable housing being provided at the site.

It is not considered that there would be any substantial harm to heritage assets that warrants the application not being supported.

Trees

Whilst the layout is not under consideration, as part of the outline application, the applicant has been advised that protected trees should be accommodated in the layout of any subsequent reserved matters application. In any event, any proposal for works to protected trees would require the consent of the Council.

Highways

Impact on Leeds-Liverpool Canal

The Canal and River Trust has commented on the application and outlines a number of issues concerning the effect on the canal. These are identified in the consultation response above. Provided the proposal is subject to further details being provided through

conditions/reserved matters application, the issues raised by the CRT would be addressed.

Other Issues

Overdevelopment of the site.

The application site is 1.2 ha in area. Policy HO5 of the Core Strategy indicates a housing density of 30 dwellings per hectare being required. As part of any reserved matters application, the layout and number of houses would be subject to detailed consideration and an appropriate layout in design terms would be achieved, meeting the density requirement, without being overdevelopment of the site.

Impact on highway

A Transport Assessment has been submitted and considered by Highways Development Control. Traffic generated by the proposed development has been assessed and it is not believed that there would be any adverse impact on the highway network as a result of increased traffic. It is considered that the additional traffic can be accommodated within the local network.

Impact on pedestrian safety

As part of the planning application, it is proposed to undertake highway improvements. These include improvements to and extension of the footway along Hainsworth Road. This would improve pedestrian safety and connectivity along Hainsworth Road.

Cyclist safety

As part of the development, there would be a priority traffic scheme introduced, which has been designed to reduce the potential conflict between road users, including cyclists, along Hainsworth Road.

Impact on wildlife

An ecological assessment has been submitted and considered by the Councils Biodiversity Officer. The proposed development has accounted for biodiversity and it is not considered that there would be any adverse impact on biodiversity. A contribution would be secured through a Section 106 agreement, to improve footpath routes, to mitigate against potential impacts on protected habitats and species.

Impact on residential amenity

Whilst the housing layout is not part of this outline application, the distances that would be achieved between existing properties and proposed housing are not believed to raise any issues on residential amenity. This would be detailed at reserved matters stage and the relationship between existing and proposed properties assessed and agreed to ensure there would be no adverse impact on residential amenity.

Lack of school places/GP places

As with any planning application for residential development, there would be subsequent pressures on local services and infrastructure. In the event that planning permission was granted, any future reserved matters application would be subject to the Community Infrastructure Levy, where monies could be provided to address the potential increase demand on school places. In terms of NHS services eg. GP', this is a matter for the NHS, not the Council and it would be for the NHS to plan for any increased demands on its services.

Options

The Committee can approve the application as recommended or refuse the application. If the application is refused, reasons for refusal would have to be provided.

Community Safety Implications

None

Human Rights Act

Article 6 – right to a fair and public hearing. The Council must ensure that it has taken into account the views of all those who have an interest in, or whom may be affected by the proposal.

Not for publication documents

None

Reason for Granting Planning Permission:

The development of safeguarded land with residential development is considered an appropriate development that gives the opportunity to provide sustainable development within Silsden. The development would provide affordable housing and ensure that the character of the surrounding area is maintained. The effect of the proposal on the heritage assets adjoining the site, the biodiversity of the site itself, the surrounding locality; and the adjacent neighbouring residential properties has been assessed and are considered acceptable. As such the proposal would meet policies SC9, TR1, TR2, TR3, HO1, HO3, HO5, HO9, HO11, DS2, DS3, DS4 and DS5.

Section 106

The applicant has agreed heads of terms and planning permission would be subject to Section 106 for the delivery of:

- 20% affordable housing on-site;
- a contribution to the canal towpath enhancements;
- a contribution of £10,000 towards footpath improvements at to mitigate impacts on protected habitats and species.

Community Infrastructure Levy

Outline applications are not liable to the CIL but any subsequent reserved matters application would be liable to the CIL.

Conditions of Approval:

Before any development is begun plans showing the:

- i) appearance
- ii) Landscaping
- iii) layout
- iv) and scale

must be submitted to and approved in writing by the Local Planning Authority.

Reason: To accord with the requirements of Article 5 of the Town and Country Planning (Development Management Procedure) (England) Order 2015.

Before any part of the development is brought into use, the proposed means of vehicular and pedestrian access hereby approved shall be laid out, hard surfaced, sealed and drained within the site in accordance with the approved plan numbered ^IN; and completed to a constructional specification approved in writing by the Local Planning Authority.

Reason: To ensure that a suitable form of access is made available to serve the development in the interests of highway safety.

A site specific dust risk assessment shall be undertaken for all construction, demolition and earthworks undertaken at the site and an appropriate dust control plan put in place for all relevant stages of work. The dust risk assessment and control measures shall be developed in accordance with the IAQM guidance on the assessment of dust from demolition and construction. Plans will be subject to approval by City of Bradford MDC and should be maintained on site for inspection throughout the duration of the project. All works on site shall be undertaken in accordance with the approved dust management plans.

Reason: To protect the amenity and health of surrounding residents in line with the Council's Low Emission Strategy, policy EN8 of the Bradford Local Plan and National Planning Policy Framework (NPPF).

Before the date of first occupation every household on the development shall be provided with access to a purpose built EV charging point. The charging points shall be provided in accordance with a scheme submitted to and approved in writing by the Local Planning Authority. The scheme shall meet at least the following minimum standard for numbers and power output:-

A Standard Electric Vehicle Charging point (of a minimum output of 16A/3.5kW) provided at every residential unit that has a dedicated parking space and/or garage.

One Standard Electric Vehicle Charging Point (of a minimum output of 16A/3.5kW) for every 10 unallocated residential parking spaces.

Buildings and parking spaces that are to be provided with charging points shall not be brought into use until the charging points are installed and operational.

Charging points installed shall be retained thereafter.

Information about the provision of the EV charging point and how to use it should be included in the new home welcome pack.

Reason: To facilitate the uptake and use of low emission vehicles by future occupants and reduce the emission impact of traffic arising from the development in line with the council's Low Emission Strategy, policy EN8 of the Bradford Local Plan and National Planning Policy Framework (NPPF).

The development shall not begin, nor shall there be any demolition, site preparation or groundworks, nor shall any materials or machinery be brought on to the site, nor any works carried out to any trees that are to be retained until the tree protection fencing and other tree protection measures are installed in strict accordance with an arboricultural method statement or tree protection plan to BS5837:2012 to be approved in writing by the Local Planning Authority.

The development shall not begin until the Local Planning Authority has inspected and given its written approval confirming that the agreed tree protection measures are in place in accordance with the submitted details.

Reason: To ensure that trees are adequately protected prior to development activity beginning on the site which would otherwise harm trees to the detriment of visual amenity. To accord with Policy EN5 of the Bradford Local Plan Core Strategy.

Prior to the occupation of the development, or prior to the occupation of such phases of the development as have been agreed in writing with the Local Planning Authority, written verification/evidence that the developer has arranged and implemented site supervision and monitoring of the approved tree protection measures by a suitably qualified and pre-

appointed tree specialist, at regular and frequent intervals throughout the duration of the construction period, shall be submitted to the Local Planning Authority.

Reason: To ensure that trees have been adequately protected by the developer during development activity and that harm to the trees has been effectively prevented or mitigated by the measures proposed in the planning application submission. To ensure that protection measures have prevented harm to trees and visual amenity, to accord with Policy EN5 of the Bradford Local Plan Core Strategy.

The approved and agreed tree protection measures shall remain in place, and shall not be moved, removed or altered for the duration of the development without the written consent of the Local Planning Authority. There shall also be no excavations, engineering or landscaping work, service runs, or installations, and no materials will be stored within any construction exclusion zones or tree protection areas without the written consent of the Local Planning Authority.

Reason: To ensure that trees are adequately protected during development activity on the site which would otherwise harm trees to the detriment of visual amenity. To accord with Policy EN5 of the Bradford Local Plan Core Strategy.

The development shall not begin until details of a scheme for foul and surface water drainage have been submitted to and approved in writing by the Local Planning Authority. The surface water drainage scheme shall be designed in accordance with the principles outlined in the FRA Addendum by FRC, doc ref. BL/061219/2019-052-02, dated 06/12/2019. The maximum surface water discharge rate, off-site, shall not exceed 3.5 litres per second. The scheme so approved shall thereafter be implemented in accordance with the approved details.

Reason: In the interests of the amenity of future occupiers, pollution prevention and the effective management of flood risk and to accord with Policies DS5, EN7 and EN8 of the Core Strategy Development Plan Document.

Notwithstanding the drainage details contained in the supporting information, no groundworks, including the stripping of top-soil, shall commence until a construction phase drainage strategy has been submitted to and approved in writing by the Local Planning Authority. The development shall thereafter only proceed in strict accordance with the approved strategy.

Reason: In the interests of the amenity of future occupiers, pollution prevention and the effective management of flood risk and to accord with Policies DS5, EN7 and EN8 of the Core Strategy Development Plan Document.

No development to take place within the area indicated until the applicant, or their agents or successors in title, has secured the implementation of a programme of archaeological recording. This recording must be carried out by an appropriately qualified and experienced archaeological consultant or organisation, in accordance with a written scheme of investigation which has been submitted by the applicant and approved in writing by the Local Planning Authority.

Reason: To ensure archaeological assets are properly accounted for.

The reserved matters application shall include an Ecological Management Plan and the development shall subsequently be carried out in accordance with the recommendations included with the approved Plan.

Reason: In the interests of safeguarding protected species.

Prior to the commencement of development, a site wide Construction Environmental Management Plan (CEMP) shall be submitted to and approved in writing by the Local Planning Authority. The CEMP shall include, but not be limited to, the consideration of the following aspects of construction:

- a) Site wide construction and phasing programme.
- b) Principal Contractors' access arrangements for vehicles, plant and personnel including the location of construction traffic routes to, from and within the site, details of their signing, monitoring and enforcement measures, along with location of parking for Principal Contractors and construction workers.
- c) Construction and demolition hours, which shall be carried out between 0800 hours to 1800 hours Monday to Friday, and 0800 hours to 1300 hours on Saturday and at no time on Sundays, Bank or Public Holidays, unless in accordance with agreed emergency procedures for deviation.
- d) Prior notice and agreement procedures for works outside agreed limits and hours.
- e) Delivery and collection times for construction purposes.
- f) Outline Waste Management Plan (OWMP), providing a statement of site specific reuse and recycling objectives with appropriate targets, compliance training for sub-Principal Contractors, construction code of conduct together with regular auditing and reporting on target achievements and quantities disposed, ensuring that such materials are only consigned to authorised treatment/recovery or disposal facilities, including consideration of participation in a Materials Re-use and Recycling Forum.
- g) Noise and Vibration (including piling) impact / prediction assessment, monitoring, recording protocols and consideration of mitigation measures in accordance with BS5528, 2009 - Code of Practice for Noise and Vibration Control on Construction and Open Sites Parts 1 - Noise and 2 -Vibration (or as superseded) including the use of best practical means to minimise noise and vibration disturbance from construction works.
- h) Confirmation on whether a concrete crusher will be used
- i) Dust suppression management and wheel washing measures, including the deposition of all debris on the highway
- j) Site lighting details.
- k) Screening and hoarding details.
- l) Access and protection arrangements around the site for pedestrians, cyclists and other road users.
- m) permanent and temporary realignment, diversions and road closures.
- n) Consideration of ecological and other sensitive receptors.

Reason: In the interests of residential amenity.

No development shall take place until details of the construction of foundations and any new retaining walls at the application site have been submitted to and approved in writing by the LPA. The development shall be carried out in accordance with the approved details.

Reason: In the interests of minimising the risk of land instability in accordance with advice and guidance in paras. 170 e) and 178 of the NPPF.
